USER MANUAL · NEXCOD POS V3.0.0

Nexcod POS, screen by screen

Every page of the pharmacy billing and inventory software: what it is for, what each box and button does, and the steps to get a job done at the counter.

Written from the live software, 10 October 2026

Demo store: Sharma Medical Store, Platinum plan Website: nexcodpos.in

PART 1 · GETTING STARTED

About this manual

This manual covers Nexcod POS version 3.0.0 as it runs in a web browser. Every screenshot was taken from the live software using a demo shop, "Sharma Medical Store". Customer phone numbers, e-mail addresses and IP addresses are blurred.

The manual follows the left-hand menu of the software from top to bottom. Each section opens with the menu path (for example `Sales › Billing`), then explains the screen, then gives the steps for the common jobs done on it.

> TIP
> Most screens also have a short guided tour that appears the first time the screen is opened, and a round **?** button at the bottom right that opens help for that screen.

What Nexcod POS is

Nexcod POS is cloud billing and stock software made for retail pharmacies, medical stores and chemists in India. It runs in a browser on a computer, laptop, tablet or phone, and there is an Android app on the same account and the same data.

Billing built for a medicine counter

Batch chosen at the counter, loose tablets billed from a strip, Schedule H/H1/X details asked for automatically, GST or composition bills.

Stock that knows batch and expiry

Every batch has its own expiry, MRP and purchase rate. Near-expiry and expired stock are listed separately, and expired batches can be blocked from sale.

Purchases from the distributor bill

Type the bill line by line, import it from Excel, or read it from a photo. Schemes, free goods and the bill total are checked.

Books and GST without extra work

Profit and loss, balance sheet, day book, GSTR-1 tables, GSTR-3B figures and a pre-filing check, all built from the bills already made.

Who it suits: a retail pharmacy, medical store or chemist that bills over a counter and must keep batch, expiry and Schedule H records, with one shop or several and one person at the counter or a team. It also has an optional clinic module for shops that run a doctor's clinic.

Who it does not suit (per the company): a distributor or wholesaler needing C&F and scheme-wise distribution, a hospital pharmacy that must sit inside a hospital information system, or a shop that wants a one-time purchase with no internet.

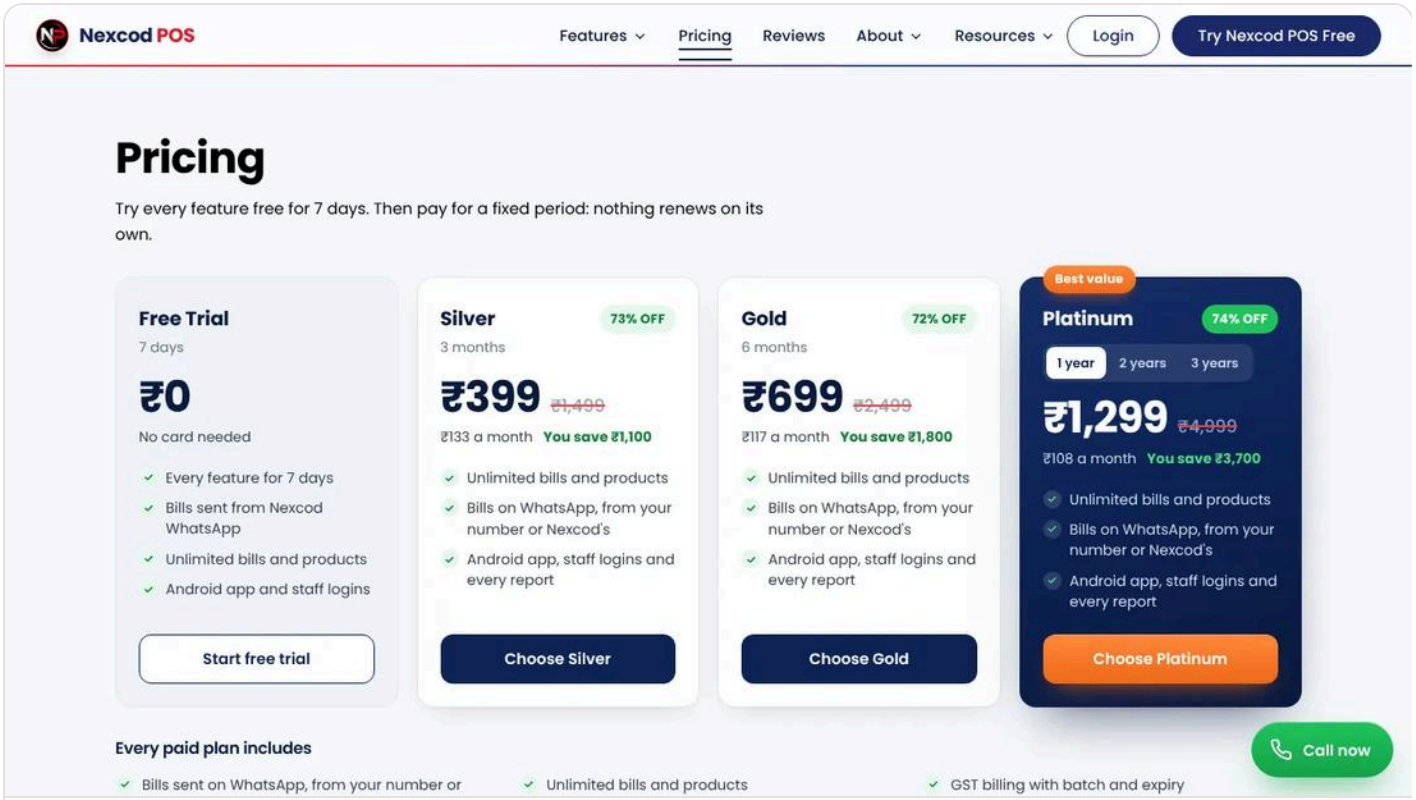

Plans and pricing

Every new account starts with a 7-day free trial with every feature, and no card is needed. After that, a paid plan is needed to keep making new bills. All data already entered stays in the account.

PLAN	PERIOD	PRICE	WORKS OUT TO
Free Trial	7 days	₹0	Every feature, bills sent from Nexcod's WhatsApp
Silver	3 months	₹399 ~~₹1,499~~	₹133 a month
Gold	6 months	₹699 ~~₹2,499~~	₹117 a month
Platinum	1 / 2 / 3 years	₹1,299 / ₹2,598 / ₹3,897	₹108 a month

All paid plans include the same features: unlimited bills and products, bills on WhatsApp from the shop's own number or Nexcod's, the Android app, staff logins with attendance and salary, every bill design with no Nexcod branding, purchase, return, profit and GST reports, and priority e-mail and phone support. The plans differ only in how long they run.

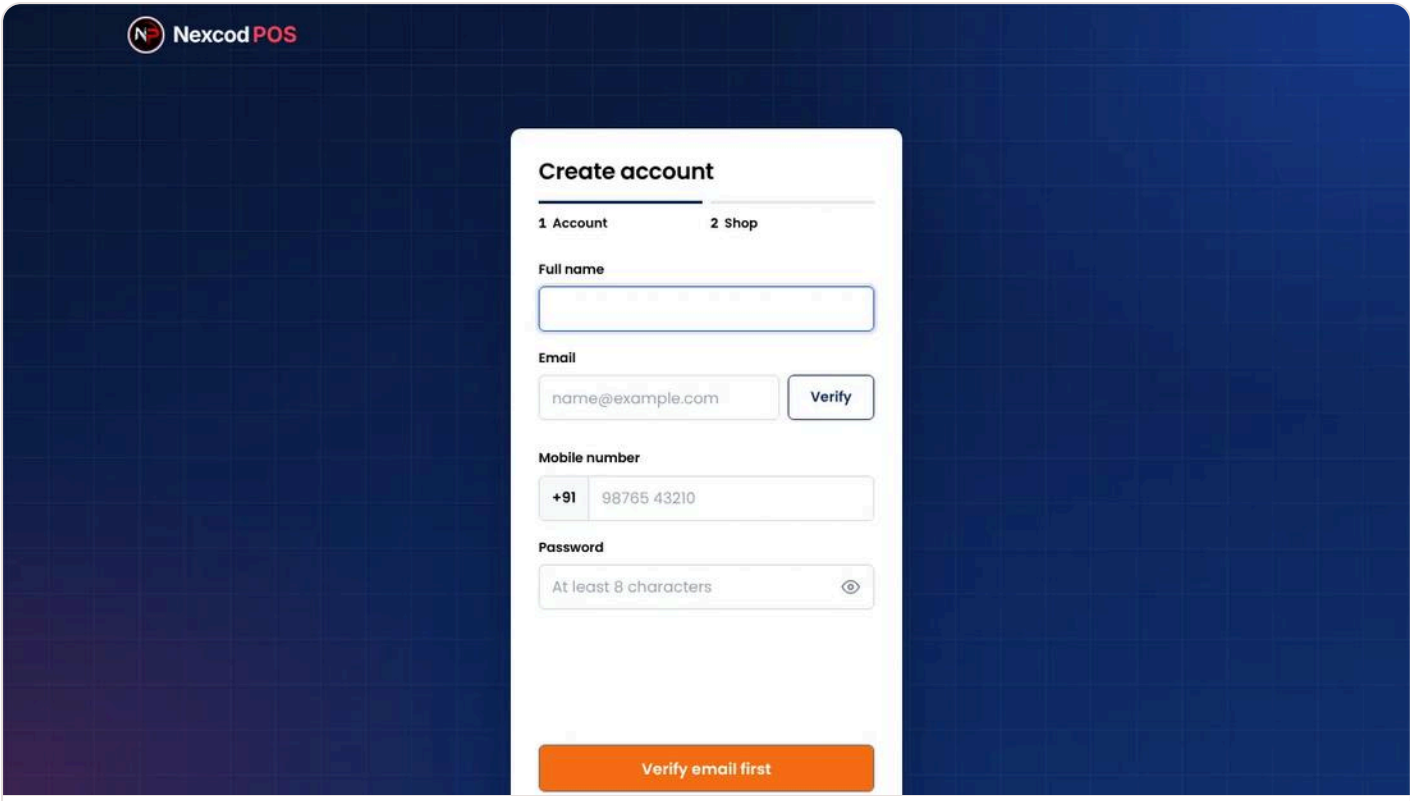

- **Nothing renews on its own.** No card is stored and nothing is charged again unless the shop pays for another period.
- **Paying early loses nothing.** Time bought while a plan is running is added after its end date.
- **Payment is by UPI** from the `Settings › My Plan` page inside the software.
- **Refund:** a full refund can be asked for within 7 days of paying for the first paid plan of a store, with the payment's UTR reference.

The pricing page on nexcodpos.in.

Create an account

Open **nexcodpos.in** and press **Try Nexcod POS Free** or **Start free trial**. This opens `myaccount.nexcodpos.in/signup`. Sign-up has two steps. **Continue with Google** is also offered.

Step 1 of sign-up: the account.

Step 1 · Account

FIELD	WHAT TO ENTER
Full name	The owner's name.
Email + Verify	Press **Verify**. A 6-digit code is e-mailed. Type it into the six boxes. The email shows "Verified" when done. **Resend OTP** sends a new code.
Mobile number	10-digit Indian mobile number (+91 is fixed).
Password	At least 8 characters. The eye icon shows what was typed.

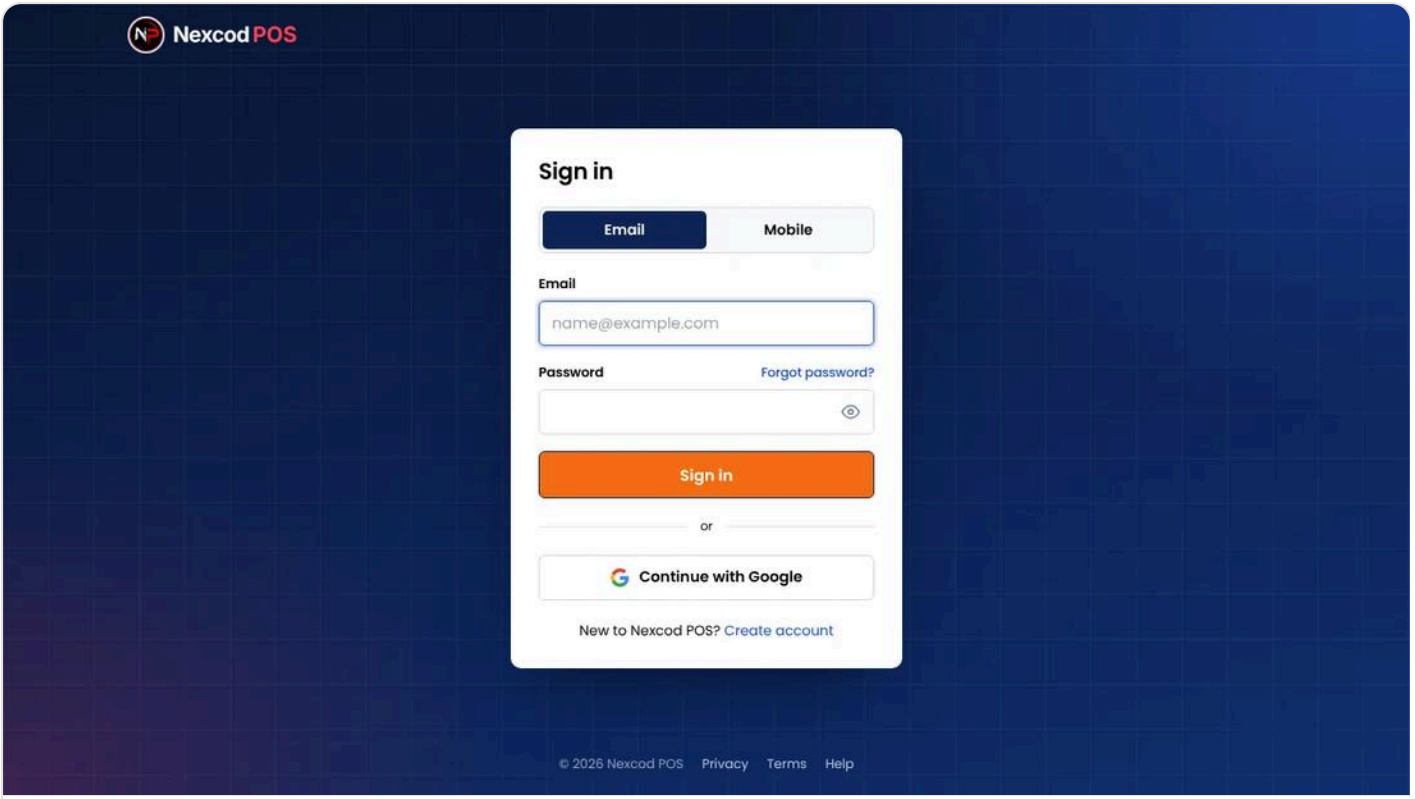

The button reads **Verify email first** until the e-mail is verified, then it moves to step 2.

Step 2 · Shop

FIELD	WHAT TO ENTER
Shop name	As it should print on bills, e.g. "Sharma Medical Store".
Address	Shop number, street, area.
State, District	Pick the state first; the district list fills in for that state. The state decides CGST/SGST vs IGST on bills.
City or town, Pin code	Six-digit pin code.
Quick check	Answer the small sum shown (a check that a person is signing up).
Terms	Tick to agree to the Terms and Privacy Policy, then press **Create account**.

Sign in

Open `myaccount.nexcodpos.in` or press **Login** on the website.

The sign-in page.

- **Email tab:** enter the e-mail and password, then press **Sign in**.
- **Mobile tab:** currently shows "Mobile sign-in is not available right now. Please use Email."
- **Forgot password?** starts a password reset by e-mail.
- **Continue with Google** signs in with a Google account.
- If two-step login is switched on (Settings › Security), a code is e-mailed at every login.

After signing in, the software opens the Dashboard.

First-time setup

Do these once, in this order, before the first real bill.

1. **Shop details.** `Settings › Store Settings › Shop details`: logo, shop name, phone, e-mail, GSTIN, GST type (Regular, Composition or Unregistered), drug licence number, bill number prefix, UPI ID (prints a Scan-and-Pay QR on every bill) and address. Press **Save**.
2. **Bill look and printer.** Choose an invoice theme and paper size (A4, A5, 80 mm, 58 mm and more) under **Invoice Themes** and **Bill design**. Connect the bill printer and barcode scanner under **Printers & Scanners**.
3. **Counter rules.** Decide whether expired medicines, no-price lines, over-stock bills and over-credit-limit bills are blocked, and whether selling prices include GST (MRP billing).
4. **Opening stock.** Add medicines one by one with `Inventory › Products › + Add Product`, or bring in a list with **Import** (Excel). Or enter the last distributor bills through Purchase Entry, which creates stock and batches together.
5. **Masters.** Add suppliers, regular customers (with credit limits if needed) and doctors.
6. **WhatsApp.** Link the shop's WhatsApp number under `Settings › WhatsApp & API` so bills go to customers automatically.
7. **Staff.** Add counter staff under `Users & Access › Multi-user` and give each a role.
8. **Make a bill.** Press **New Bill** on the dashboard.

The screen and the menu

Every page has the same frame: a red menu down the left and a red top bar.

Top bar

ITEM	WHAT IT DOES
Shop name and city	The shop you are working in, with its logo. Clicking it returns to the dashboard.
Plan badge	Shows the current plan (for example PLATINUM). Opens My Plan.
Quick actions switch	On the dashboard only. Shows or hides the grid of coloured quick-action buttons.
Date and clock	Today's date and the live time.
Keyboard icon	Opens the list of keyboard shortcuts for the screen.
Refresh icon	Reloads the latest data (useful when another counter has billed).
Bell	Notifications: low stock, expiry, attendance and similar alerts.
Up-arrow button	Collapses the top area to give the page more room.

Left menu

The ☰ icon beside "Nexcod POS" collapses the menu. Groups with an arrow open to show their pages.

MENU GROUP	PAGES INSIDE
Dashboard	The home screen.
Sales	Billing · Invoices · Estimates · Sales Returns · Demand Register · Health Readings
Purchase	Purchase Entry · Purchase Orders · Purchase Returns · Low Stock
Suppliers	The supplier list.
Inventory	Products · Batch Stock · Stock Register · Stock Adjustment · Stock Check · Barcode Labels · Medicine List · Schedule Check · Clean Up
Masters	Customers · Patients · Patient History · Doctors · Brands · Categories · Units
Reports	Sales · Purchase · Stock · GST · Account Reports · Drug Registers
Accounts	Books · Payments · Expenses · Ledger
Users & Access	Multi-user · Devices · Activity Log
Settings	Store Settings · Shop Documents · My Plan · WhatsApp & API · Backup · Downloads
Bottom links	How to Use · Learn · Support · Write a Review · Sign Out

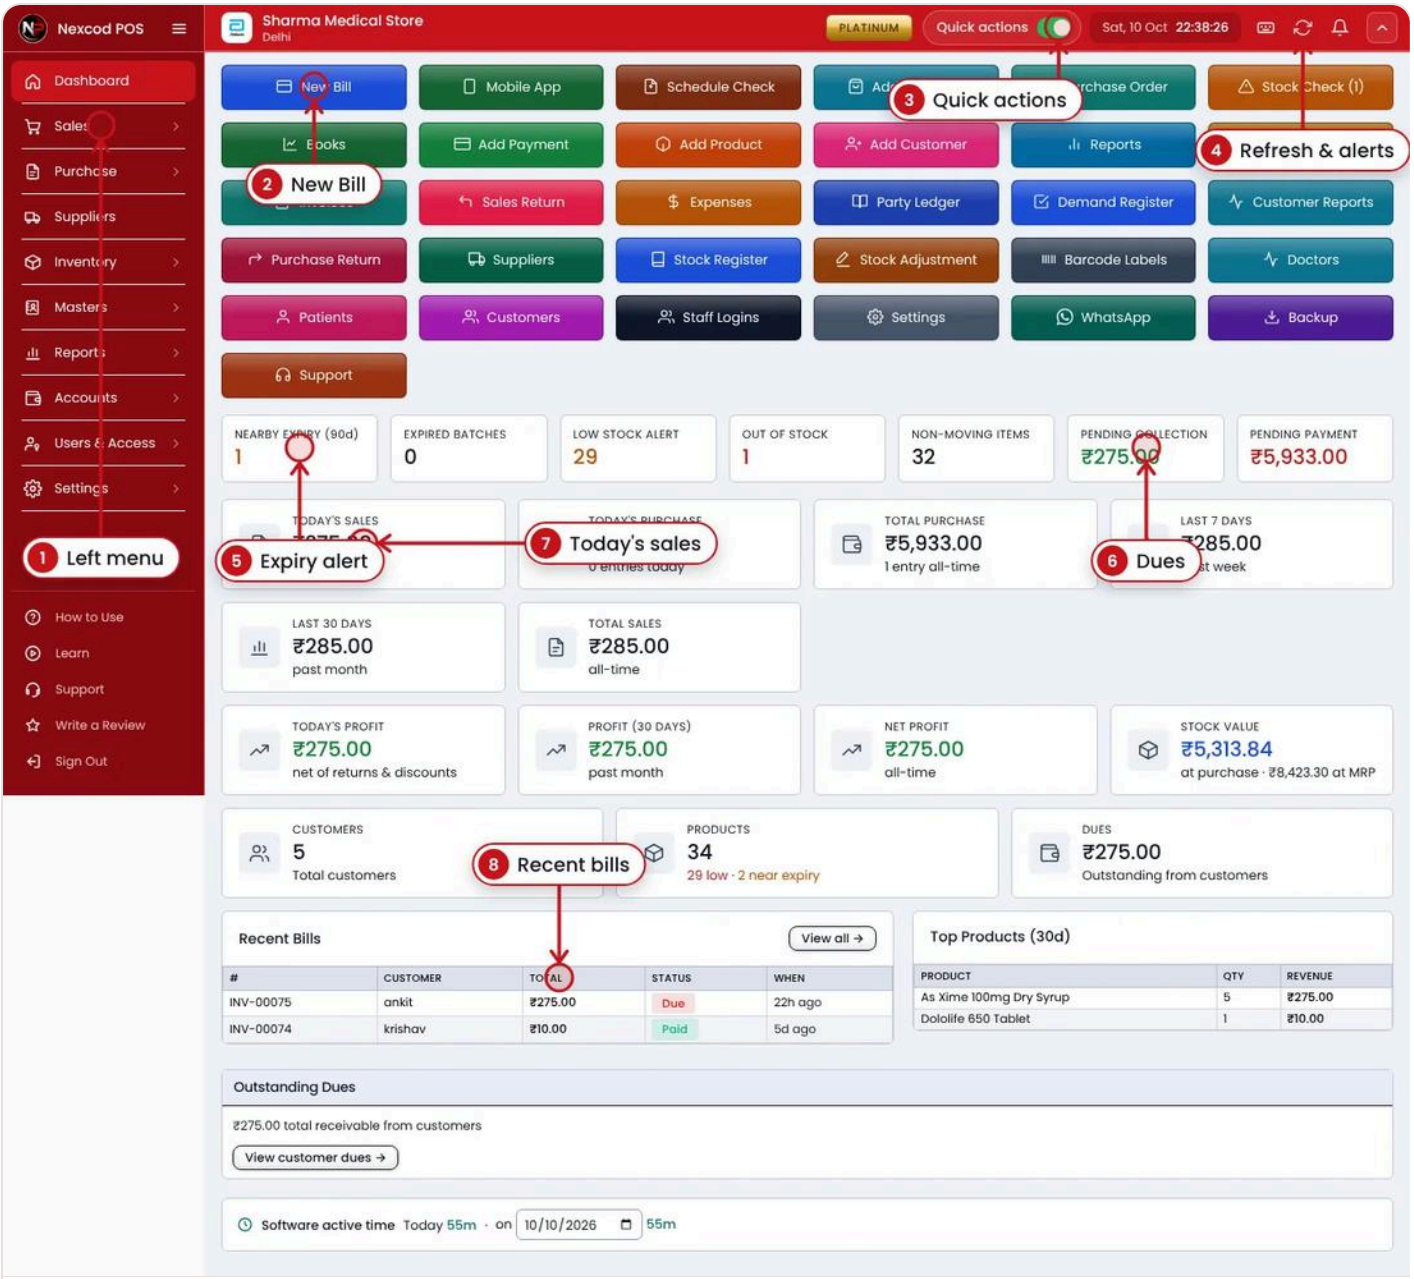

The menu colours, icon or plain style and screen brightness can be changed under `Settings › Store Settings › Interface`.

PART 2 · SELLING

MENU: DASHBOARD

Dashboard

The first screen after login. It answers three questions at a glance: what needs attention, how the day is going, and where to go next.

The full dashboard of the demo store.

1. Left menu: every section of the software, grouped (Sales, Purchase, Inventory, Masters, Reports, Accounts, Users & Access, Settings).
2. Quick-action buttons: one click opens a screen. New Bill starts a bill.
3. Quick actions switch: shows or hides the coloured buttons.
4. Keyboard shortcuts, refresh and notifications.
5. Alert strip: near expiry, expired, low stock, out of stock, non-moving, money to collect and to pay. Click a tile for its list.
6. Pending collection (customers owe you) and pending payment (you owe suppliers).
7. Business cards: today's sales, purchase, last 7 and 30 days, profit and stock value.
8. Recent bills with paid/due status; Top products of the last 30 days on the right.

1 · Quick-action buttons

31 coloured buttons that open a screen directly. They can be hidden with the **Quick actions** switch in the top bar.

New Bill · Mobile App · Schedule Check · Add Purchase · Purchase Order · Stock Check (count) · Books · Add Payment · Add Product · Add Customer · Reports · Inventory · Invoices · Sales Return · Expenses · Party Ledger · Demand Register · Customer Reports · Purchase Return · Suppliers · Stock Register · Stock Adjustment · Barcode Labels · Doctors · Patients · Customers · Staff Logins · Settings · WhatsApp · Backup · Support

Mobile App shows a link to install the Android app from Google Play. **Stock Check (1)** shows how many medicines have stock figures that disagree (see Stock Check).

2 · Alert strip

Seven tiles. Each opens the list behind it.

TILE	MEANING	OPENS
Nearby expiry (90d)	Batches that expire in the next 90 days	Near-Expiry Stock report
Expired batches	Batches already past expiry	Stock Register › Expired Stock
Low stock alert	Medicines at or below their alert level	Products, Low stock filter
Out of stock	Medicines with zero stock	Out of Stock report
Non-moving items	Medicines with no sale in the period	Non-Moving Stock report
Pending collection	Money customers owe the shop	Customer Outstanding report
Pending payment	Money the shop owes suppliers	Supplier Payables report

3 · Business cards

Today's Sales (with number of bills), Today's Purchase, Total Purchase, Last 7 Days, Last 30 Days, Total Sales, Today's Profit (net of returns and discounts), Profit (30 Days), Net Profit, Stock Value (at purchase cost and at MRP), Customers, Products (with low and near-expiry counts) and Dues. Each card opens its report.

4 · Lists at the bottom

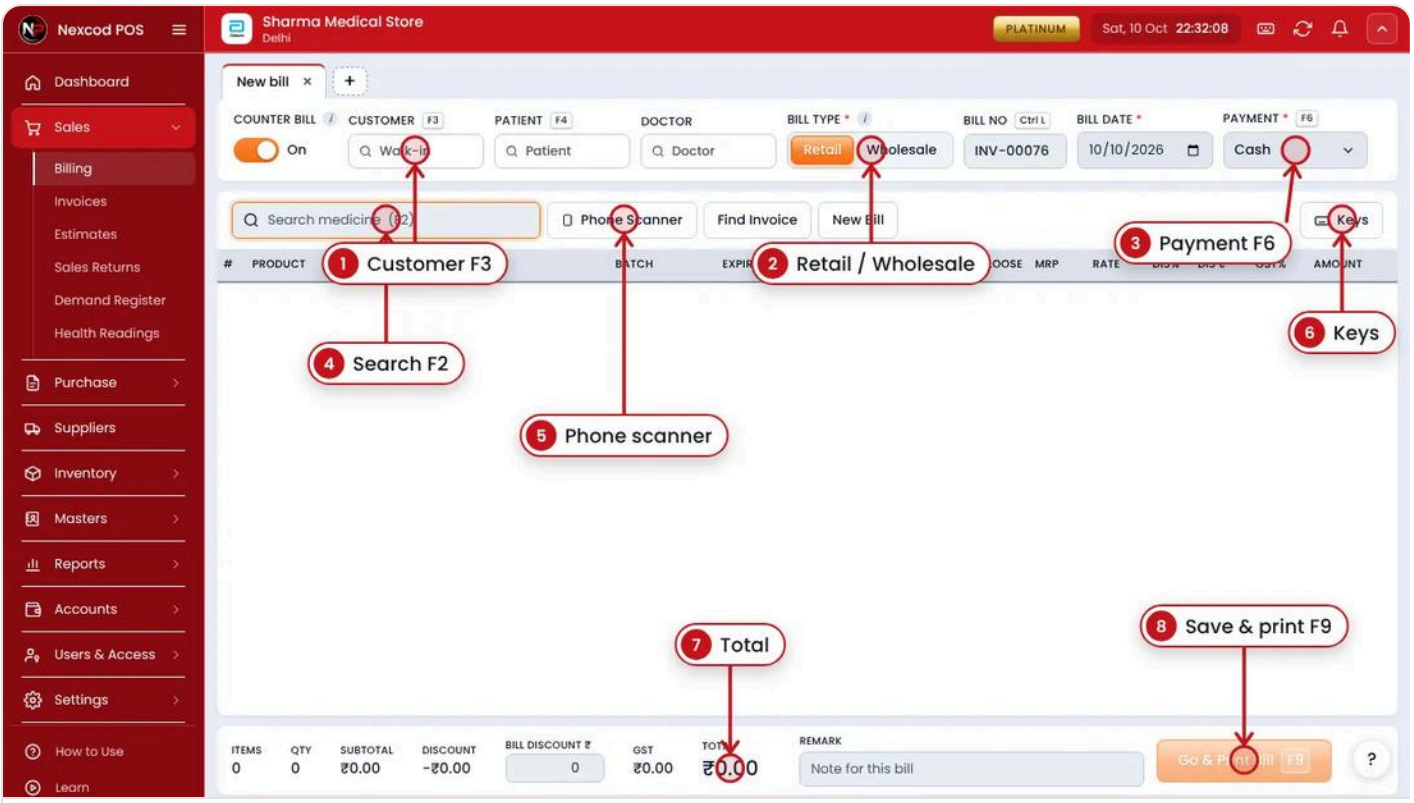

- **Recent Bills:** latest invoices with customer, total, Paid/Due status and how long ago. **View all** opens Invoices.
- **Top Products (30d):** best sellers with quantity and revenue.
- **Outstanding Dues:** total receivable, with **View customer dues**.
- **Software active time:** how long the software was in use today, or on a chosen date.

Which boxes a staff member sees on the dashboard is set per person in their role (Dashboard boxes permissions).

MENU: SALES › BILLING · SHORTCUT: NEW BILL

Billing (POS)

The counter screen. A bill is made by finding the medicine, choosing the batch and quantity, adding the customer when needed, and saving with the payment mode.

An empty bill. Nothing on the screen matters until a medicine is added.

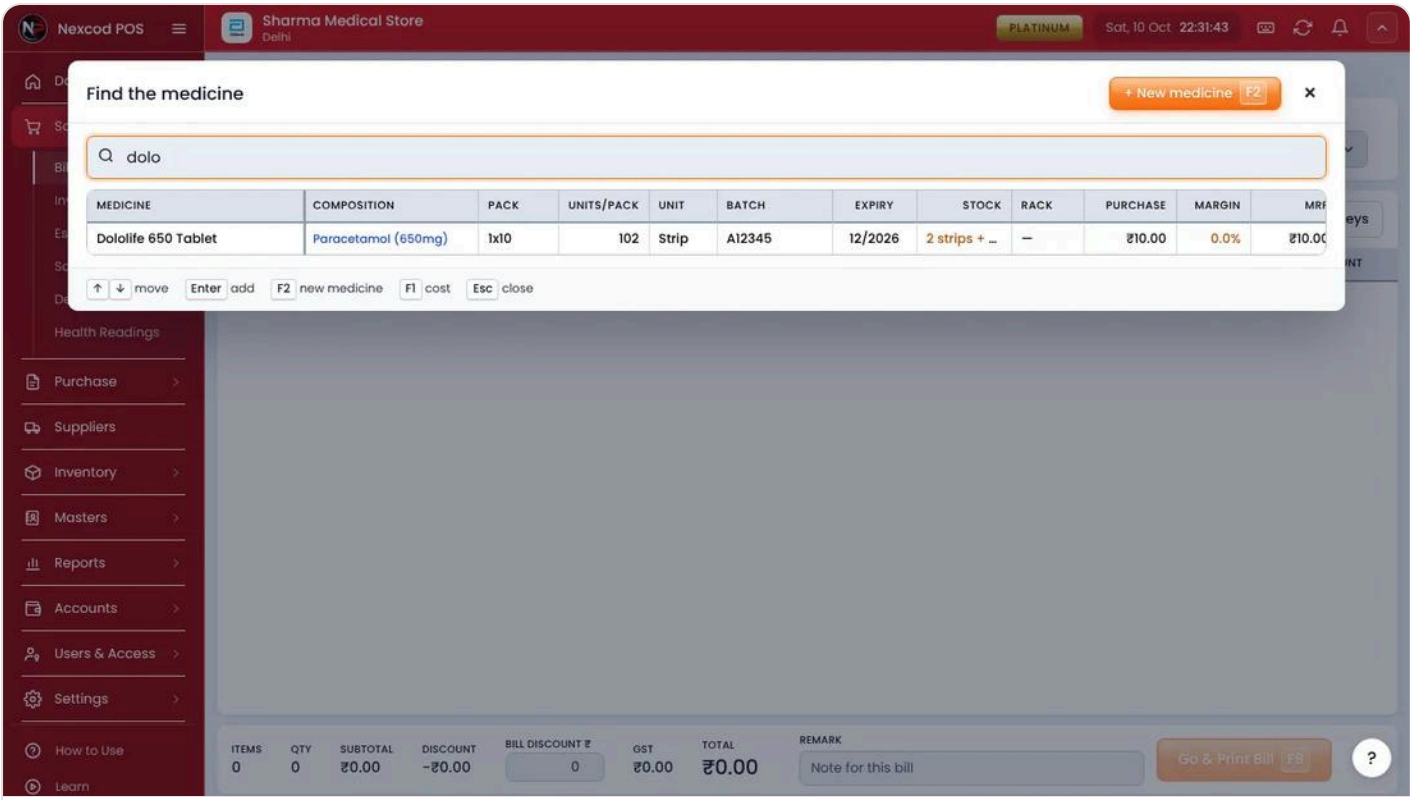

1. Customer (F3): walk-in by default, or pick a saved customer. Patient (F4) and Doctor sit beside it.
2. Bill type: Retail or Wholesale (wholesale adds buyer GSTIN, place of supply, e-way bill).
3. Payment mode (F6): Cash, UPI, Card, Bank, Split or Credit.
4. Search medicine (F2): name, salt or barcode.
5. Phone Scanner: use a phone camera as the barcode scanner.
6. Keys: the list of billing shortcuts.
7. Footer: items, quantity, subtotal, discount, bill discount, GST and total.
8. Go & Print Bill (F9): saves the bill, reduces stock and prints.

Parts of the screen

PART	WHAT IT DOES
Bill tabs	"New bill ×" and the **+** tab. Up to five bills can be open at once (for example while one customer fetches money). `F8` moves to the next bill, `Shift` + `F8` opens a new one.
Counter Bill	On by default for quick walk-in counter billing.
Customer `F3`	"Walk-in" unless a customer is chosen. Opens the customer window.
Patient `F4`	The patient the medicine is for (needed for Schedule H/H1/X).
Doctor	The prescribing doctor.
Bill type	**Retail** or **Wholesale** (see below).
Bill No `Ctrl` + `L`	The next number, e.g. INV-00076. `Ctrl` + `L` switches between a bill and a challan.
Bill date	Today by default.
Payment `F6`	Payment mode and amount (Cash by default).
Search medicine `F2`	Name, brand, salt/composition or barcode.
Phone Scanner	Pairs a phone camera as the barcode scanner.
Find Invoice	Opens a saved bill.
New Bill / Hold / Save as Estimate / Clear	Start a new bill, park this one, save it as a price quote, or empty it (asks "Clear this bill?" first).
Keys	Shows the billing shortcuts.
Bill lines	#, Product, Batch, Expiry, Unit, Pack, Qty (pack / loose), MRP, Rate, Dis%, Dis ₹, GST%, Amount, and × to remove.
Footer	Items, Qty, Subtotal, Discount, **Bill discount ₹**, GST, **Total**, Remark, and **Go & Print Bill** `F9`.

Make a bill, step by step

1. **Find the medicine.** Type two or three letters, or scan the barcode. The **Find the medicine** window lists matches with composition, pack, units per pack, unit, batch, expiry, stock, rack, purchase rate, margin and MRP. Use `↑` `↓` and `Enter`. `F2` here adds a new medicine without leaving the bill.
2. **Pick the batch.** If the medicine has more than one batch, a box opens listing each batch with its expiry, quantity left and its own MRP. Pick the batch in your hand. With only one batch, it is added directly.
3. **Enter the quantity.** The Qty column has two boxes: full packs and loose pieces. Giving one strip and five tablets from a strip of 10? Enter 1 and 5. Below the boxes the screen shows the balance left, e.g. "bal 1 strip + 33 tabs".
4. **Check rate and discount.** Change the rate, Dis% or Dis ₹ on any line if needed. A rate above MRP is flagged in red ("above MRP").
5. **Customer details (optional).** Leave it as walk-in, or press `F3` to choose a customer, patient and doctor. For a Schedule H, H1 or X medicine the bill asks for the patient's name, mobile number and doctor before it will save.
6. **Payment.** Press `F6`, choose the mode and the amount received; the balance due is worked out.
7. **Save and print.** Press **Go & Print Bill** or `F9`. Stock comes off the chosen batch, the bill prints, and it goes to the customer on WhatsApp if the number is saved and WhatsApp is linked.

The Find the medicine window. The footer lists the keys: arrows to move, Enter to add, F2 new medicine, F1 cost, Esc to close.

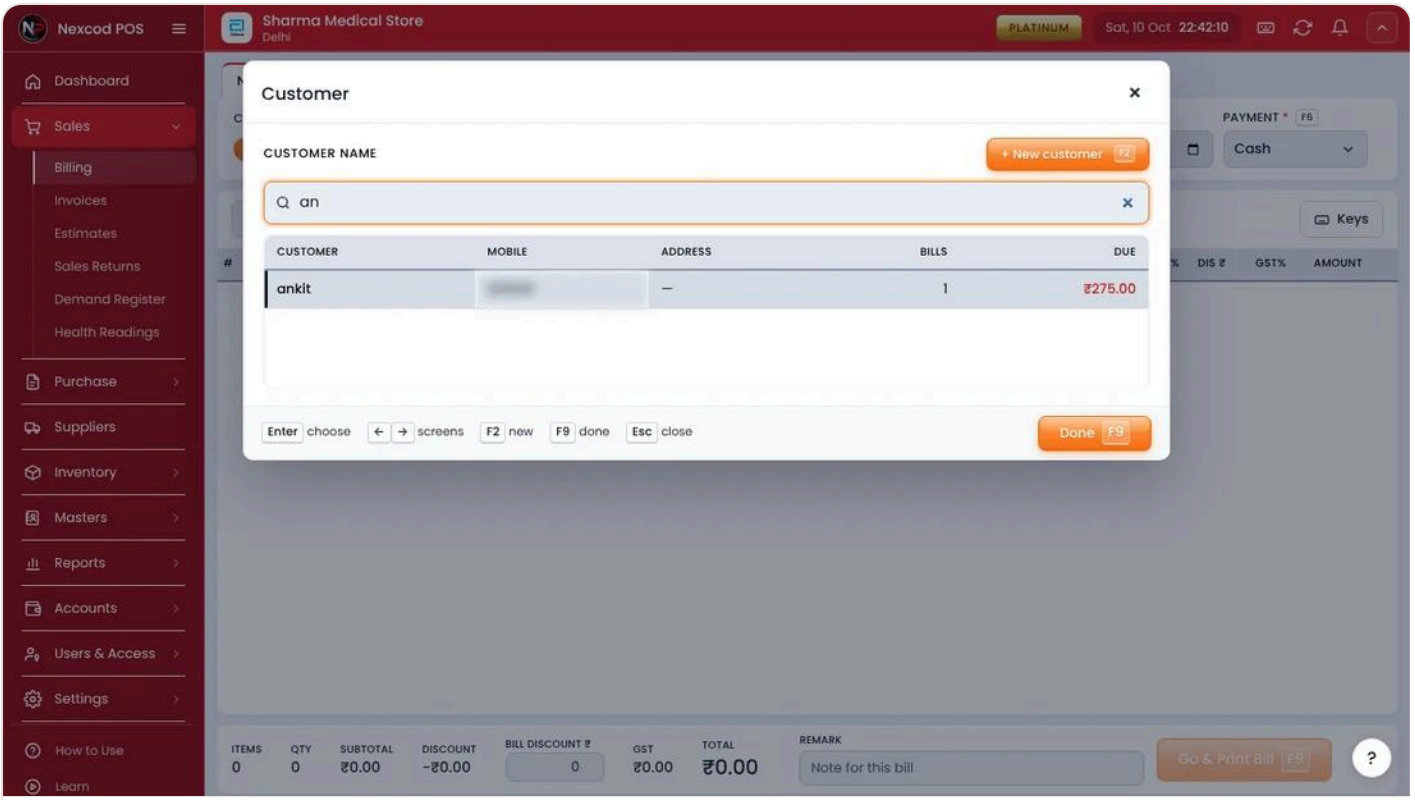

A bill with four lines (not saved). Rates above MRP are flagged in red under the rate box.

1. Batch chosen for this line, with its expiry beside it.
2. Qty, pack box: full strips or packs.
3. Qty, loose box: single tablets. The line below shows the balance left.
4. A rate above MRP is flagged in red.
5. Hold parks this bill; Save as Estimate makes a quote; Clear empties the bill.
6. × removes the line (Ctrl+Del).
7. Totals update as lines are added.

Loose tablets and strips

- Prices are always for the **full pack** (one strip, one bottle). The per-tablet price is worked out from the pack price and the "units per pack" of the medicine.
- Stock is counted in packs. Selling 5 tablets from a strip of 15 reduces stock by 0.33 of a strip. A stock of "2 strips + 33 tabs" is correct, not an error.
- A medicine whose tablets-per-strip is missing can only be sold as a whole pack until it is filled in (see the Pack size tab in Products).

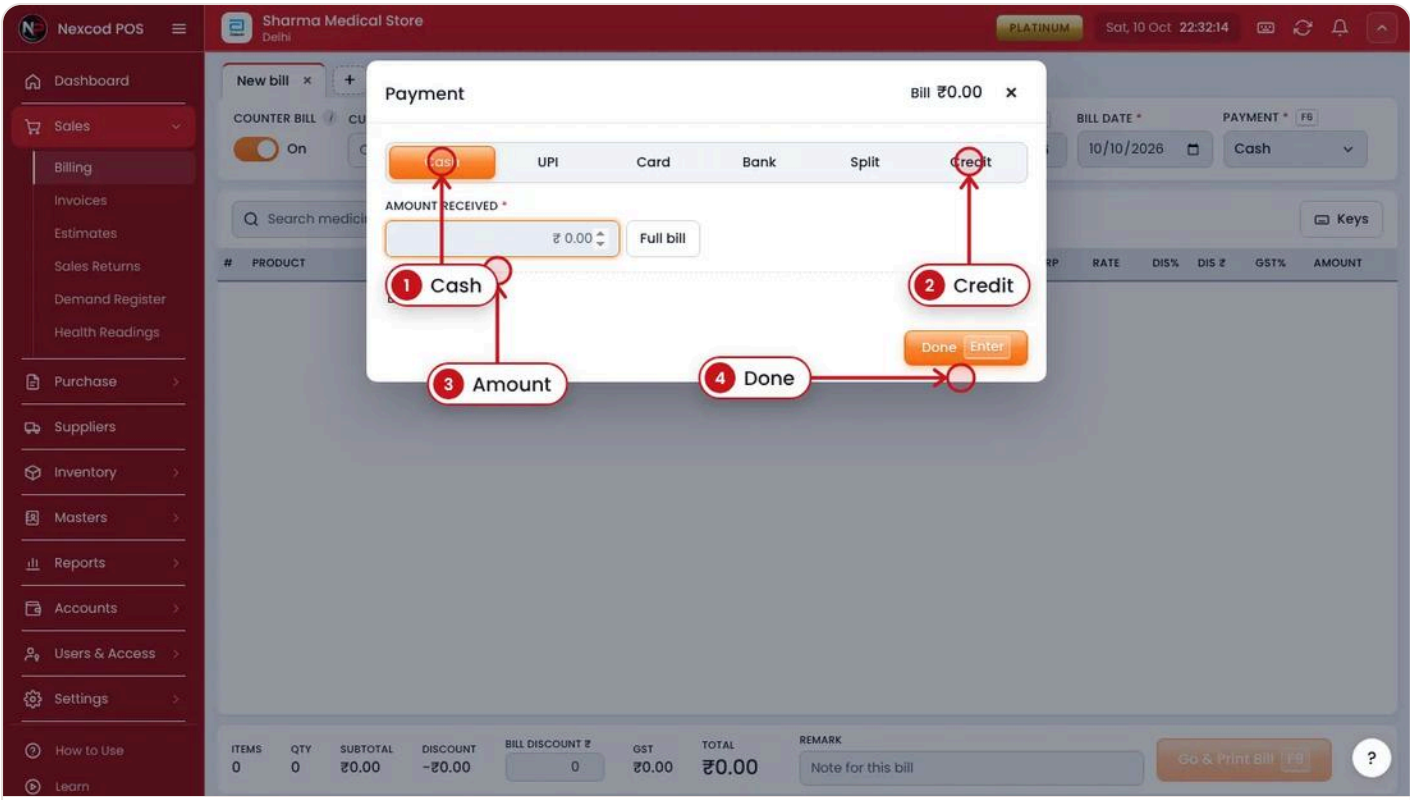

Customer window F3

Type a name or phone. Each match shows mobile, address, number of bills and amount due.

Use ← → to move between the Customer, Patient and Doctor screens of this window, F2 to add a new one, F9 when done and Esc to close. If the customer has a credit limit, the counter shows what they would owe against it.

Payment F6

The payment window.

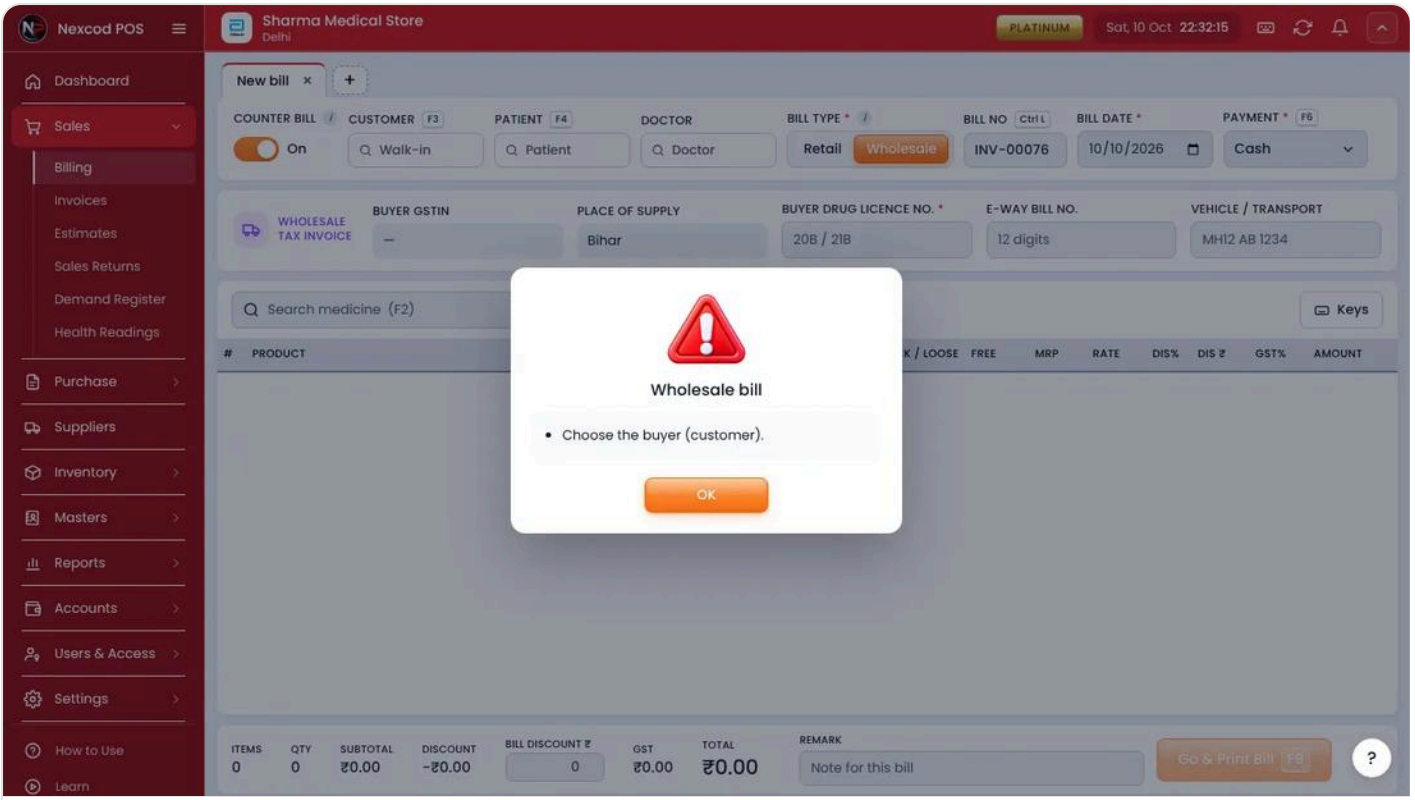

1. Payment modes: Cash, UPI, Card, Bank, Split (several modes) and Credit (due).
2. Credit puts the amount on the customer's account.
3. Amount received. Full bill fills the whole amount.
4. Done (Enter) confirms the payment.

MODE	USE IT WHEN
Cash	Paid in cash. Enter the amount received, or press **Full bill**.
UPI / Card / Bank	Paid digitally. If a UPI ID is set in Settings, every bill prints a Scan-and-Pay QR with the bill amount.
Split	Part cash, part UPI, part card. The split is recorded, not rounded into one mode.
Credit	Bill on credit (due). The amount goes onto the customer's account to be collected later.

Retail and wholesale bills

Switch **Bill type** to **Wholesale** for a sale to another business. A wholesale tax invoice adds Buyer GSTIN, Place of supply, Buyer drug licence no., E-way bill no. and Vehicle /

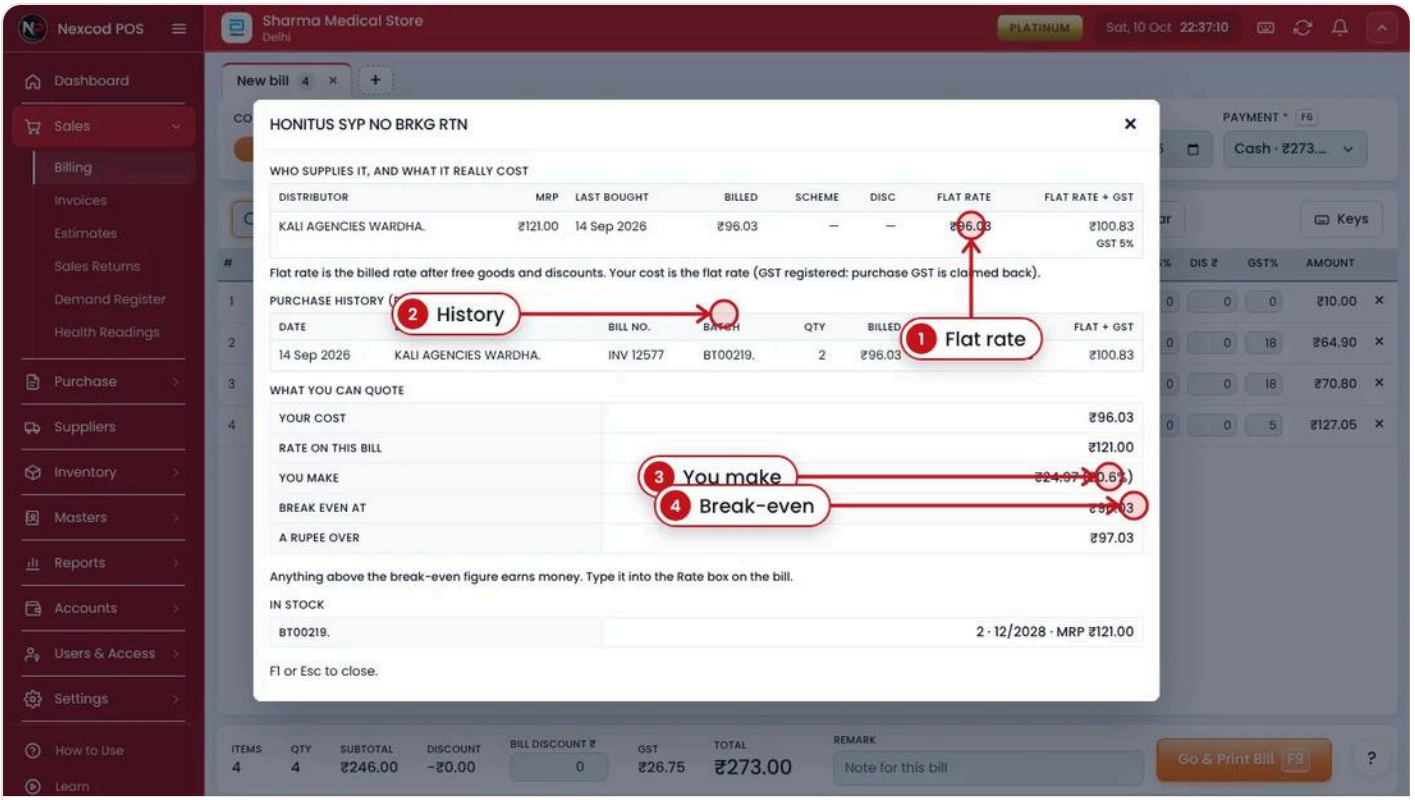

transport, and a Free quantity column. The buyer (customer) must be chosen first. Trade rates set on medicines take over from counter prices.

Wholesale mode, with the reminder to choose the buyer.

Rate desk `F1`: what a medicine really cost

With a medicine on the bill, press `F1`. The rate desk shows who supplies it and what it really cost: MRP, last bought date, billed rate, scheme, discount, flat rate and flat rate plus GST; the purchase history bill by bill; and **What you can quote**: your cost, the rate on this bill, what you make, the break-even price and a rupee over. It also lists stock by batch.

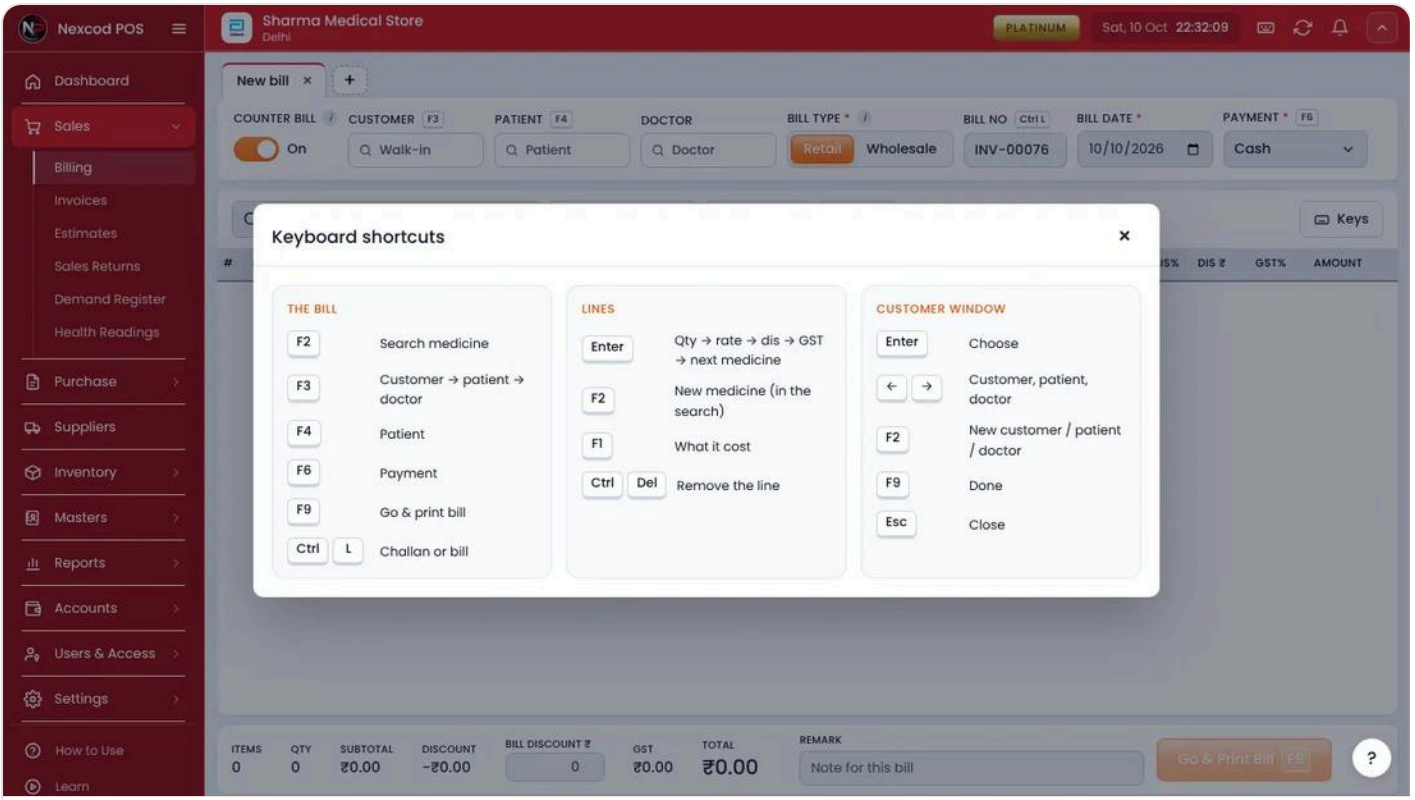

The rate desk. Anything above the break-even figure earns money.

1. Flat rate: what the medicine really cost after scheme and discount, per distributor.
2. Purchase history: every purchase with date, bill, batch and rates.
3. What you make at the rate on this bill.
4. Break-even: the lowest price that loses no money; a rupee over is shown too.

Hold, estimates and challans

- **Hold** parks the bill so the next customer can be served; reopen it from its tab.
- **Save as Estimate** saves the cart as a price quote. No stock moves and no bill number is used. Convert it later from Estimates.
- **Challan**: `Ctrl` + `L` on Billing makes a delivery challan instead of a bill.

Billing shortcuts

Press Keys (or ?) for this list.

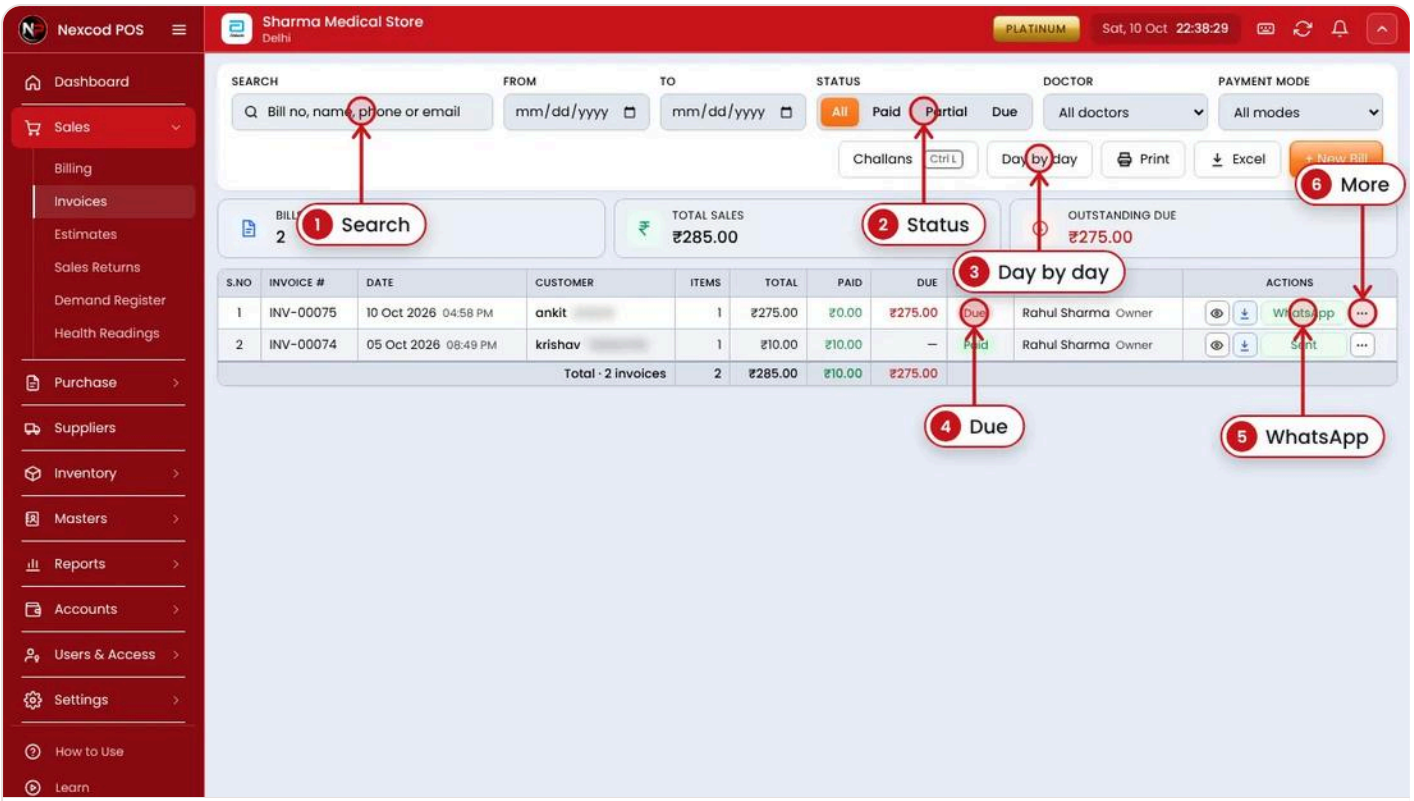

See the full list in Keyboard shortcuts.

> COUNTER RULES THAT AFFECT BILLING
>
> Settings › Store Settings › Counter rules can block expired medicines, lines with no price, bills over the stock you have, and credit bills past a customer's limit. It also decides whether selling prices include GST (MRP billing).

MENU: SALES › INVOICES

Invoices

Every saved bill, with filters and totals.

The invoice list.

1. Search by bill number, name, phone or e-mail; date range.
2. Filter by status (Paid, Partial, Due), doctor and payment mode.
3. Challans, Day by day totals, Print and Excel.
4. Status of each bill.
5. Send the bill on WhatsApp; it shows Sent once sent.
6. ⋯ more actions; eye to view, arrow to download PDF.

- **Filters:** Search (bill number, name, phone or e-mail), From and To dates, Status (All, Paid, Partial, Due), Doctor, Payment mode (Cash, UPI, Card, Online, Credit / Due, Split). Press **Apply**.
- **Buttons:** Challans (`Ctrl` + `L` shows challans), Day by day (totals per day), Print (a clean printed list), Excel (download), **+ New Bill**.
- **Totals:** number of bills, total sales and outstanding due for the filter.
- **Columns:** S.No, Invoice #, Date, Customer, Items, Total, Paid, Due, Status, Created by, Actions.

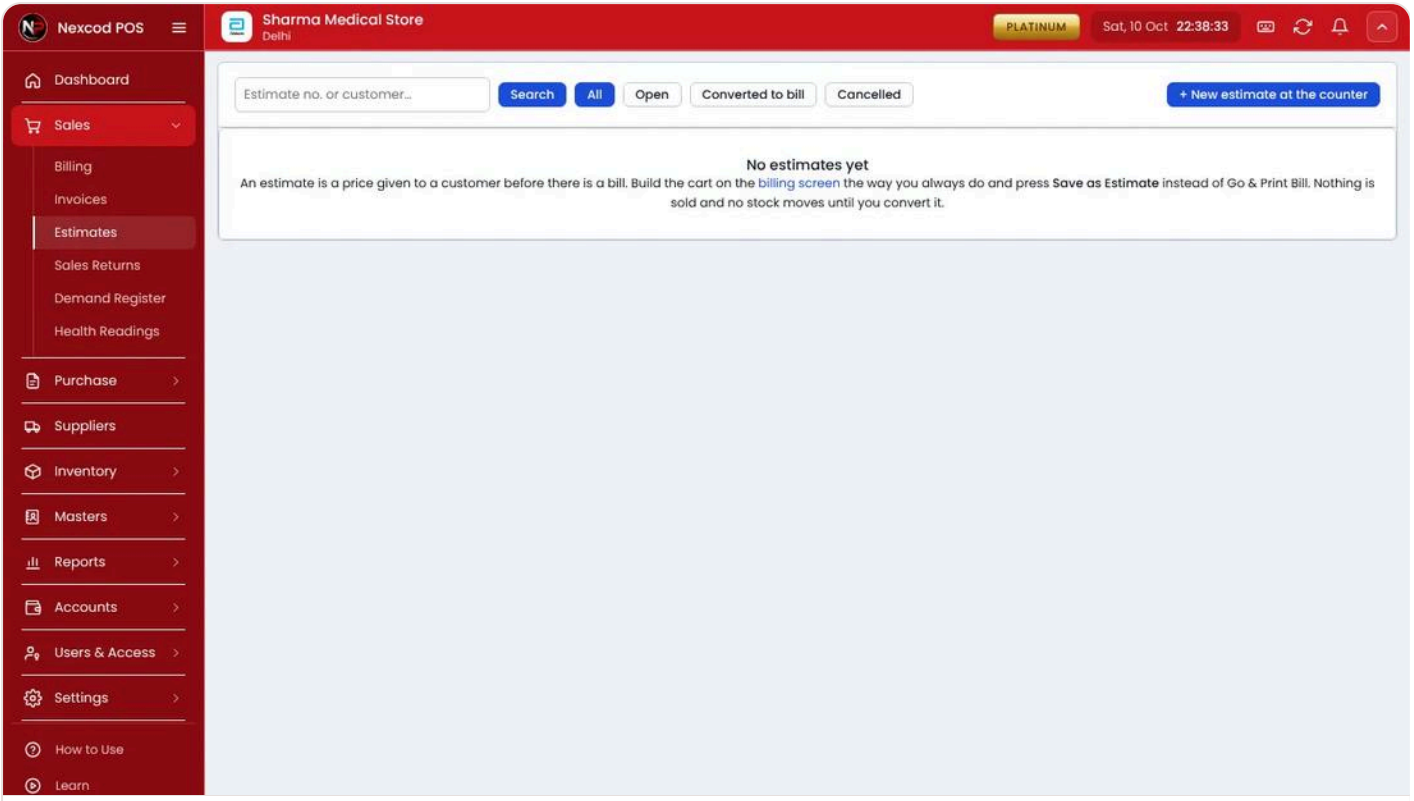

- **Actions on a bill:** view (eye), download PDF, send on WhatsApp (shows "Sent" once sent), and the ⋯ menu for more (edit, delete, mark paid, e-mail, depending on permissions).

MENU: SALES › ESTIMATES

Estimates

A price given to a customer before there is a bill. Build the cart on the billing screen as usual and press **Save as Estimate** instead of Go & Print Bill. Nothing is sold and no stock moves until it is converted to a bill.

Filters: All, Open, Converted to bill, Cancelled. Search by estimate number or customer. **+ New estimate at the counter** opens Billing.

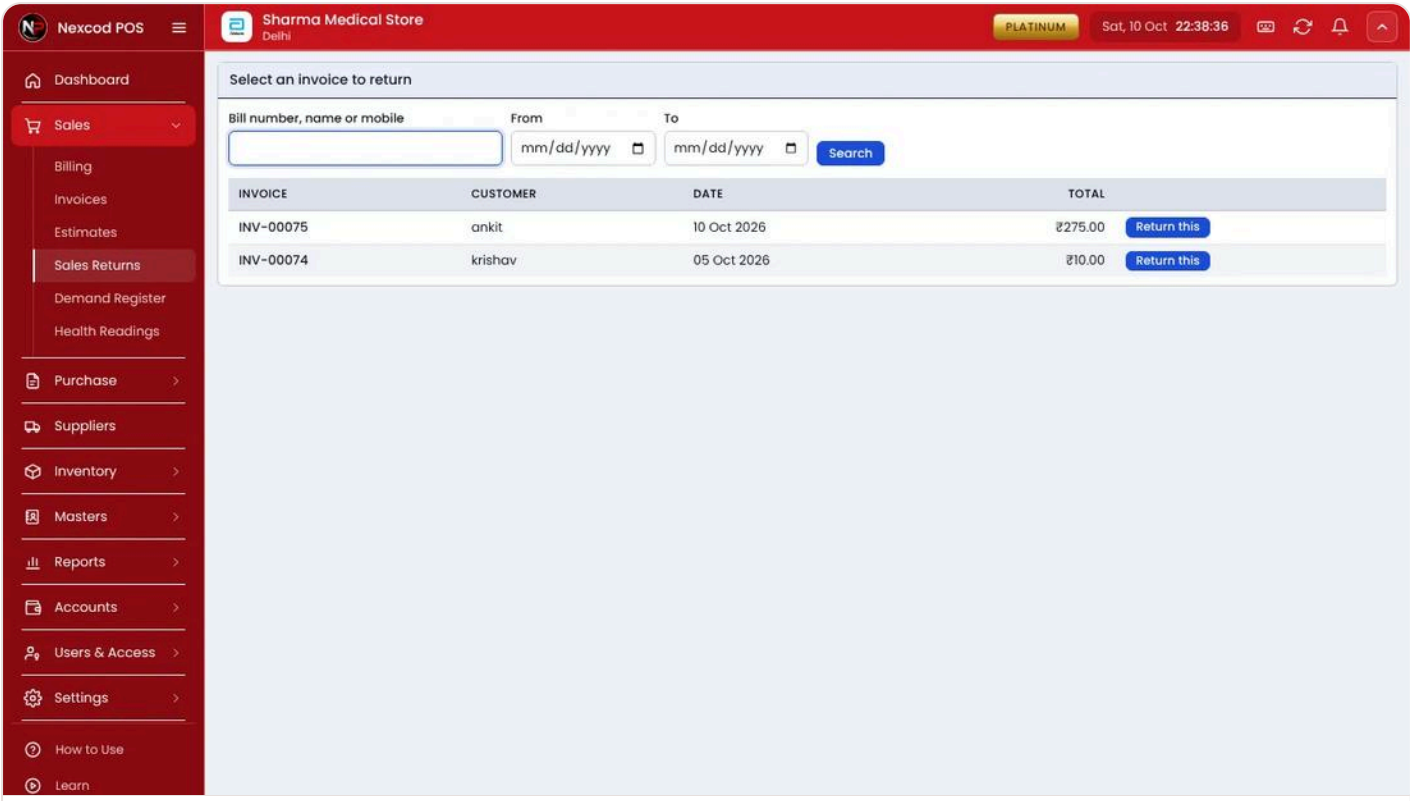

Estimates (none yet in the demo store).

MENU: SALES › SALES RETURNS

Sales Returns

Take back goods a customer bought. The page shows total returns and return value, with a search by customer or bill number.

1. Press **+ New Return**. Find the invoice by bill number, name or mobile and dates, then press **Return this**.
2. Tick the items and enter the return quantity. You can never return more than is left on the bill; a fully returned bill shows FULLY RETURNED.
3. Save. Stock goes back onto the batch it came from and a credit note is raised. If the customer had paid, the amount becomes store credit for their next bill.

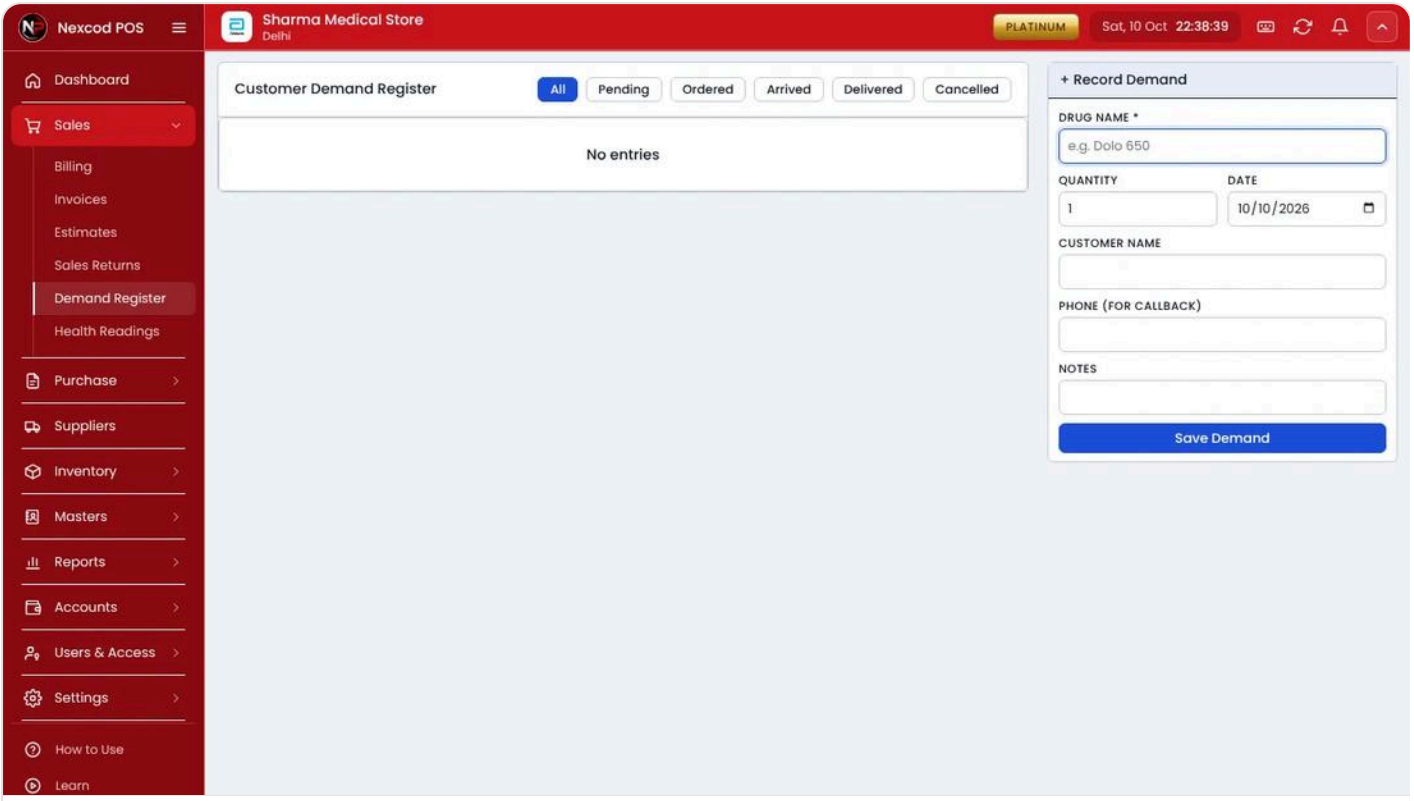

Choosing the invoice to return.

MENU: SALES › DEMAND REGISTER

Demand Register

When a customer asks for something the shop does not have, note it here so the next order includes it and the customer can be called back.

+ Record Demand fields: Drug name (required), Quantity, Date, Customer name, Phone (for callback), Notes. Each entry moves through the statuses **Pending, Ordered, Arrived, Delivered, Cancelled**, which are also the filters.

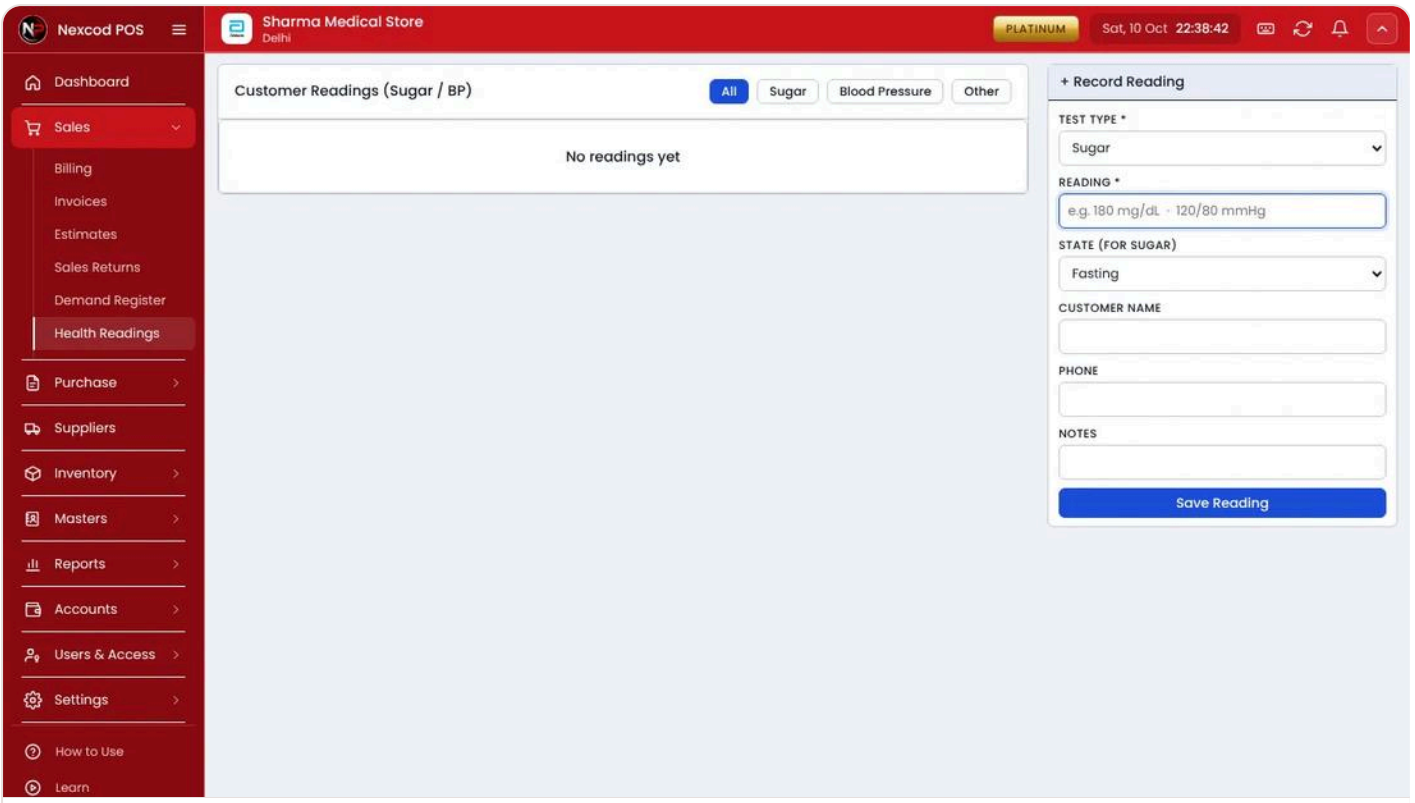

The demand register.

MENU: SALES › HEALTH READINGS · DASHBOARD: CUSTOMER REPORTS

Health Readings

For shops that check sugar or blood pressure at the counter. **+ Record Reading**: Test type (Sugar, Blood Pressure, Other), Reading (e.g. 180 mg/dL or 120/80 mmHg), State for sugar (Fasting, Post-meal, Random), Customer name, Phone, Notes. Filter by All, Sugar, Blood Pressure or Other.

Customer readings (sugar / BP).

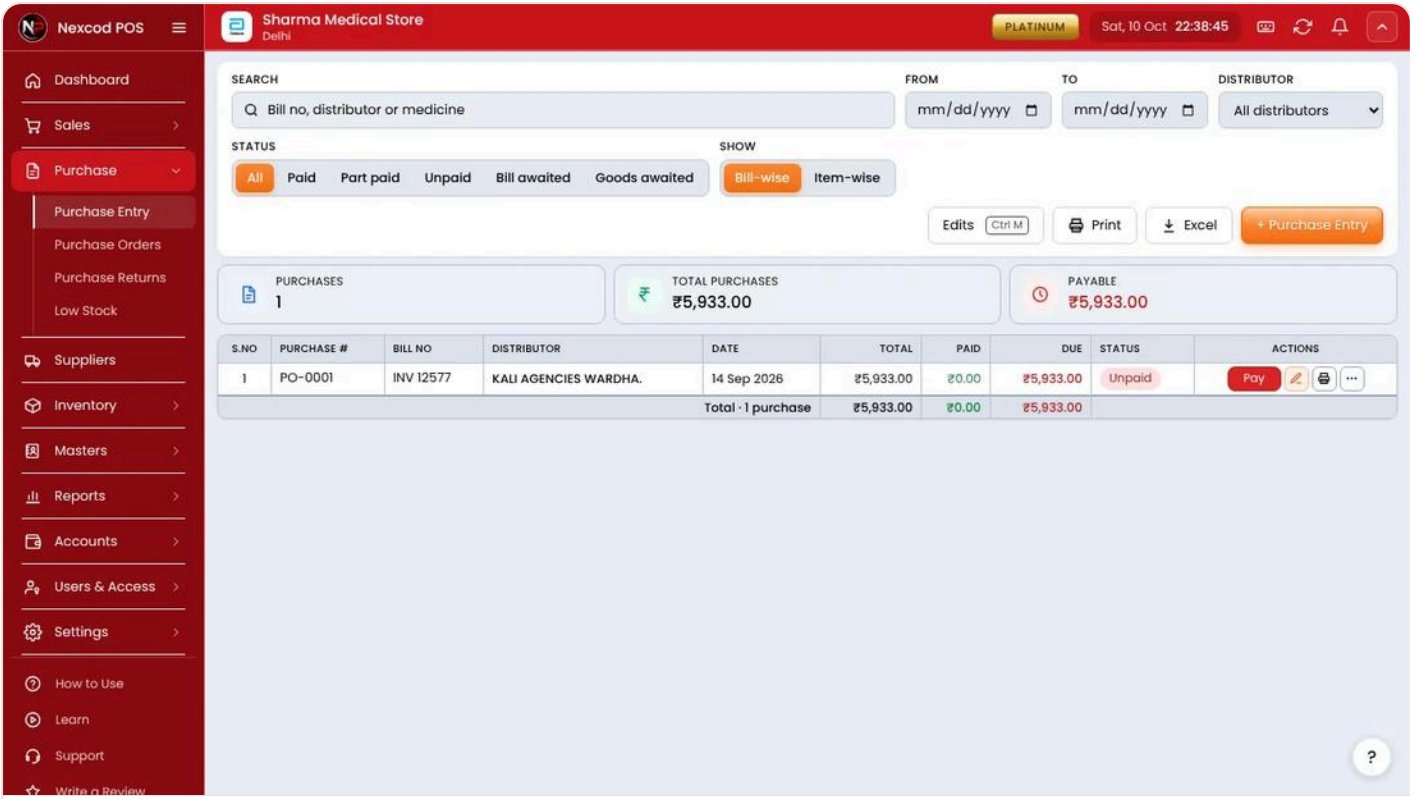

PART 3 · BUYING

MENU: PURCHASE › PURCHASE ENTRY · DASHBOARD: ADD PURCHASE

Purchase Entry

Enter the distributor's bill. Every line adds stock and creates the batch, so billing later picks the right expiry and MRP by itself.

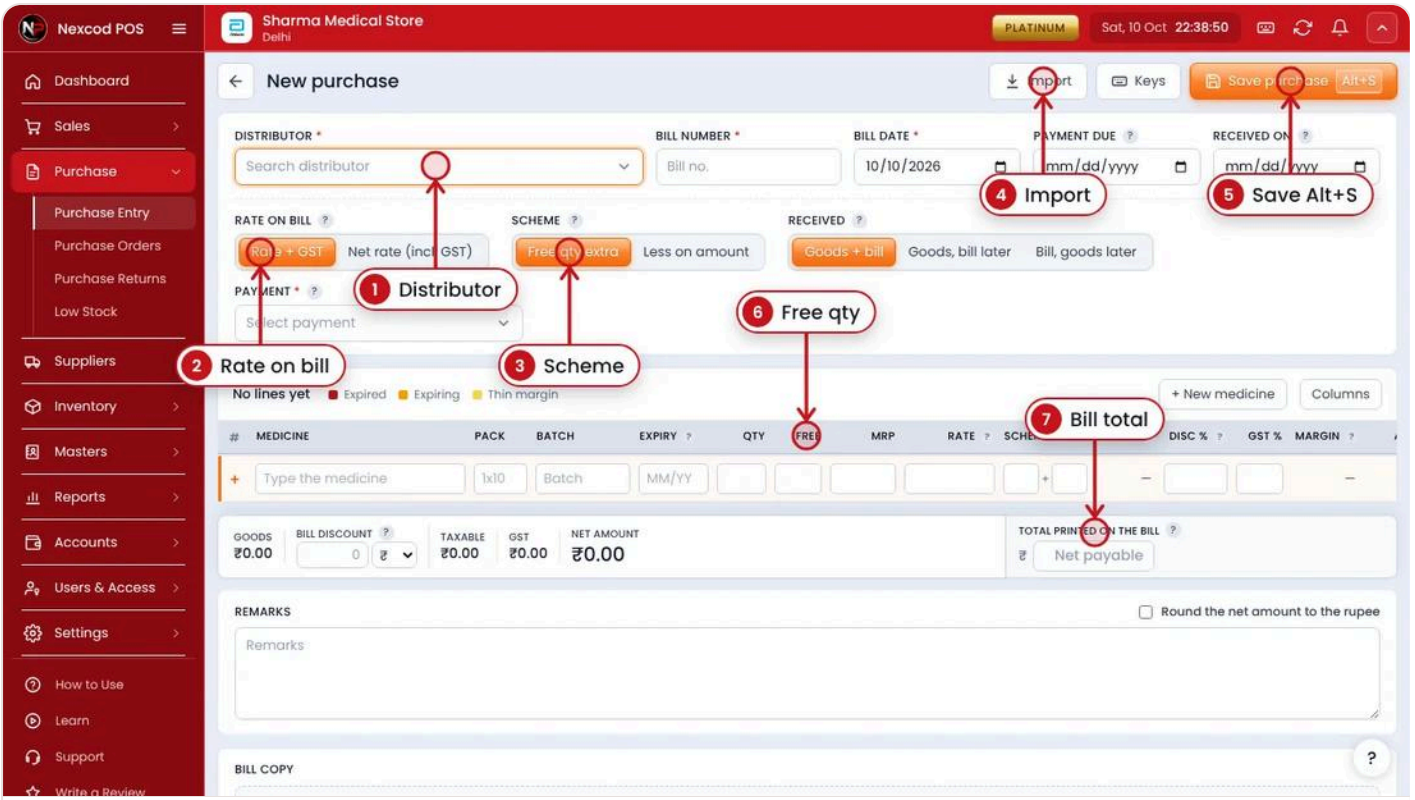

The purchase list

All purchase entries.

Filters: Search (bill number, distributor or medicine), From, To, Distributor, Status (All, Paid, Part paid, Unpaid, Bill awaited, Goods awaited), Show (Bill-wise or Item-wise). Totals show purchases, total value and payable. **Edits** (`Ctrl` + `M`) shows which entries were edited. Each row has **Pay** to record a payment to the supplier.

A new purchase

New purchase. The orange line is the one being typed.

1. Distributor (Space/Enter to search, F2 to add new).
2. Rate on bill: Rate + GST, or Net rate including GST.
3. Scheme: Free qty extra, or Less on amount.
4. Import: fill the lines from Excel or a photo/PDF of the bill.
5. Save purchase (Alt+S).
6. Free column for scheme goods.
7. Total printed on the bill: the entry is checked against it.

BOX	WHAT IT MEANS
Distributor	Choose first. Press Space or Enter to search, `F2` to add a new one. Their last bill sets how this one is read.
Bill number, Bill date	As printed on the distributor's bill.
Payment due, Received on	When payment is due, and when the goods arrived.
Rate on bill	**Rate + GST** (GST in its own column) or **Net rate (incl. GST)**. Read it off the paper.
Scheme	**Free qty extra** (most distributors: the bill charges Qty × Rate and free goods come on top) or **Less on amount** (the scheme also comes off the money).
Received	**Goods + bill**, **Goods, bill later**, or **Bill, goods later**.
Payment	How it is paid (or credit). A setting can start every entry on Credit.
Line columns	Medicine, Pack, Batch, Expiry, Qty, Free, MRP, Rate, Scheme, Sch %, Disc %, GST %, Margin, Amount. Lines are coloured Expired, Expiring or Thin margin. **Columns** chooses which show.
Totals	Goods, Bill discount (₹ or %), Taxable, GST, Net amount.
Total printed on the bill	Type the distributor's total. The entry is checked against it; a few paise of rounding is carried as round off, anything bigger is a line to look at.
Remarks, Round off, Bill copy	Notes, rounding to the rupee, and attaching the bill PDF or photo (up to 12 MB).

1. Choose the distributor and type the bill number and date.
2. Answer **Rate on bill** and **Scheme** from the paper. If these are wrong, every line is wrong by the same amount.
3. On the orange line type the medicine and pick it, then fill across with `Enter`. The last `Enter` adds the line and a fresh orange line waits. **+ New medicine** opens the full item form without leaving the bill.

4. Put free goods in **Free**. Their cost is spread over all the strips, so a free strip never shows as pure profit.
5. Type the **Total printed on the bill** and fix any line the check points to. Never force a total with a discount.
6. Press **Save purchase** (`Alt` + `S`). Stock and batches are created.

> IMPORT INSTEAD OF TYPING
>
> **Import** fills the lines from an Excel sheet or from a photo or PDF of the bill. Nothing is saved until every line is checked and Save is pressed.

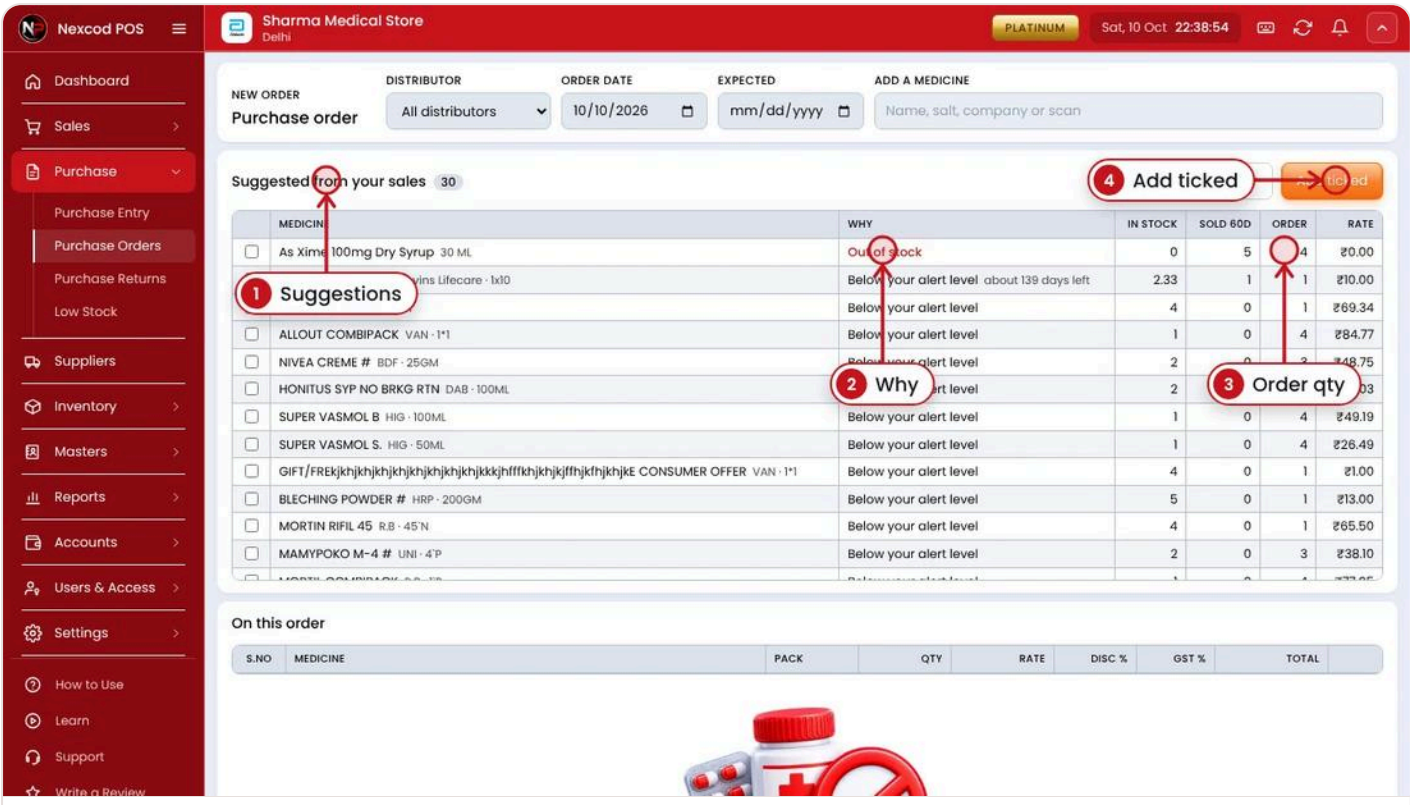

MENU: PURCHASE › PURCHASE ORDERS · DASHBOARD: PURCHASE ORDER

Purchase Orders

Orders sent to suppliers. They never change stock; stock goes up only when the goods arrive and the order is received into a purchase entry.

The list filters by Search, dates, Distributor and Status (Draft, Sent, Part received, Received, Cancelled), with totals for orders, order value and awaiting goods.

A new purchase order

The software suggests what to order from the shop's own sales.

1. Suggested from your sales: what has run out or is below its alert level.
2. Why each medicine is suggested.
3. Suggested order quantity, editable.
4. Tick medicines and press Add ticked (or Select all).

1. Choose the distributor, order date and expected date.
2. Review **Suggested from your sales**: each medicine shows why (Out of stock, Below your alert level, days of stock left), stock now, sold in 60 days, suggested order

quantity and rate. Tick and press **Add ticked**, or **Select all**.

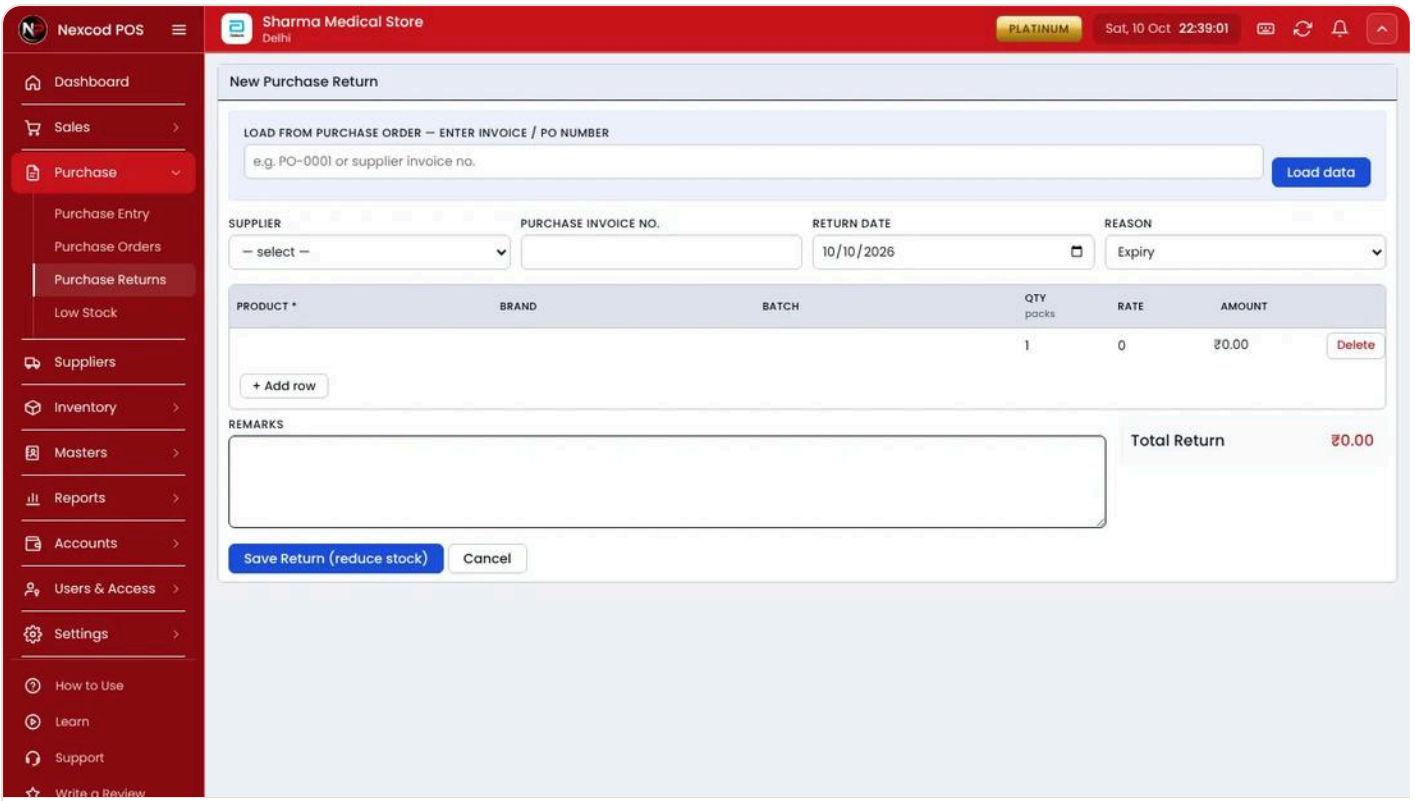

3. Adjust the lines under **On this order** (Qty, Rate, Disc %, GST %) and add a note for the distributor.

4. Press **Save as draft** or **Save & mark as sent**.

MENU: PURCHASE › PURCHASE RETURNS

Purchase Returns

Return goods to a distributor. A debit note is raised and the amount comes off what the shop owes. The list filters by supplier and reason.

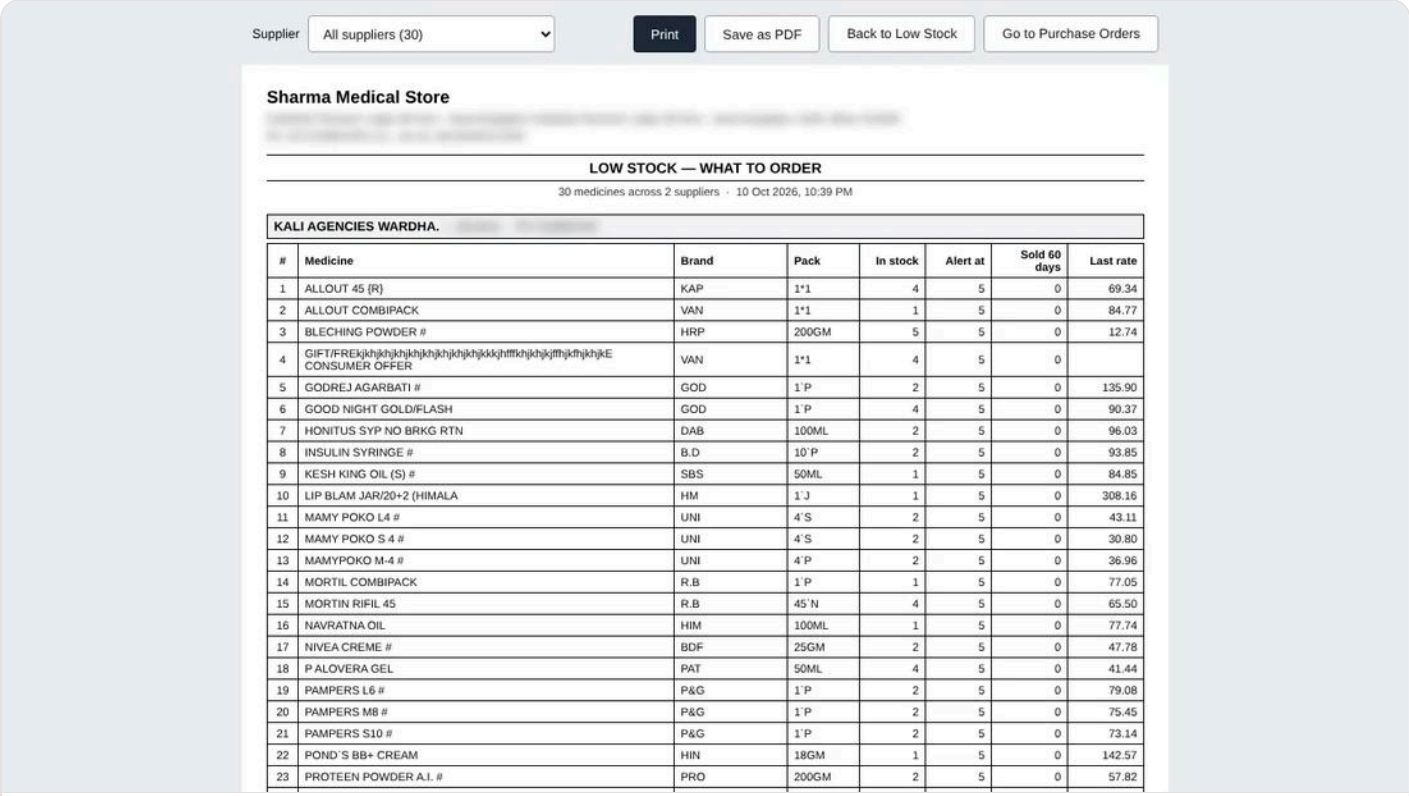

New purchase return.

1. Press **+ New Return**. Enter the purchase invoice or PO number and press **Load data** to fill the lines, or pick the supplier and add rows by hand.
2. Set Purchase invoice no., Return date and Reason: Expiry, Damaged Product, Wrong Product, Excess Stock or Other.
3. Delete the rows not being returned (partial return). Each row has Product, Brand, Batch, Qty (packs), Rate, Amount.
4. Press **Save Return (reduce stock)**. A second return of the same bill is blocked so stock is never reduced twice.

MENU: PURCHASE › LOW STOCK

Low Stock: what to order

A printable order sheet of every medicine at or below its alert level, grouped by supplier with the supplier's phone. Columns: Medicine, Brand, Pack, In stock, Alert at, Sold 60 days, Last rate. Filter by supplier, then **Print** or **Save as PDF**, or go to Purchase Orders.

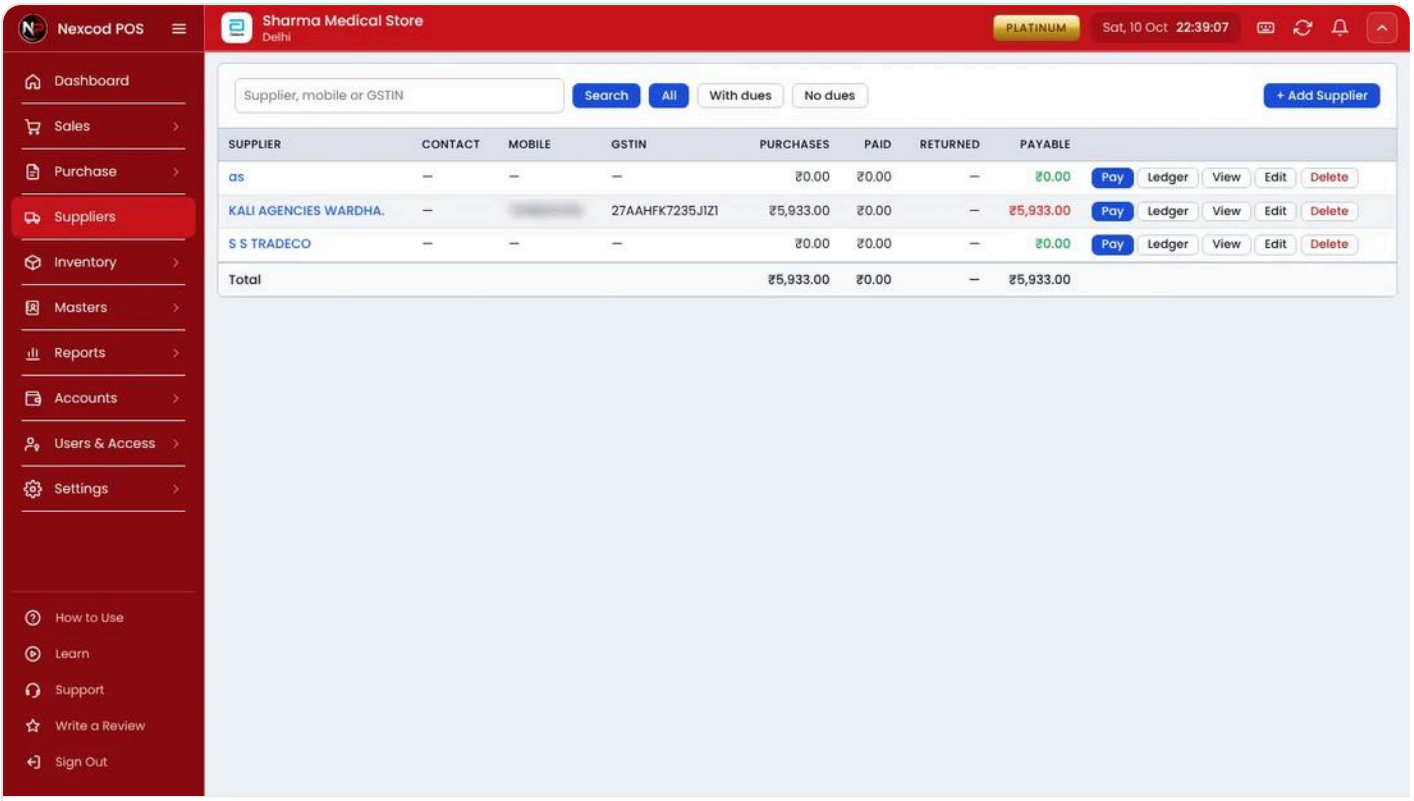

#	Medicine	Brand	Pack	In stock	Alert at	Sold 60 days	Last rate
1	ALLOUT 45 {R}	KAP	1*1	4	5	0	69.34
2	ALLOUT COMBIPACK	VAN	1*1	1	5	0	84.77
3	BLECHING POWDER #	HRP	200GM	5	5	0	12.74
4	GIFT/FREkjkhjkhjkhjkhjkhjkhjkhjkhjkkkjhffffkhjkhjkjffhjkfhjkhjkE CONSUMER OFFER	VAN	1*1	4	5	0

23	PROTEEN POWDER A.I. #	PRO	200GM	2	5	0	57.82

Low stock, what to order.

MENU: SUPPLIERS

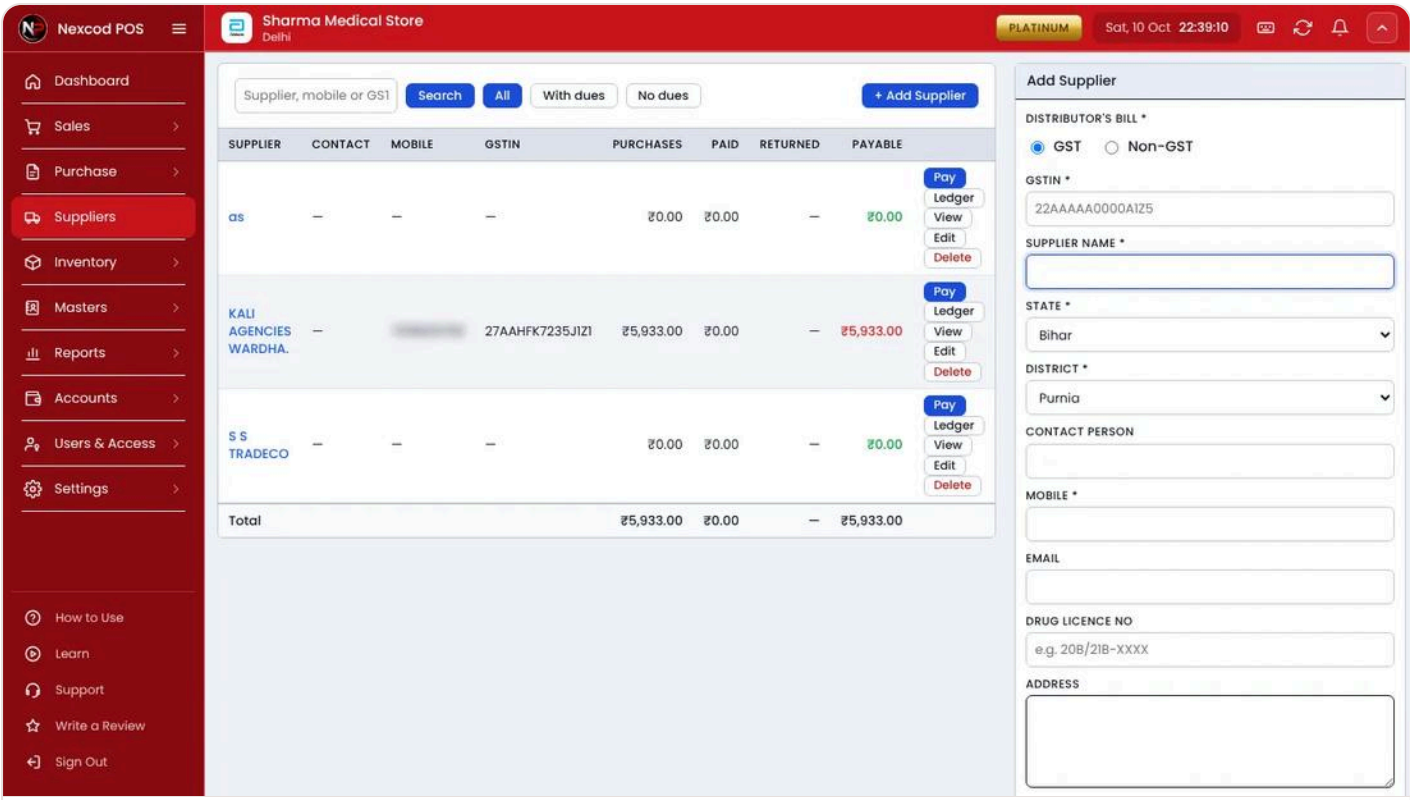

Suppliers

The supplier list.

Columns: Supplier, Contact, Mobile, GSTIN, Purchases, Paid, Returned, Payable (worked out from the bills, payments and returns, not a stored figure). Filter All, With dues, No dues. Row actions: **Pay**, **Ledger**, View, Edit, Delete.

+ Add Supplier fields: Distributor's bill (GST or Non-GST), GSTIN, Supplier name, State, District, Contact person, Mobile, Email, Drug licence no, Address, Opening balance (₹ payable) and its date.

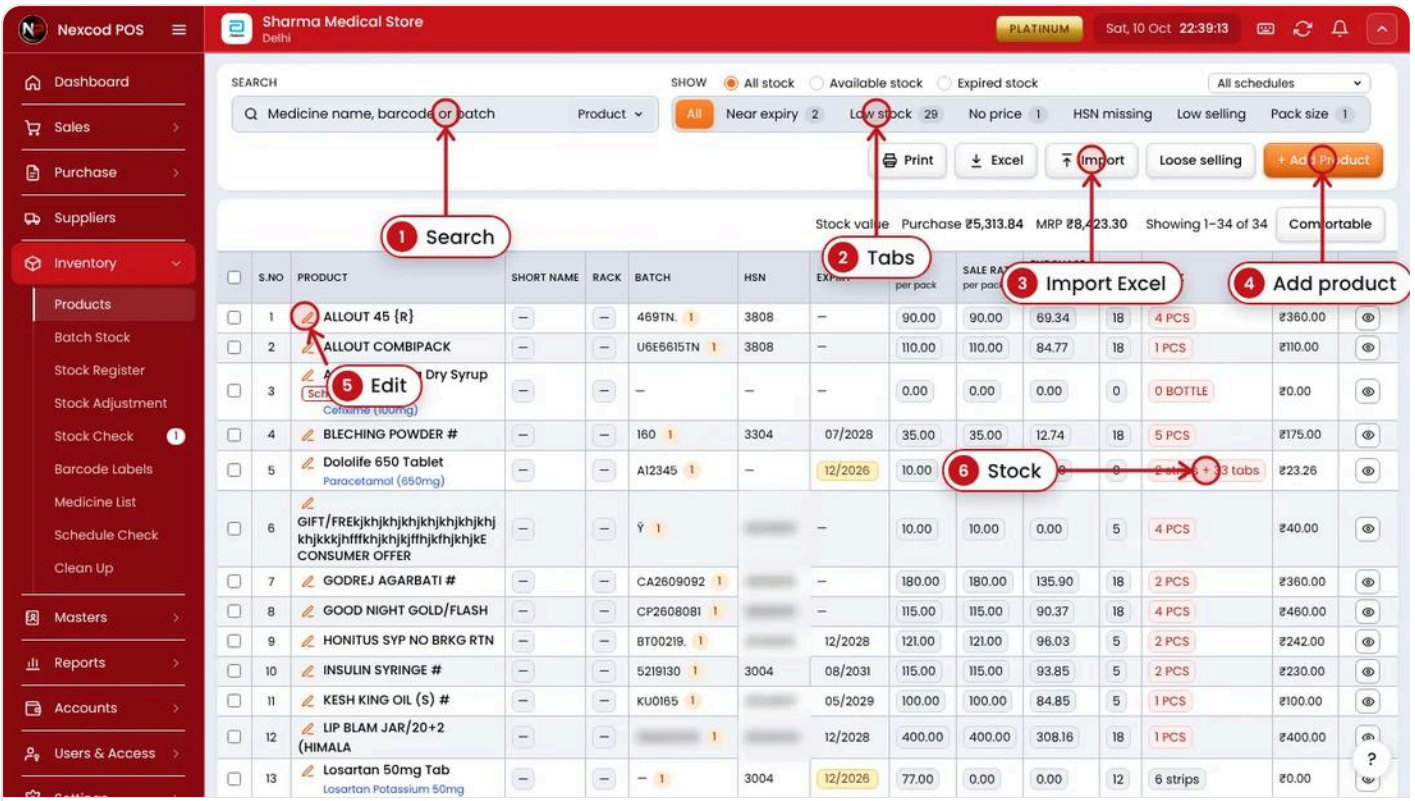

Adding a supplier.

PART 4 · STOCK AND MEDICINES

MENU: INVENTORY › PRODUCTS · DASHBOARD: INVENTORY

Products

The full stock list, page by page, edited like a spreadsheet.

Products and stock.

1. Search by medicine name, barcode or batch.
2. Tabs: Near expiry, Low stock, No price, HSN missing, Low selling, Pack size.
3. Print, Excel download and Import from Excel.
4. + Add Product opens the medicine form.
5. Pencil: edit the medicine. Prices can also be edited in the cells.
6. Stock in packs, e.g. 2 strips + 33 tabs after loose sales.

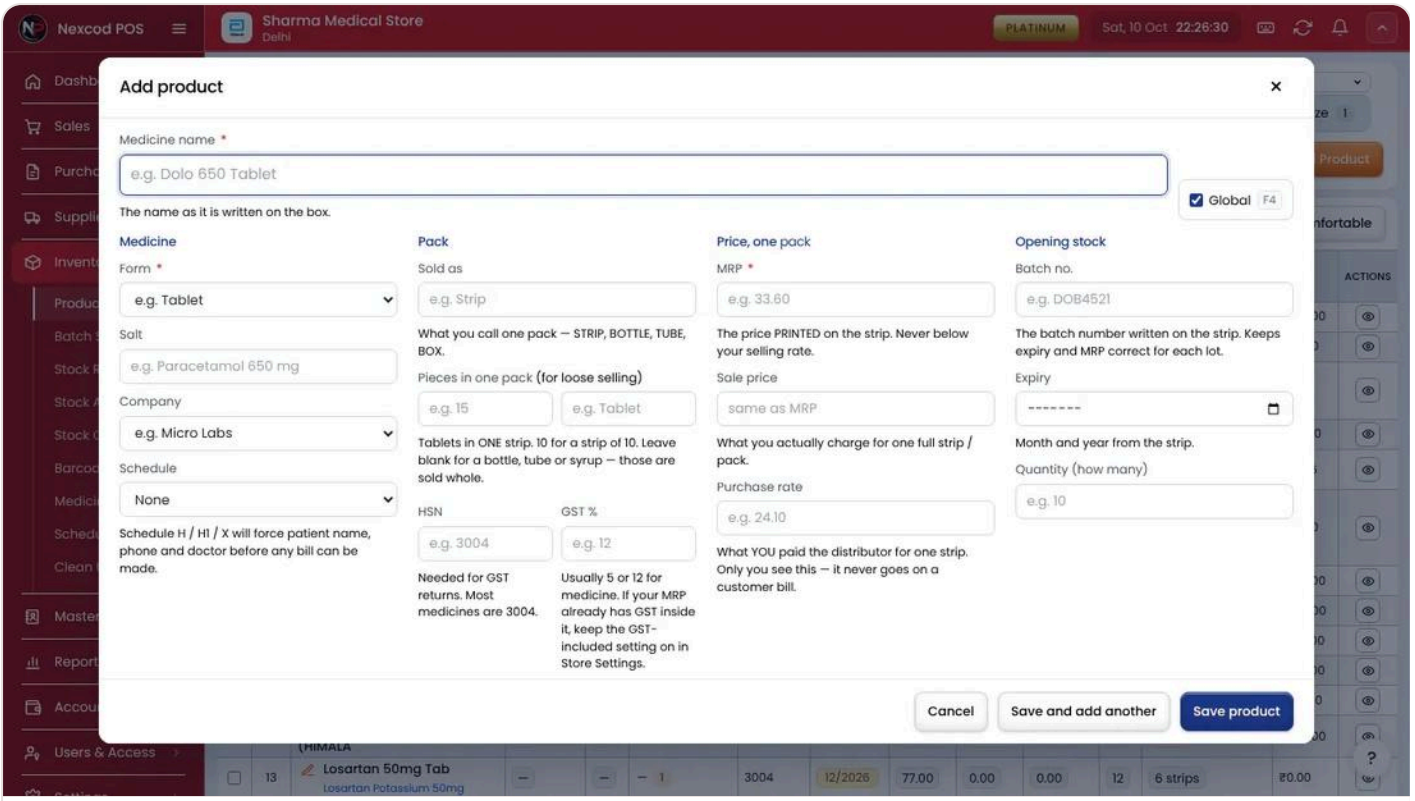

CONTROL	WHAT IT DOES
Search	Medicine name, barcode or batch, with a Product / other selector.
Show	All stock, Available stock, Expired stock.
Schedule filter	All schedules, Needs prescription, Schedule H1, Schedule not set (with counts).
Tabs	All · Near expiry · Low stock · No price · HSN missing · Low selling · Pack size (each with a count).
Print, Excel, Import	Print the list, download it, or import products from Excel (download the sample first).
Loose selling	Sets which medicines may be sold as loose tablets.
+ Add Product	Opens the Add product form (see next section).
Stock value	Total at purchase cost and at MRP.
Comfortable / Compact	Row spacing.

Columns: S.No, Product (with Sch H / H1 tag, composition and an edit pencil), Short name, Rack, Batch (with batch count), HSN, Expiry, MRP per pack, Sale rate per pack, Purchase net cost per pack, GST%, Stock (e.g. "2 strips + 33 tabs"), Value, Actions. MRP, rates and GST can be edited in the cells. Tick rows for bulk edit or delete.

RULES THAT KEEP STOCK RIGHT

Prices are for the full pack, never one tablet. Stock is counted in strips or packs, not tablets. The **Pack size** tab lists medicines whose tablets-per-strip is missing; until it is filled they can only be sold whole.

Adding a medicine

The Add product form.

SECTION	FIELDS AND GUIDANCE
Medicine name	Exactly as on the box; this is what is searched at the counter. **Global** (`F4`) searches the national medicine directory to fill details.
Medicine	Form (Tablet, Syrup…), Salt (e.g. Paracetamol 650 mg), Company, Schedule (None, H, H1, X). Schedule H/H1/X forces patient name, phone and doctor before a bill can be made.
Pack	Sold as (STRIP, BOTTLE, TUBE, BOX). Pieces in one pack (for loose selling): 10 for a strip of 10, blank for a bottle or tube. HSN (most medicines 3004). GST % (usually 5 or 12).
Price, one pack	MRP (printed price, never below the selling rate), Sale price (what you charge), Purchase rate (what you paid; never printed on a customer bill).
Opening stock	Batch no., Expiry (month and year), Quantity in full packs.

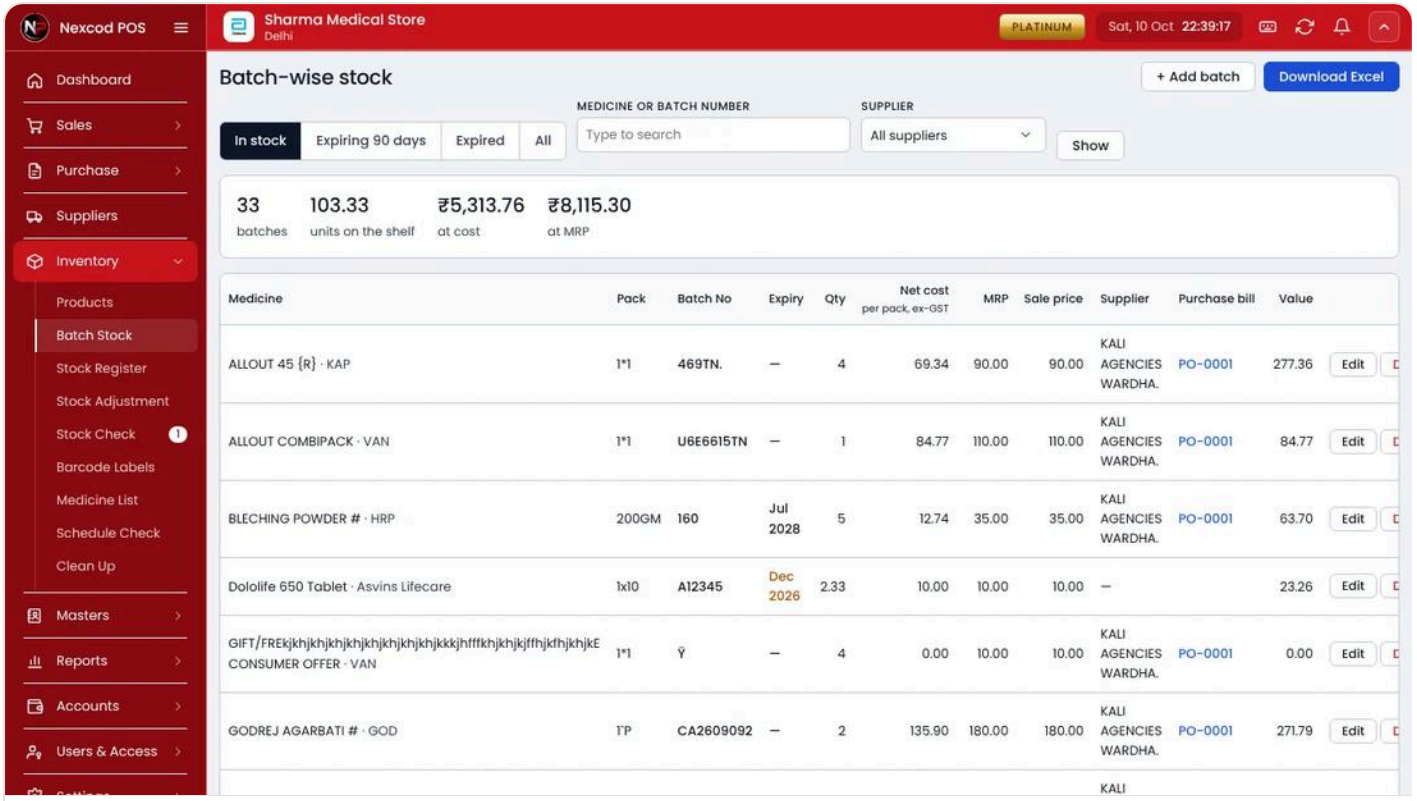

Buttons: Cancel, **Save and add another**, **Save product**. The same form opens from Purchase Entry with **+ New medicine**. Low-stock alert level and units of measure can be set on the product too.

MENU: INVENTORY › BATCH STOCK

Batch Stock

Every batch on its own line, which the normal product list adds together. Use it before returning goods to a supplier, since a credit note needs the batch number and expiry.

Views: In stock, Expiring 90 days, Expired, All. Search by medicine or batch number and filter by supplier. Totals: batches, units on the shelf, value at cost and at MRP. Columns: Medicine, Pack, Batch No, Expiry, Qty, Net cost per pack (ex-GST), MRP, Sale price, Supplier, Purchase bill, Value, with Edit and Delete. **+ Add batch** and **Download Excel** are at the top.

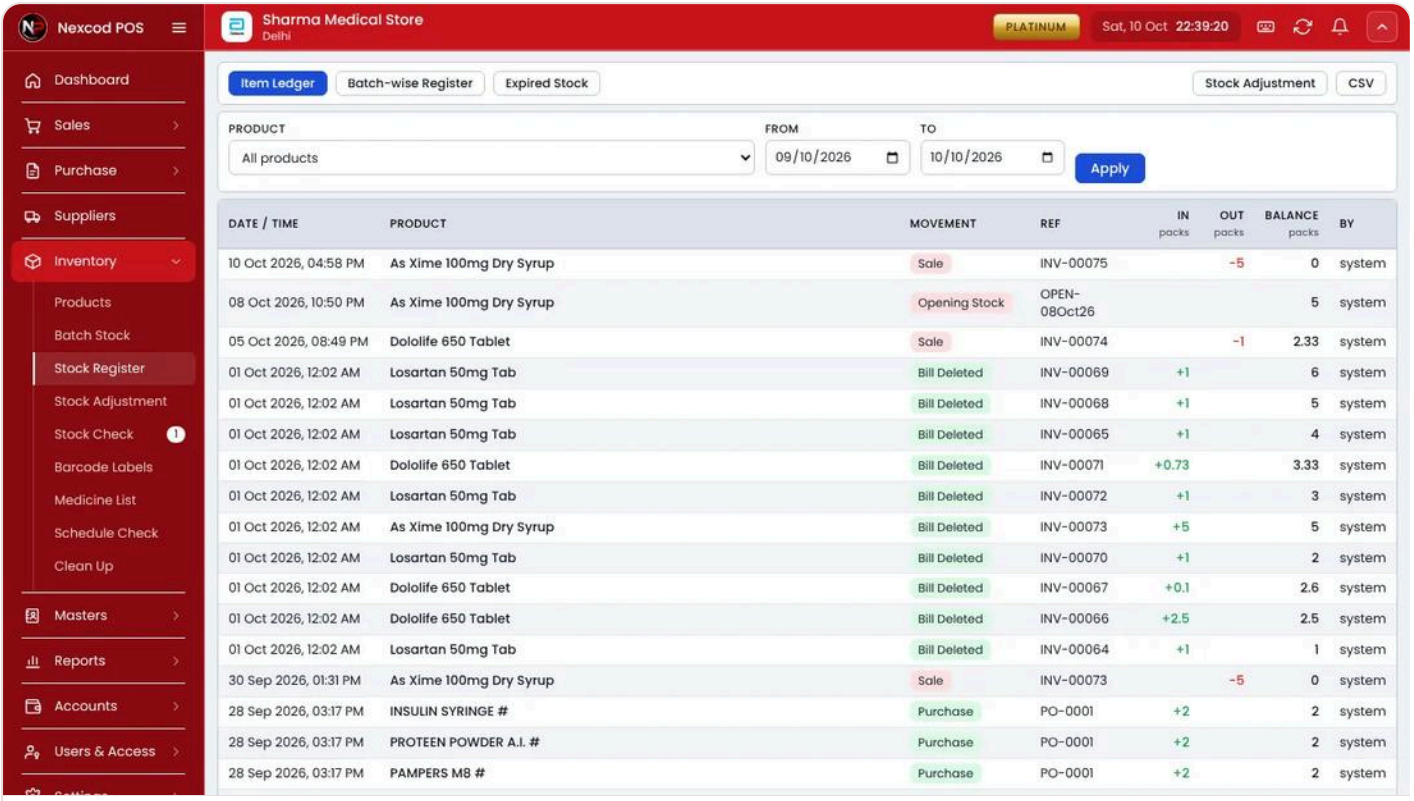

Batch-wise stock.

MENU: INVENTORY › STOCK REGISTER

Stock Register

Every movement of every medicine: sold, purchased, returned, adjusted, opening stock.

- **Item Ledger:** Date/time, Product, Movement, Ref (bill or entry number), In, Out, Balance (in packs) and By whom. Filter by product and dates; download CSV.
- **Batch-wise Register:** the same by batch, with supplier, purchased-on date and PO number.
- **Expired Stock:** expired batches with supplier and bill number.
- **Stock Adjustment:** link to corrections.

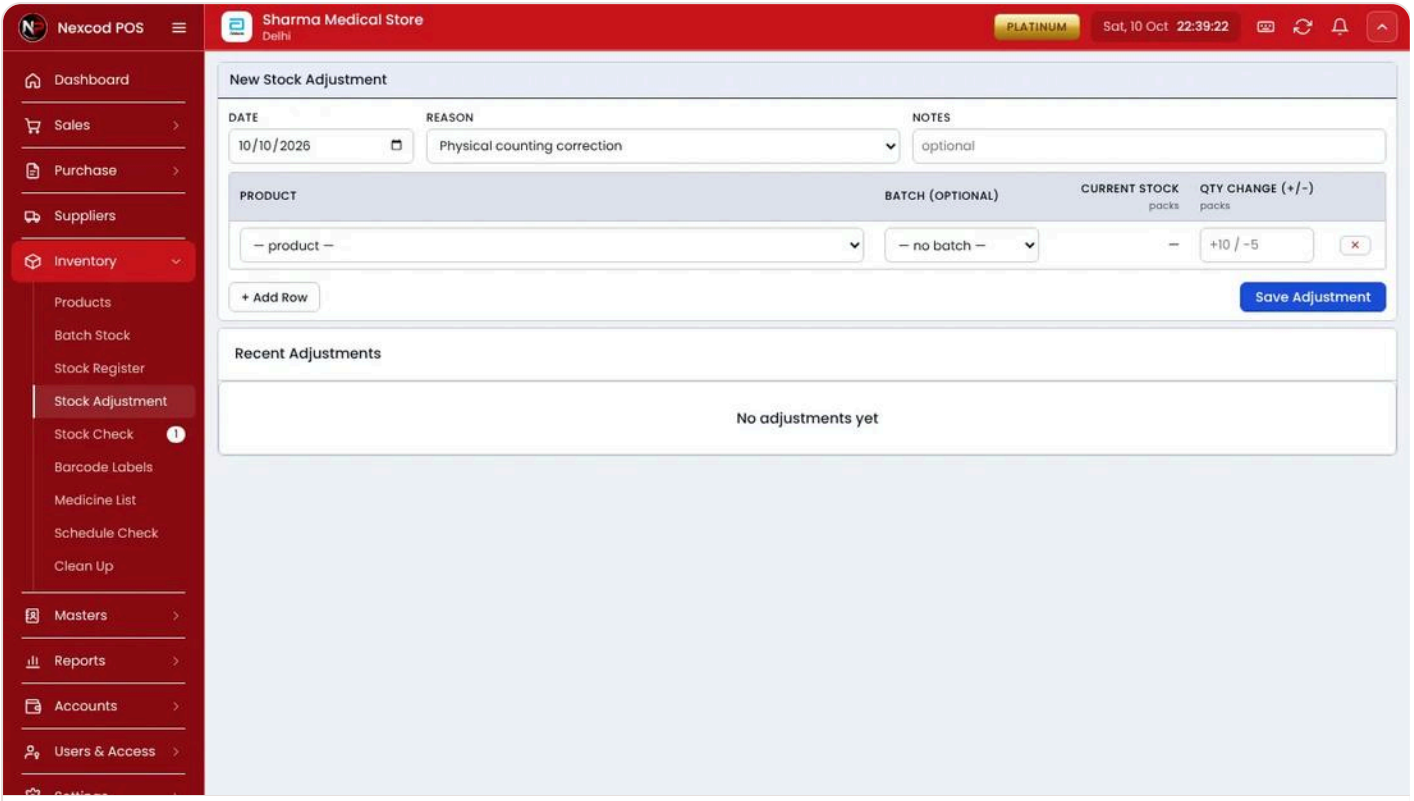

Item ledger.

MENU: INVENTORY › STOCK ADJUSTMENT

Stock Adjustment

Correct a quantity by hand with the reason recorded.

1. Set the date and choose a reason: Physical counting correction, Damaged goods, Expiry write-off, Theft or loss, Opening stock entry, or Other. Add notes if useful.
2. For each row choose the product and (optionally) the batch. The current stock in packs is shown. Enter the change, e.g. +10 or -5.
3. **+ Add Row** for more lines, then **Save Adjustment**. Every change is logged.

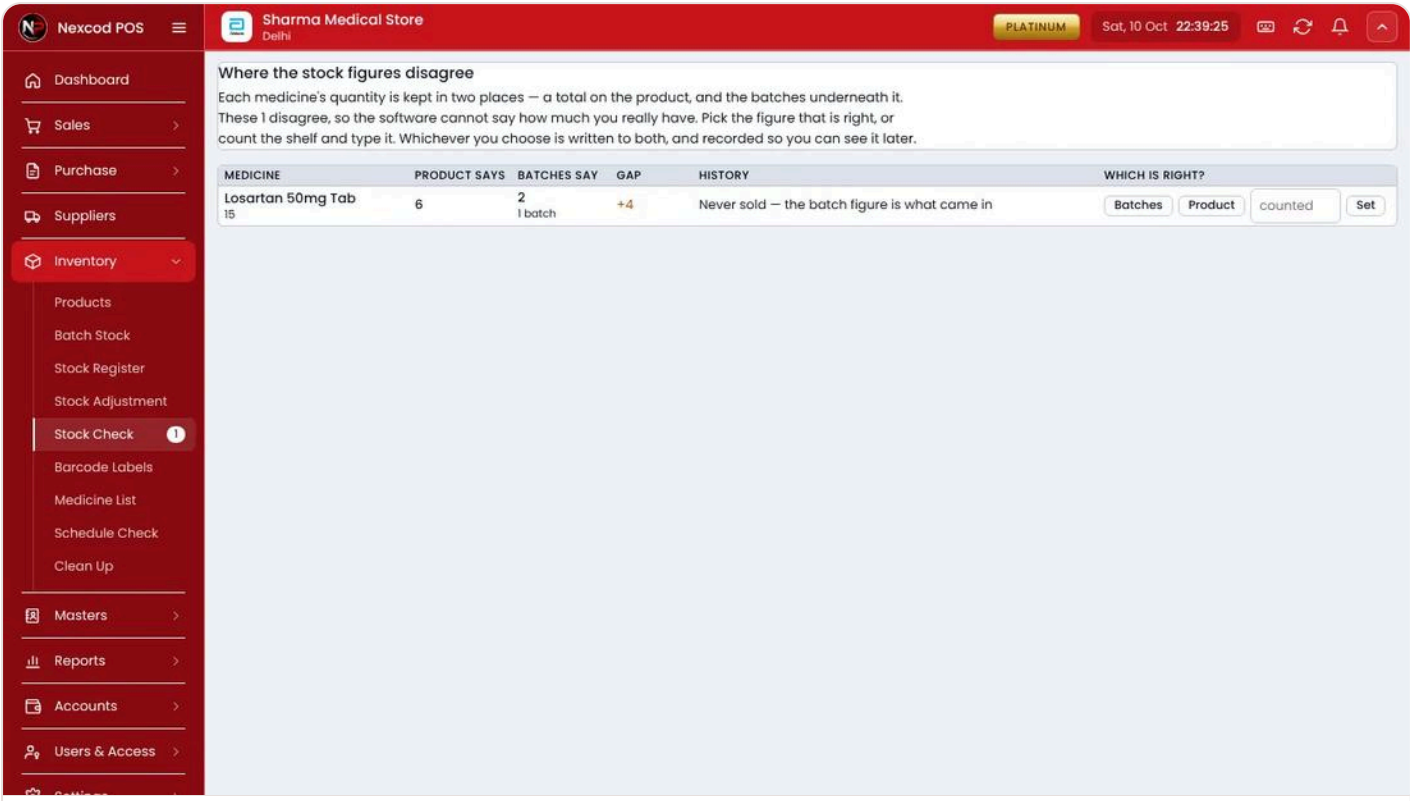

New stock adjustment.

MENU: INVENTORY › STOCK CHECK

Stock Check

Each medicine's quantity is kept in two places: a total on the product and the batches under it. This page lists medicines where the two disagree, so the true quantity is unclear.

Columns: Medicine, Product says, Batches say, Gap, History, Which is right? For each row choose **Batches** or **Product**, or count the shelf, type the counted figure and press **Set**. The chosen figure is written to both places and recorded.

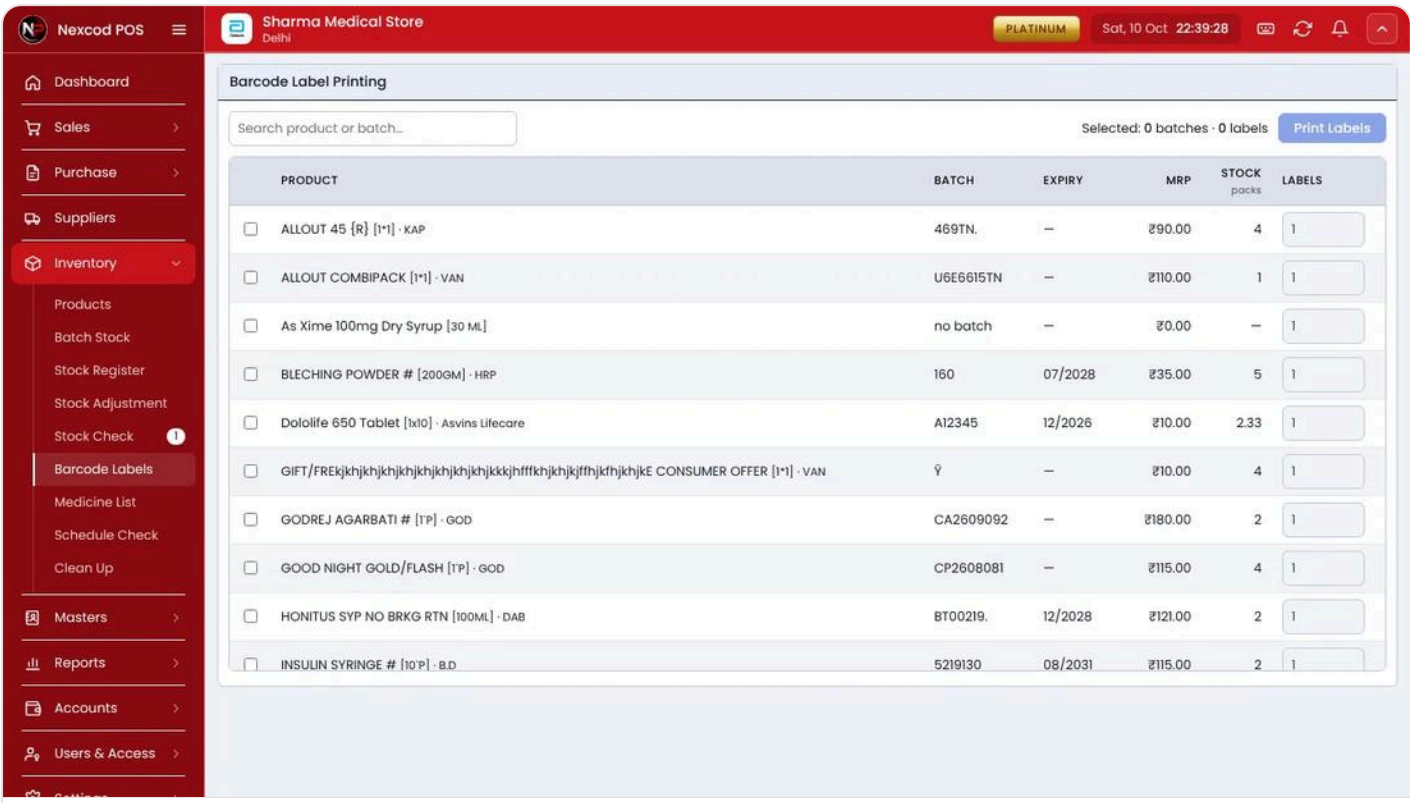

Stock check.

Do this for fast-moving items every month. A wrong stock figure quietly becomes a wrong profit figure.

MENU: INVENTORY › BARCODE LABELS

Barcode Labels

Print stick-on labels for shelves. Search a product or batch, tick the batches, set how many labels each, and press **Print Labels**. Columns: Product, Batch, Expiry, MRP, Stock, Labels. Each label carries the store name, product, batch, expiry and MRP with a barcode; scanning it at Billing finds the product and batch.

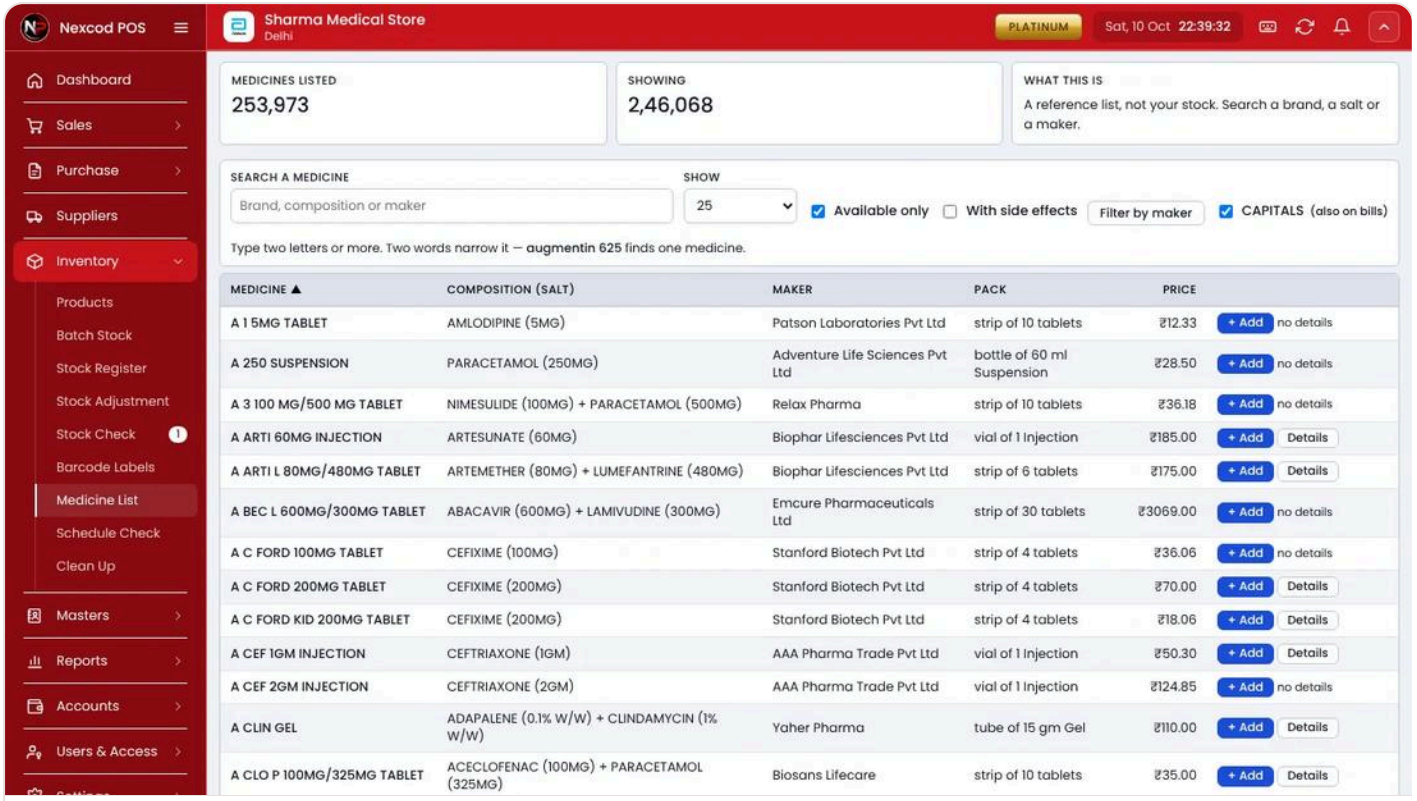

Barcode label printing.

MENU: INVENTORY › MEDICINE LIST

Medicine List (directory)

A reference list of about 2.5 lakh Indian medicines (253,973 listed), separate from the shop's own stock. Search by brand, composition (salt) or maker; two words narrow it ("augmentin 625" finds one medicine).

Options: show 25/50/100, Available only, With side effects, Filter by maker, CAPITALS (also on bills). Columns: Medicine, Composition, Maker, Pack, Price, with **+ Add** to copy a medicine into stock and **Details**.

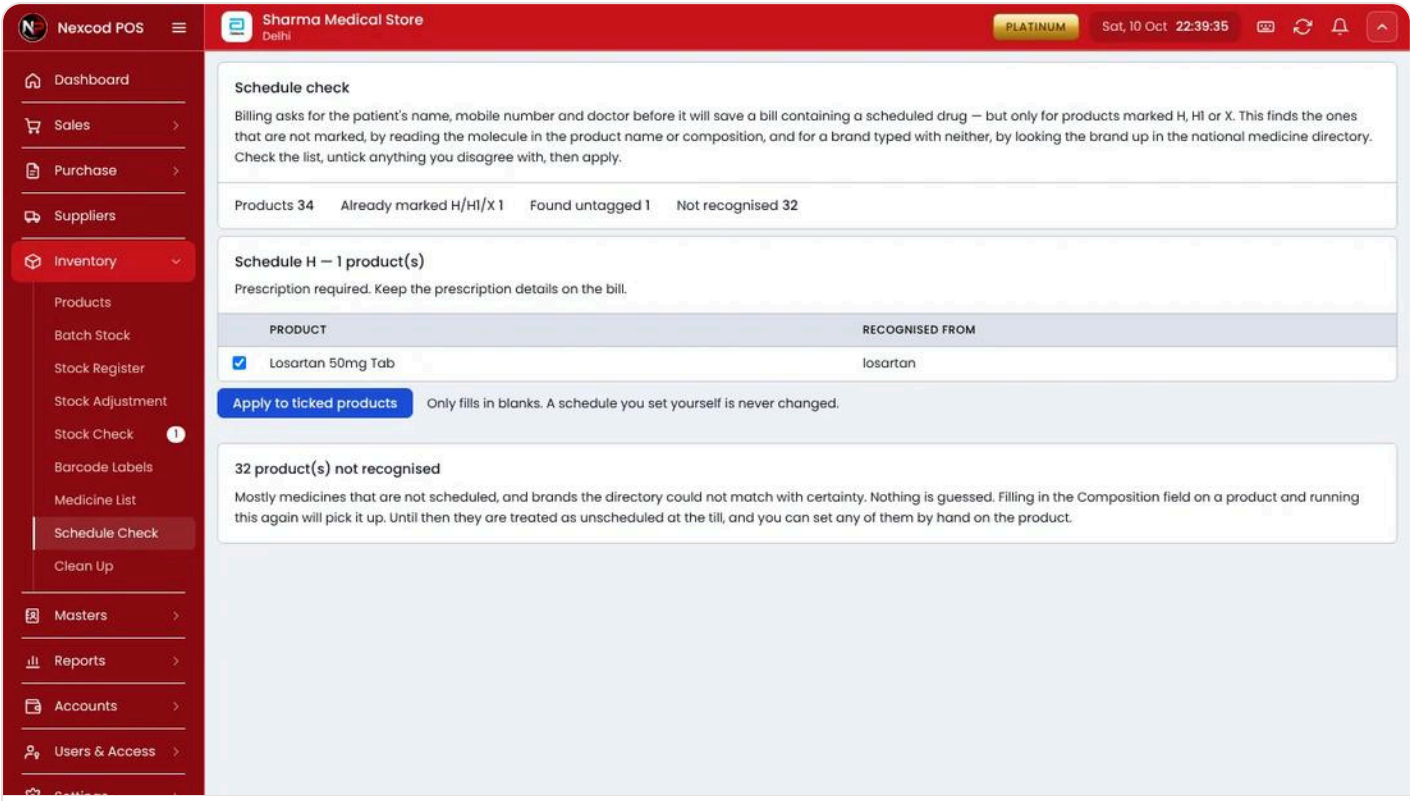

Medicine directory.

MENU: INVENTORY › SCHEDULE CHECK · DASHBOARD: SCHEDULE CHECK

Schedule Check

Billing asks for the patient's name, mobile number and doctor only for products marked H, H1 or X. This page finds products that should be marked but are not, by reading the molecule in the name or composition and, for a bare brand, looking it up in the national medicine directory.

It shows counts (products, already marked, found untagged, not recognised) and the untagged list grouped by schedule with "Recognised from". Untick anything you disagree with and press **Apply to ticked products**. It only fills blanks; a schedule set by hand is never changed.

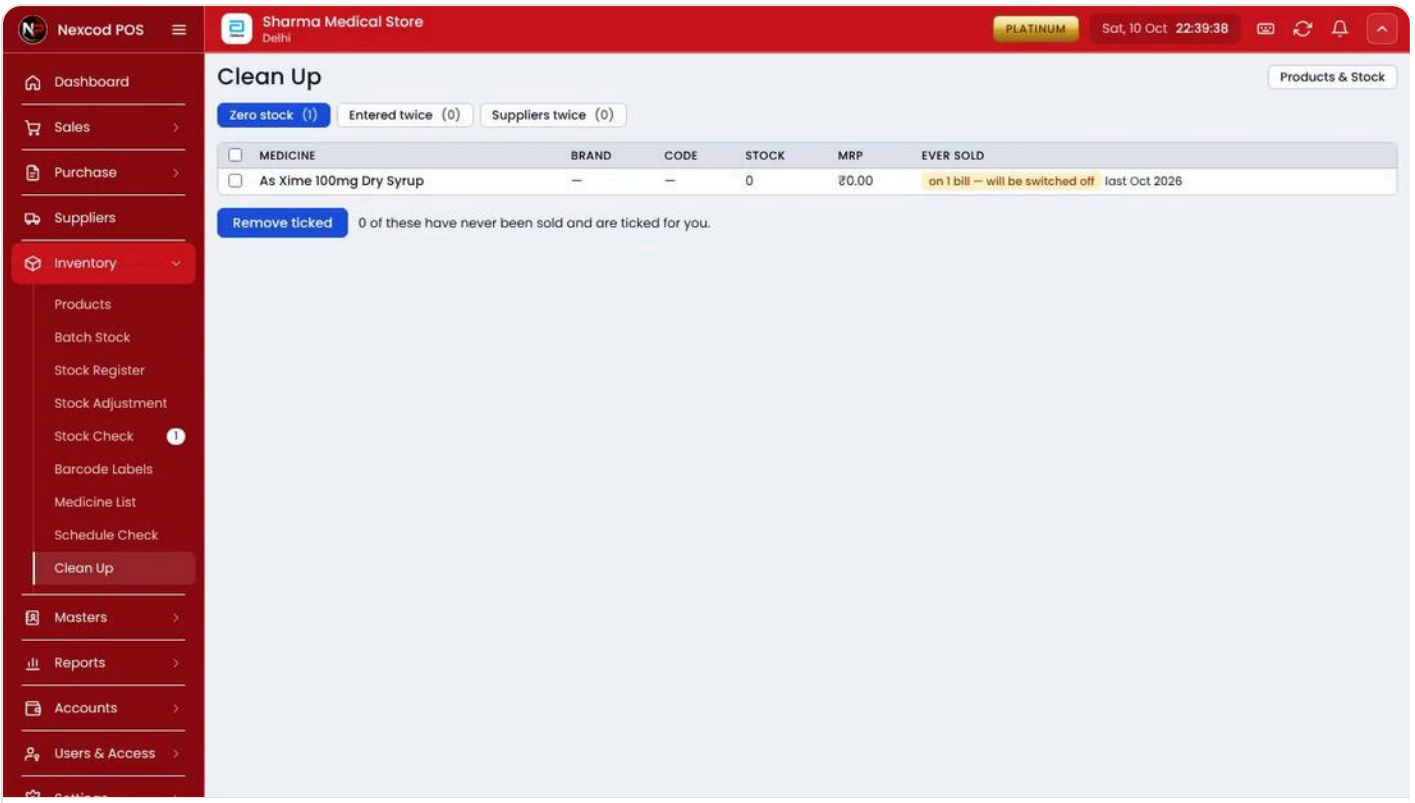

Schedule check.

MENU: INVENTORY › CLEAN UP

Clean Up

Tidies the product list. Tabs: **Zero stock**, **Entered twice** (duplicate products) and **Suppliers twice**. Columns: Medicine, Brand, Code, Stock, MRP, Ever sold. Medicines never sold are ticked for you; a medicine that was sold is switched off rather than deleted. Press **Remove ticked**.

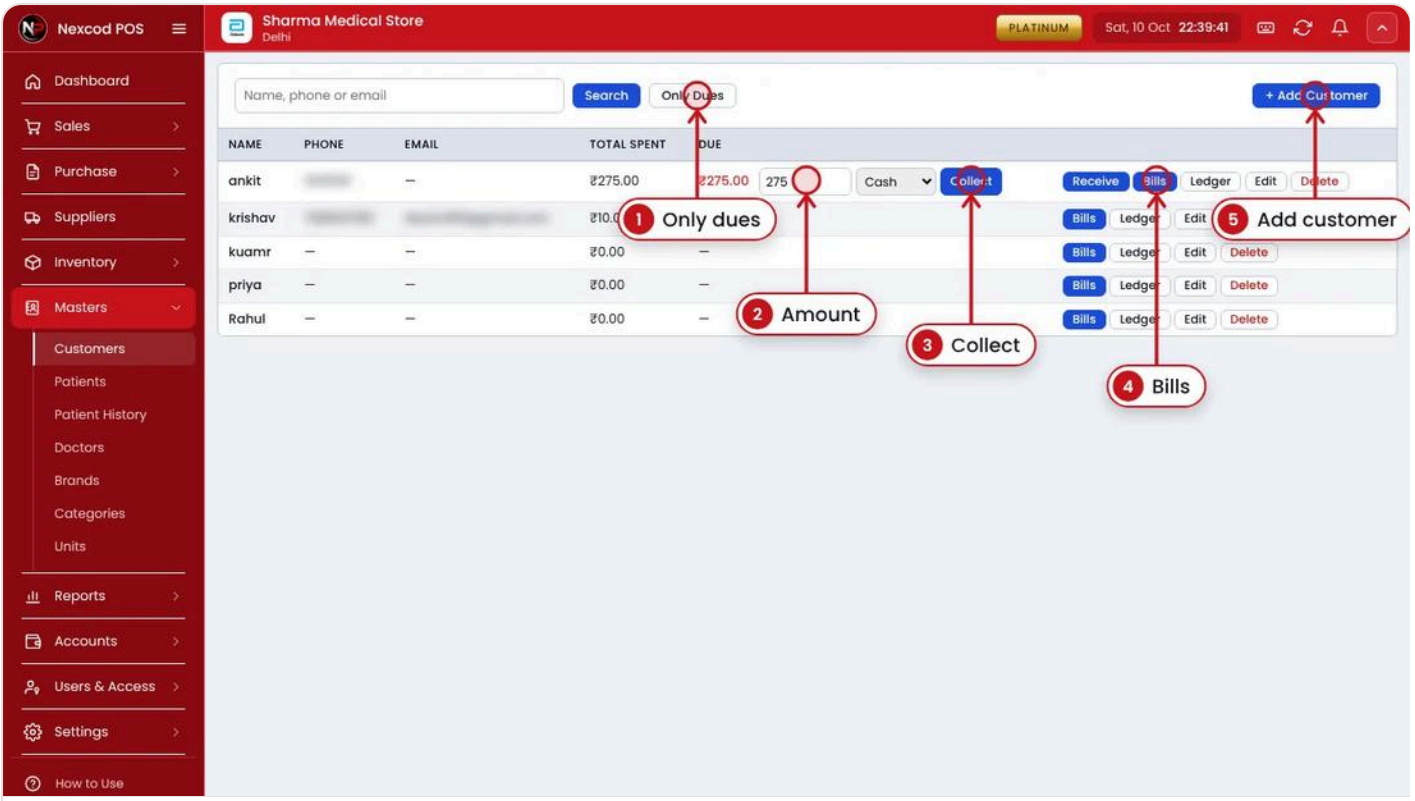

Clean up.

PART 5 · MASTERS

MENU: MASTERS › CUSTOMERS

Customers

Customers. A customer with dues has a quick Collect box.

1. Only Dues shows customers who owe money.
2. Type the amount and mode to collect a due.
3. Collect records the payment.
4. Bills, Ledger, Edit and Delete for each customer.
5. + Add Customer, with credit limit and opening balance.

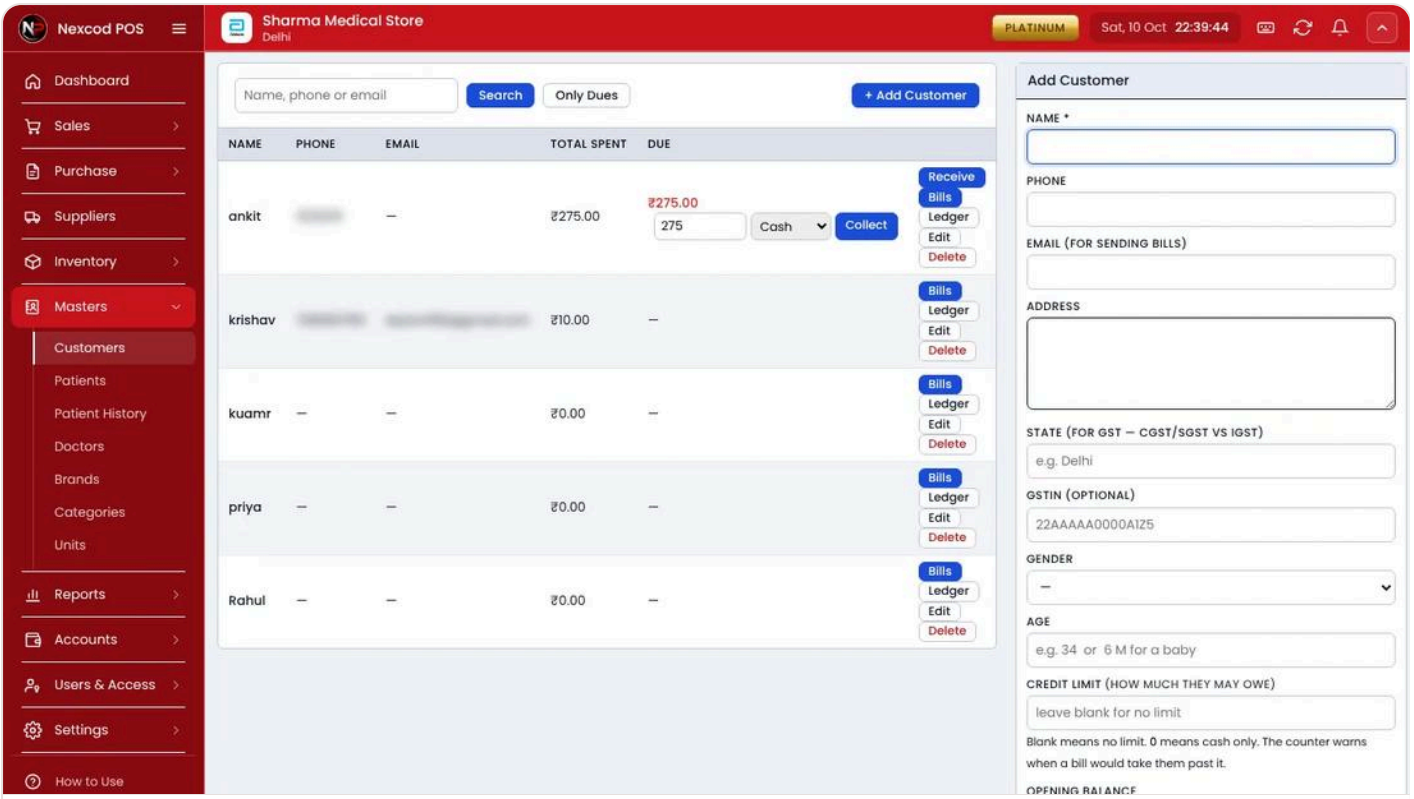

Columns: Name, Phone, Email, Total spent, Due. Search by name, phone or e-mail; **Only Dues** filters to customers who owe. For a customer with a due, type the amount, choose the mode (Cash, UPI, Card, Bank, Cheque) and press **Collect**. Row actions: Receive, **Bills** (all their invoices, filter by date, print, view each), **Ledger**, Edit, Delete.

Add Customer

Name (required), Phone, Email (for sending bills), Address, State (decides CGST/SGST vs IGST), GSTIN (optional), Gender, Age, **Credit limit**, Opening balance, Notes (internal).

CREDIT LIMIT

Blank means no limit, 0 means cash only. The counter warns when a bill would take the customer past the limit; with the counter rule switched on, the bill is stopped until payment is taken. A customer at the limit can still buy for cash.

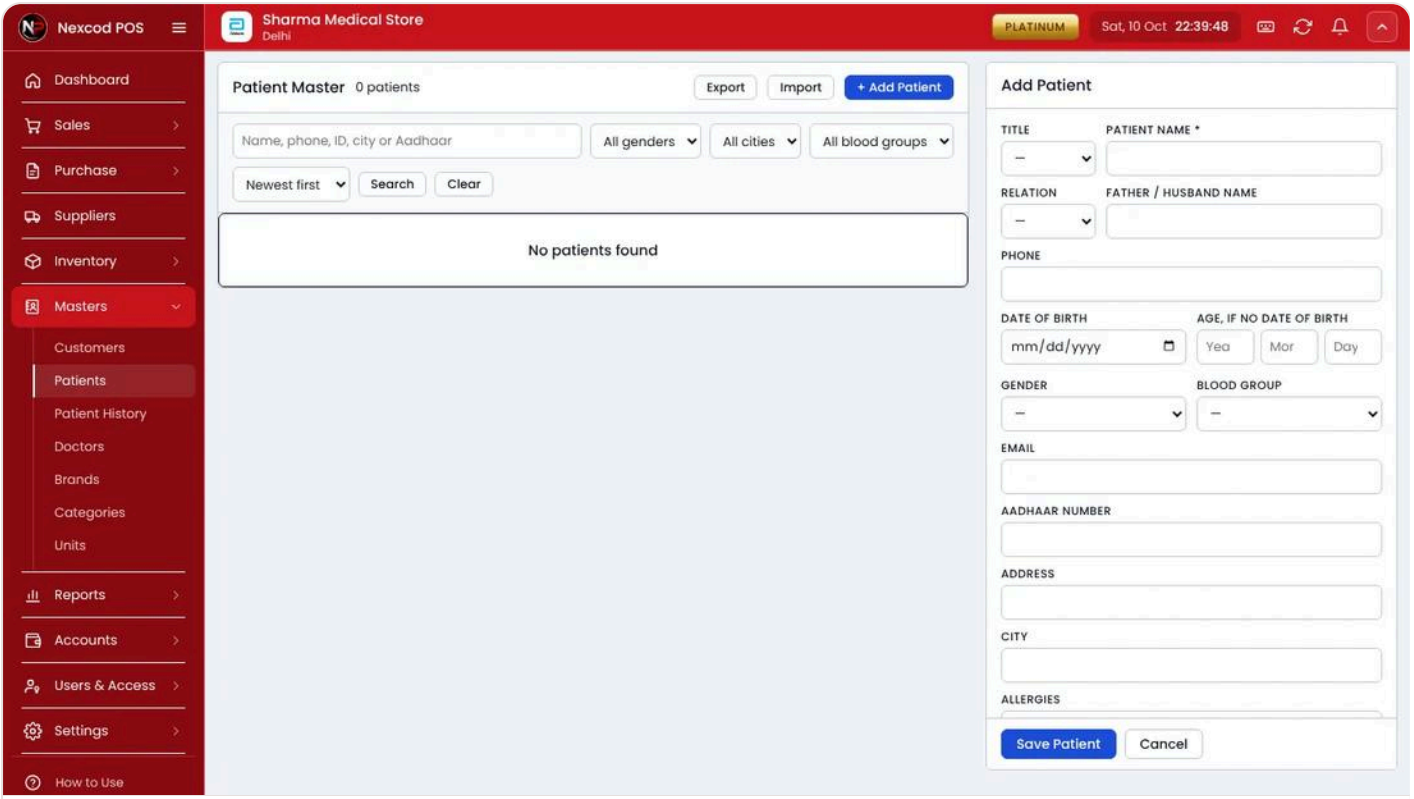

Adding a customer.

MENU: MASTERS › PATIENTS · PATIENT HISTORY

Patients and Patient History

Patient Master keeps patient records used on bills and for Schedule H/H1 registers. Filters: gender, city, blood group, sort; **Export** and **Import**. **+ Add Patient**: Title, Patient name, Relation (S/o, W/o, D/o, C/o) and father/husband name, Phone, Date of birth or Age, Gender, Blood group, Email, Aadhaar number, Address, City, Allergies, Past medical history, Notes.

Adding a patient.

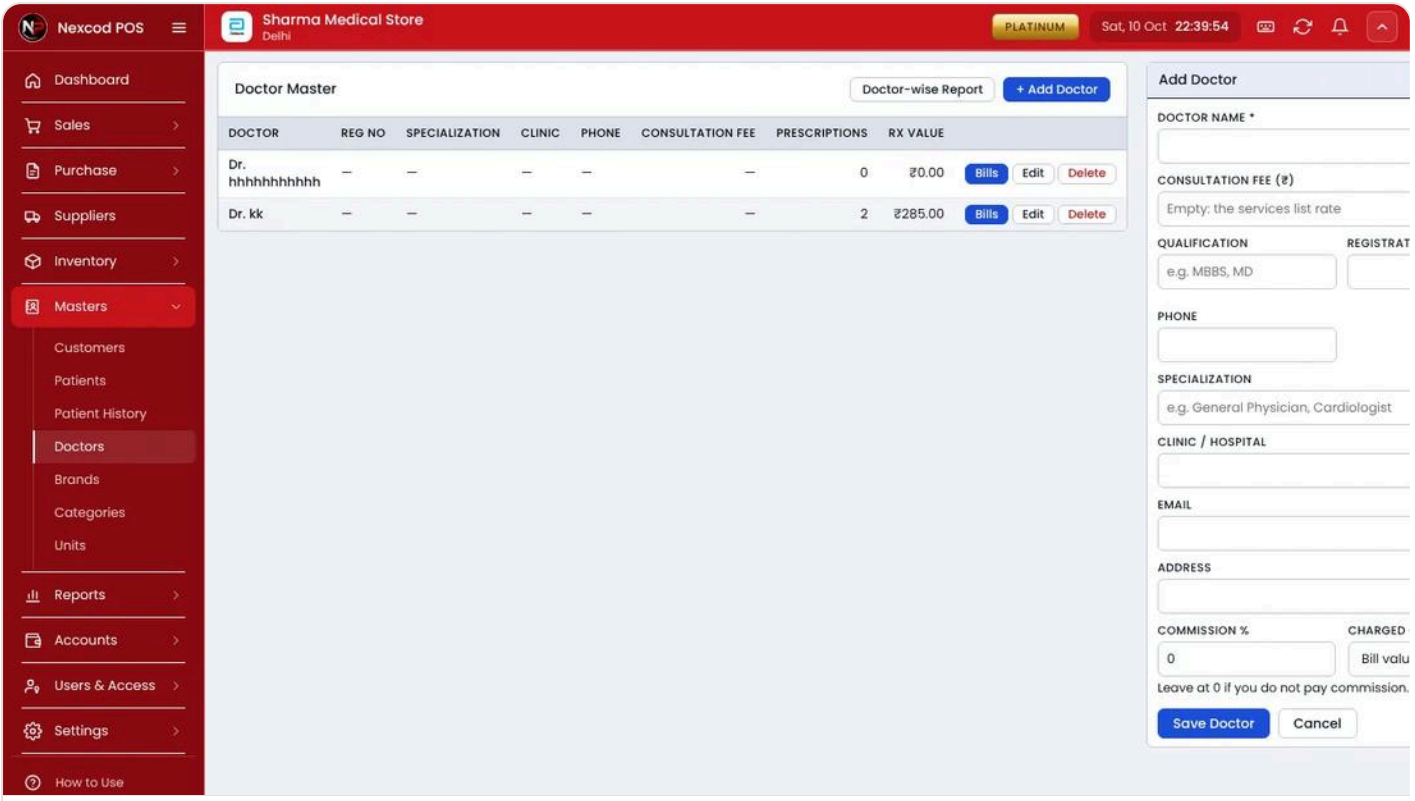

Patient History finds a patient by name, patient ID, phone, address or father's name and opens their visits, vitals, prescriptions, bills and certificates (the clinic records appear when the clinic module is on).

MENU: MASTERS › DOCTORS

Doctors

Columns: Doctor, Reg no, Specialization, Clinic, Phone, Consultation fee, Prescriptions, Rx value, with Bills, Edit and Delete. **Doctor-wise Report** opens their sales.

+ Add Doctor: Doctor name, Consultation fee, Qualification, Registration no, Phone, Specialization, Clinic / hospital, Email, Address, **Commission %** and Charged on (Bill value or Profit). Leave commission at 0 if none is paid; it feeds the Doctor Commission report.

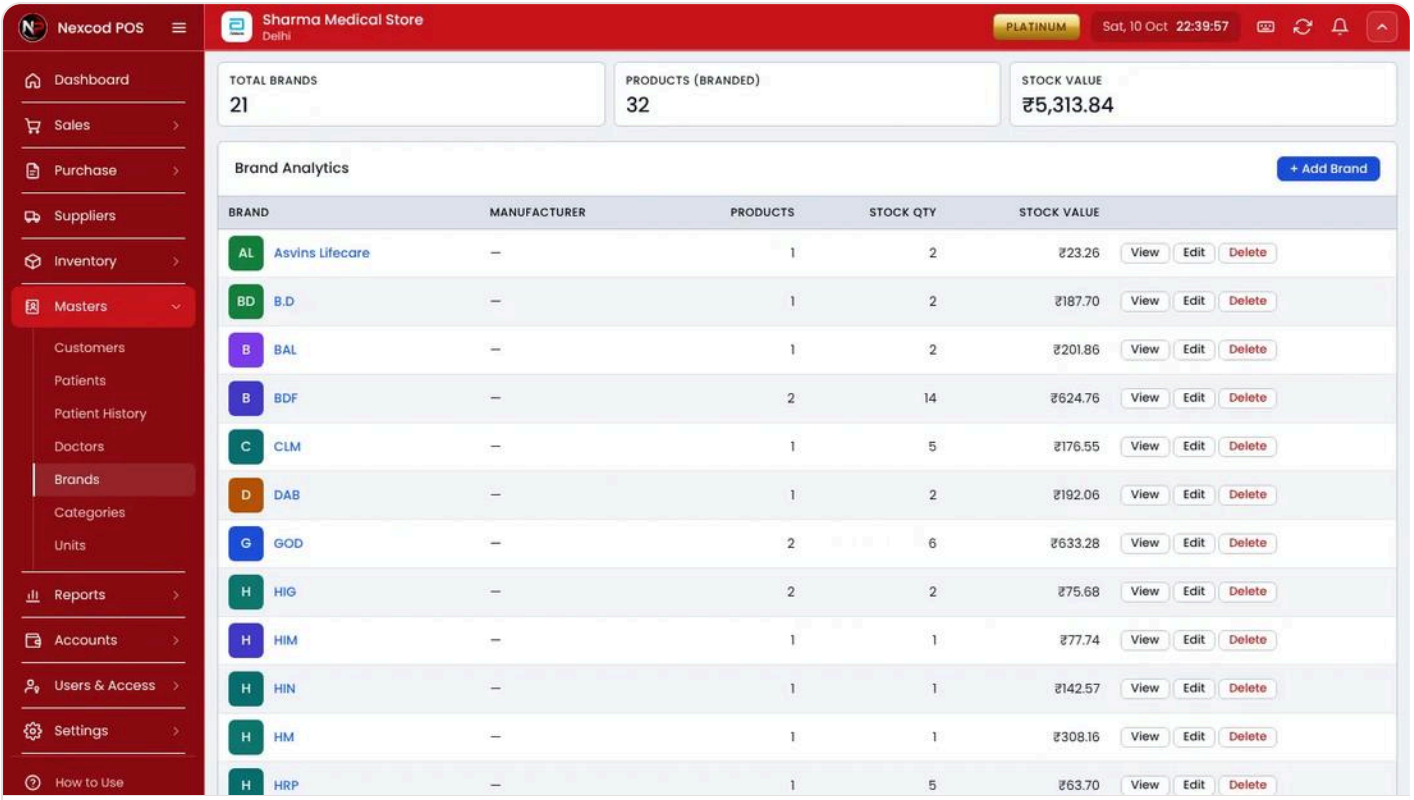

Adding a doctor.

MENU: MASTERS › BRANDS · CATEGORIES · UNITS

Brands, Categories and Units

Brands

The company list (Cipla, Sun, Mankind…) so each medicine is filed under the right maker. Shows total brands, branded products and stock value, with Brand Analytics. Columns: Brand, Manufacturer, Products, Stock qty, Stock value. **+ Add Brand**: brand name and manufacturer.

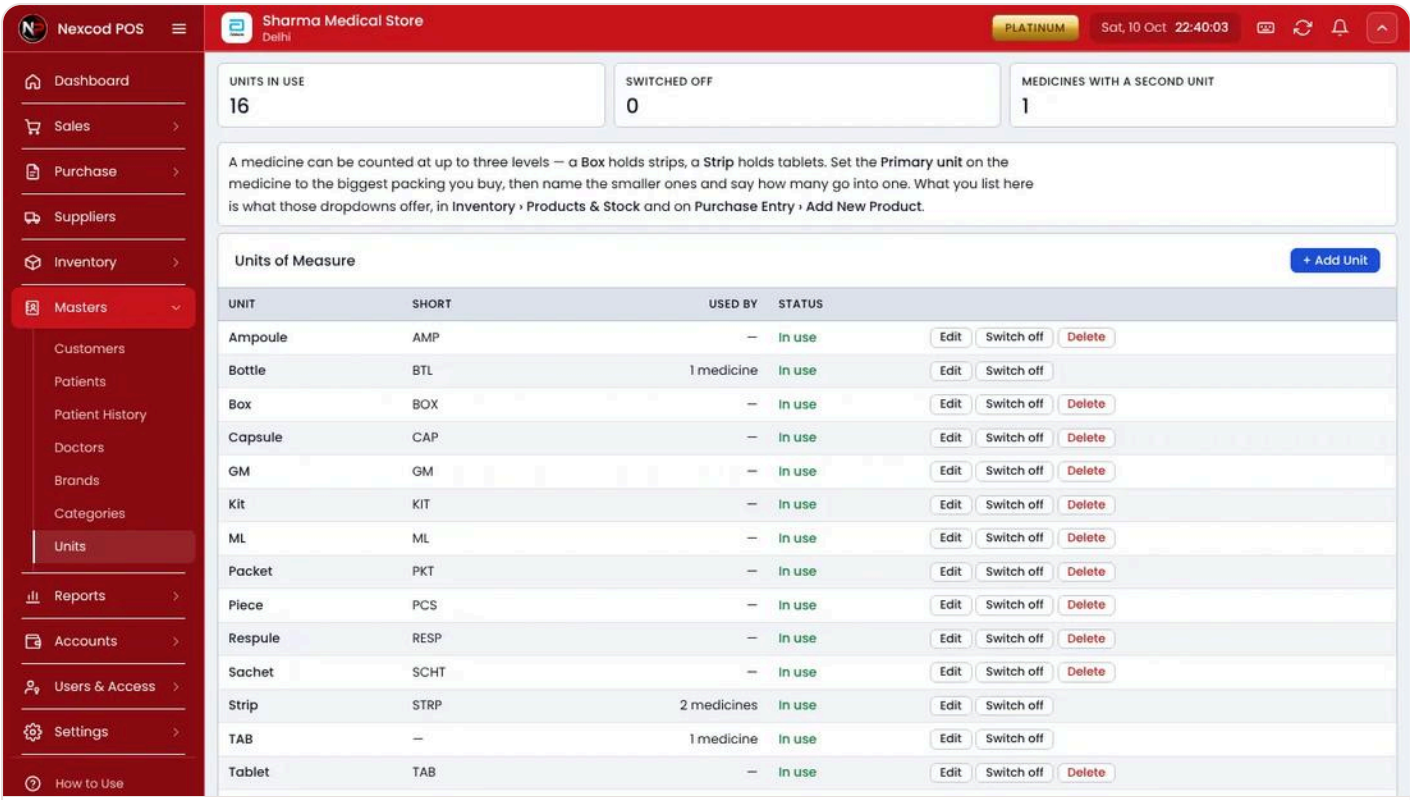

Brands.

Drug Categories

Categories and their schedule type, which marks a medicine as Schedule H or H1. **Add default set** fills a standard list; **+ Add Category** adds one.

Units of Measure

A medicine can be counted at up to three levels: a Box holds strips, a Strip holds tablets. Set the primary unit to the biggest packing you buy, then name the smaller ones and how many go into one. The list (Ampoule, Bottle, Box, Capsule, GM, Kit, ML, Packet, Piece, Respule, Sachet, Strip, Tablet, Tube, Vial…) is what the unit dropdowns offer. A unit in use cannot be deleted; **Switch off** it instead. Renaming a unit changes it on every medicine.

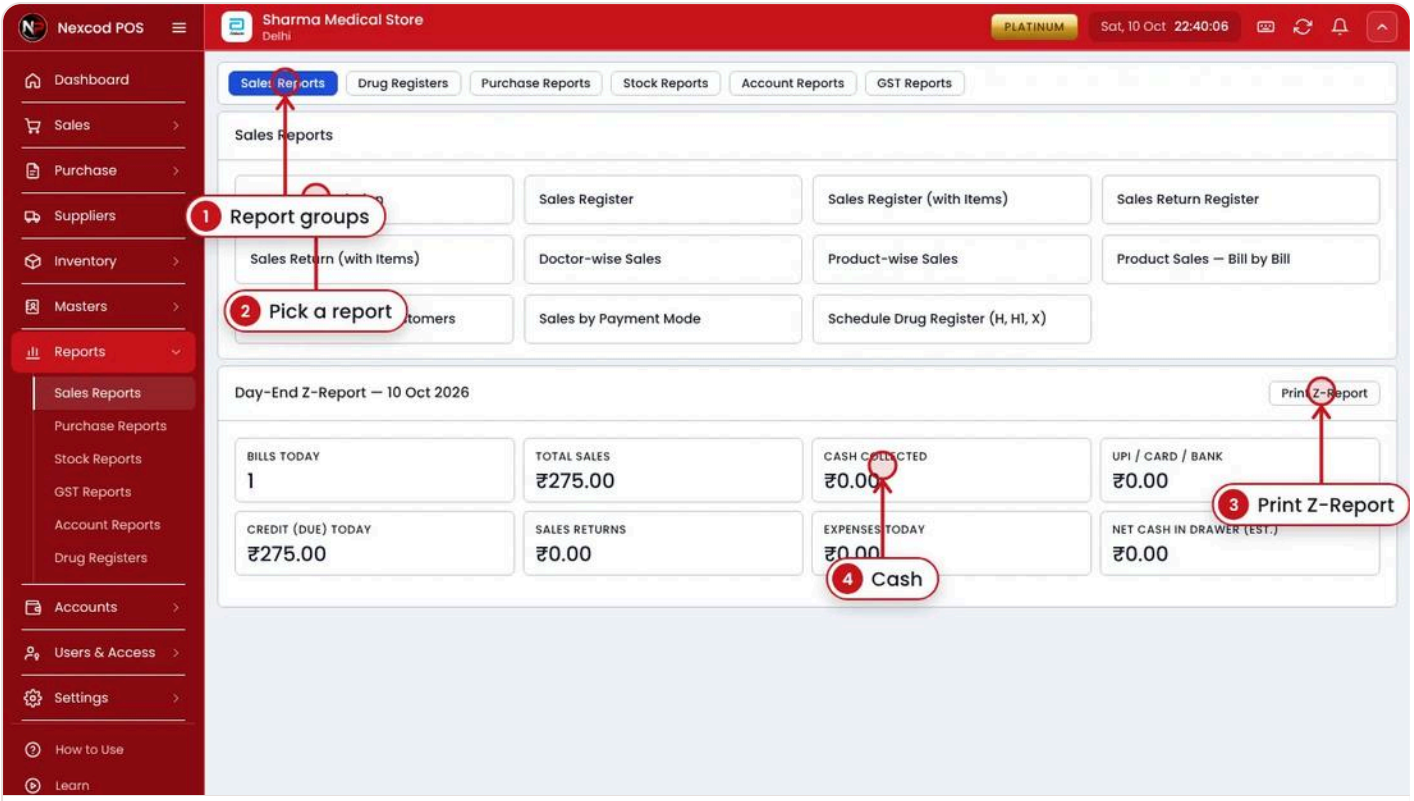

Units of measure.

PART 6 · REPORTS AND ACCOUNTS

MENU: REPORTS

Reports

There are 55 report views in six tabs (the Schedule Drug Register appears in three of them). Pick a report, set From and To, press **Apply**. Every report has **Download CSV** and **Print** (prints only the table with a proper header) and a link back to its group.

The Reports page, Sales tab, with the Day-End Z-Report below.

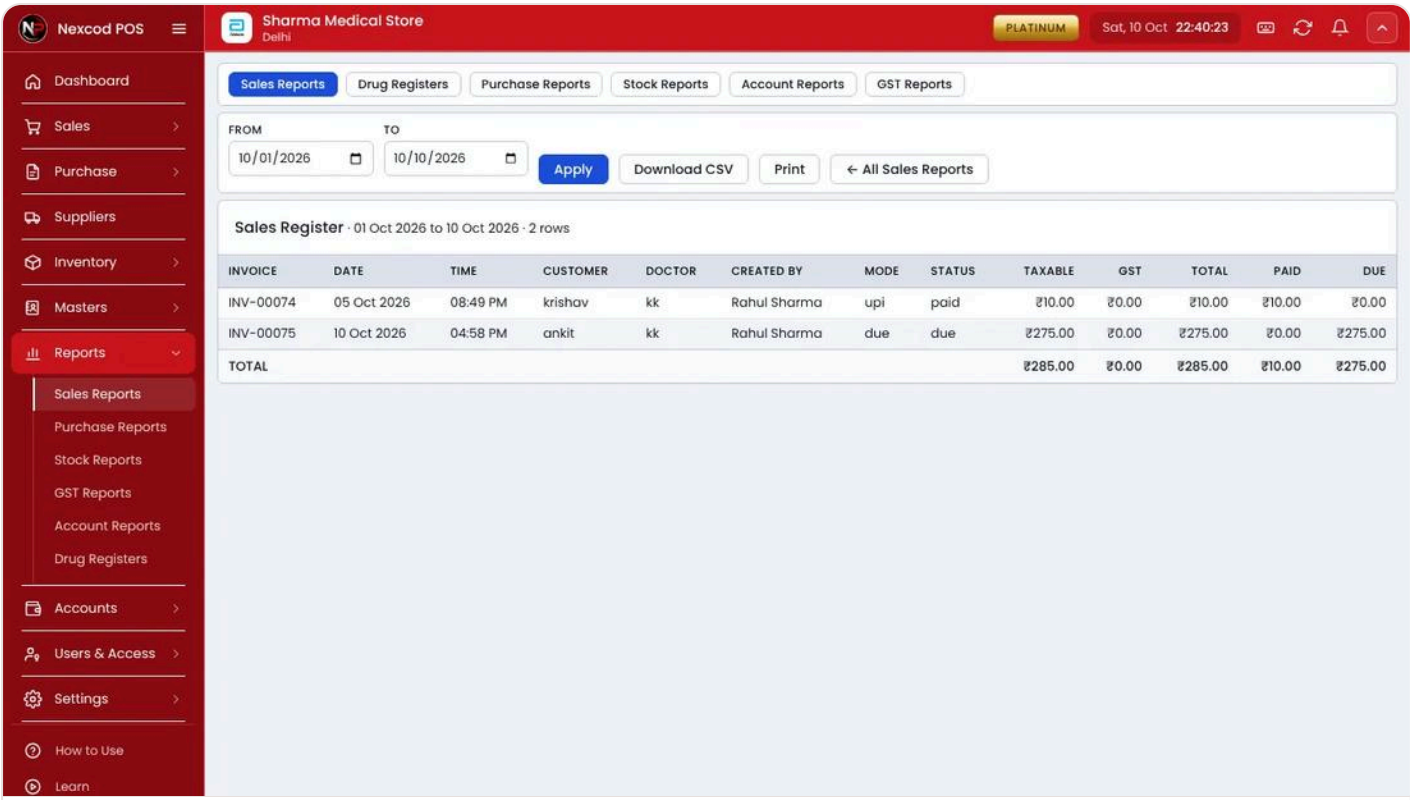

1. Six report groups: Sales, Drug Registers, Purchase, Stock, Account, GST.
2. Open a report, choose the dates and press Apply.
3. Day-End Z-Report: the day's totals; print it to close the counter.
4. Cash collected, UPI/card/bank, credit, returns, expenses and net cash in drawer.

Day-End Z-Report

Shown under every tab for today: Bills today, Total sales, Cash collected, UPI / Card / Bank, Credit (due) today, Sales returns, Expenses today and Net cash in drawer (estimate). **Print Z-Report** prints it for closing the counter.

Sales reports (11)

REPORT	WHAT IT SHOWS
Doctor Commission	Per doctor: bills, sales, profit, rate %, charged on, commission due.
Sales Register	Every bill: invoice, date, time, customer, doctor, created by, mode, status, taxable, GST, total, paid, due.
Sales Register (with Items)	Every bill line: item, HSN, qty (packs), rate, GST %, taxable, GST amount, total.
Sales Return Register	Every sales return.
Sales Return (with Items)	Sales returns line by line.
Doctor-wise Sales	Prescriptions, taxable, GST and sales value per doctor.
Product-wise Sales	Qty sold, bills, average rate, taxable, GST, total per product.
Product Sales: Bill by Bill	Each sale of each medicine with batch, expiry, qty, rate, discount, GST.
Refill Due: regular customers	Regular customers whose medicines are due to be bought again.
Sales by Payment Mode	Bills, sales, collected and due per payment mode.
Schedule Drug Register (H, H1, X)	The scheduled-drug register (see Drug Registers).

An example report: Sales Register.

Purchase reports (6)

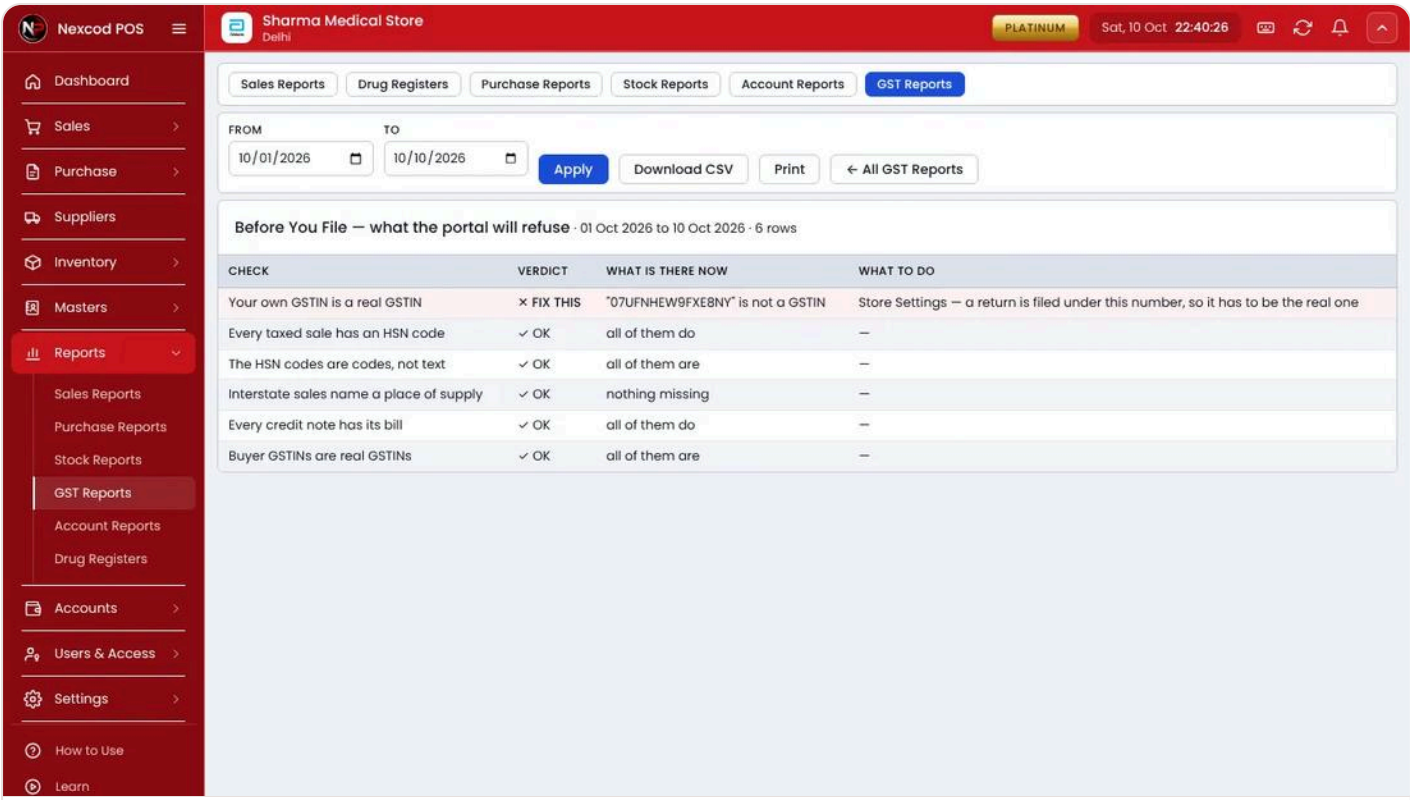

REPORT	WHAT IT SHOWS
Purchase Register	Every purchase bill.
Purchase Register (with Items)	Every purchase line.
Product Purchase: Bill by Bill	Each purchase of each medicine.
Supplier-wise Purchase Summary	Totals per supplier.
Purchase Return Register	Every purchase return.
Purchase Abstract (Monthly)	Purchases month by month.

Stock reports (12)

REPORT	WHAT IT SHOWS
Rack-wise Stock	Stock by rack: product, brand, stock (strips + loose and packs), MRP, expiry, value.
Stock Register (Current)	Current stock with composition, brand, category, unit, rack, purchase/sale rate, MRP, value.
Stock Unit Audit	Finds wrong quantities caused by pack and unit mistakes.
Schedule Drug Register (H, H1, X)	Scheduled-drug sales register.
Near-Expiry Stock (next 90 days)	Batch, expiry, days left, qty, rate, value at risk, supplier, purchased on, PO and bill no.
Expired Stock	Expired batches.
Fast Moving Stock	Best sellers: qty sold, bills, sales value, current stock.
Non-Moving Stock	No sale in the range, with blocked value.
Out of Stock	Zero-stock medicines.
Low Stock (below alert level)	Stock, alert level, unit and supplier to reorder from.
Rack-wise Stock (summary)	Medicines, quantity and value per rack.
Stock Transaction (Movements)	Every stock movement with in, out and balance.

GST reports (10)

REPORT	WHAT IT SHOWS
GSTR-1 · B2C Small (Table 7)	Place of supply, intra/inter-state, rate, bills, taxable value, CGST, SGST, IGST.
GSTR-1 · B2B invoice-wise (Table 4)	Bills to GST-registered buyers.
GSTR-1 · HSN Summary (Table 12)	HSN, description, UQC, qty, rate, taxable value and tax.
GSTR-1 · Credit Notes (Table 9B)	Sales returns as credit notes.
GSTR-1 · Documents Issued (Table 13)	Invoice and credit-note series from/to, total and missing numbers.
Before You File	Checks what the GST portal will refuse (e.g. own GSTIN not valid, sales without HSN), with a verdict and what to do.
GSTR-3B Summary	Outward supplies, credit notes, net outward, input tax credit and tax liability.
Purchase / ITC Register (rate-wise)	Input tax credit from purchases.
HSN-wise Purchase (Inward)	Purchases by HSN.
Outward Summary (rate-wise)	All sales by GST rate.

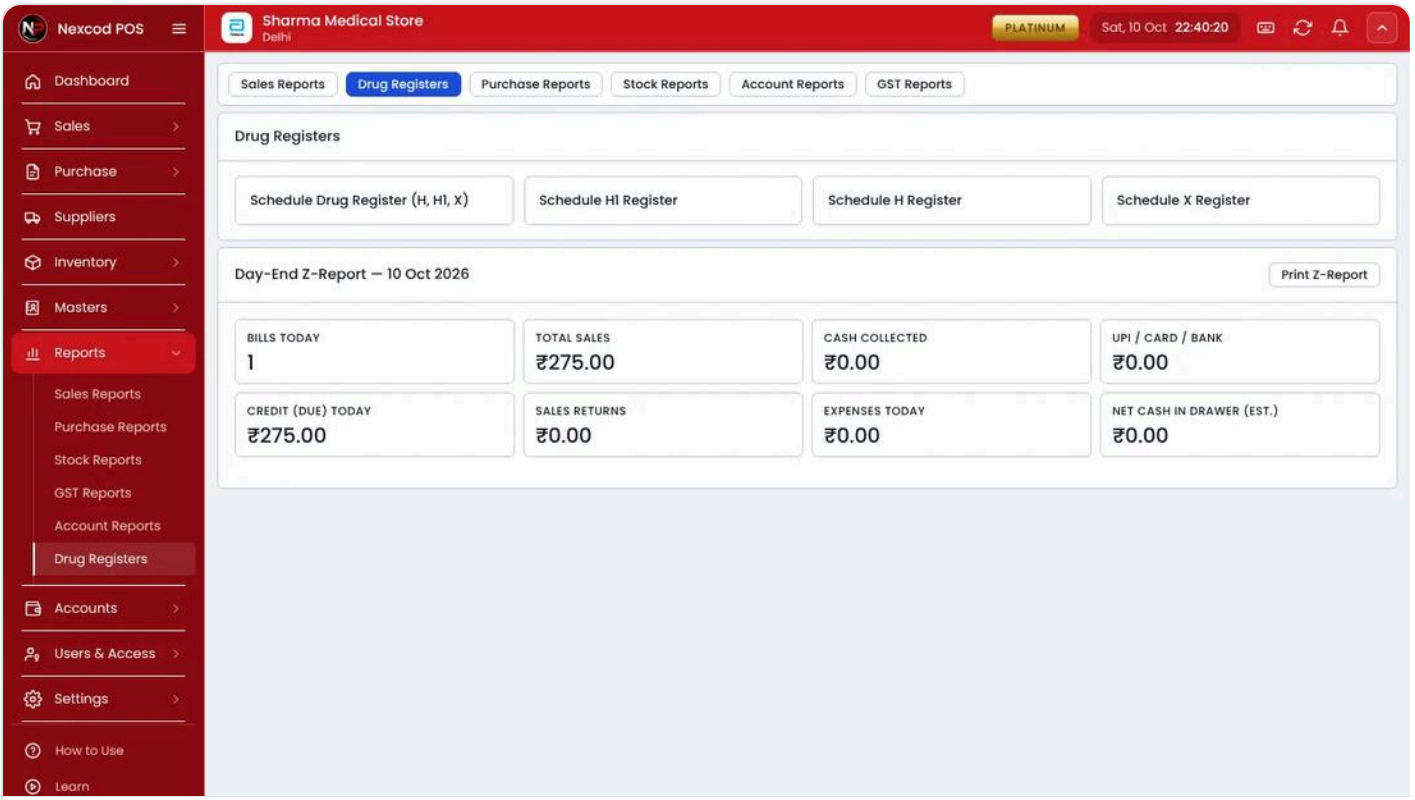

Before You File, the pre-filing check. The return itself is filed on the GST portal.

Account reports (12)

REPORT	WHAT IT SHOWS
Profit: Product-wise	Qty sold, revenue (excl. GST), purchase cost, profit, margin %.
Profit: Day-wise	Per day: bills, revenue, cost, gross profit, bill discounts, net profit.
Profit: Bill-wise	Per invoice: bill total, purchase cost, profit.
Cash Book	Cash in and out.
Day Close (Daily Cash Summary)	Per day: bills, sales, cash, UPI/card/bank, receipts, paid out, expenses, net cash in drawer.
Bank / UPI / Card Transactions	Digital money in and out.
Expense Report	Expenses by category.
Customer Outstanding	What each customer owes.
Supplier Payables	What is owed to each supplier.
Credit Notes (Sales Returns)	All credit notes.
Debit Notes (Purchase Returns)	All debit notes.
Profit & Loss Summary	Gross sales, returns, net sales, cost of goods, gross profit, expenses, net profit. It warns when sale lines have no purchase price (profit shown higher).

Drug registers (4)

Schedule Drug Register (H, H1, X), Schedule H1 Register, Schedule H Register and Schedule X Register. Columns: Date, Time, Bill no, Patient, Patient address, Mobile, Prescriber, Regn. no, Prescriber address, Medicine, Schedule, Mfr/Brand, Batch, Expiry, Qty supplied, Dispensed by. Filled from the bills as they are made, ready to show an inspector.

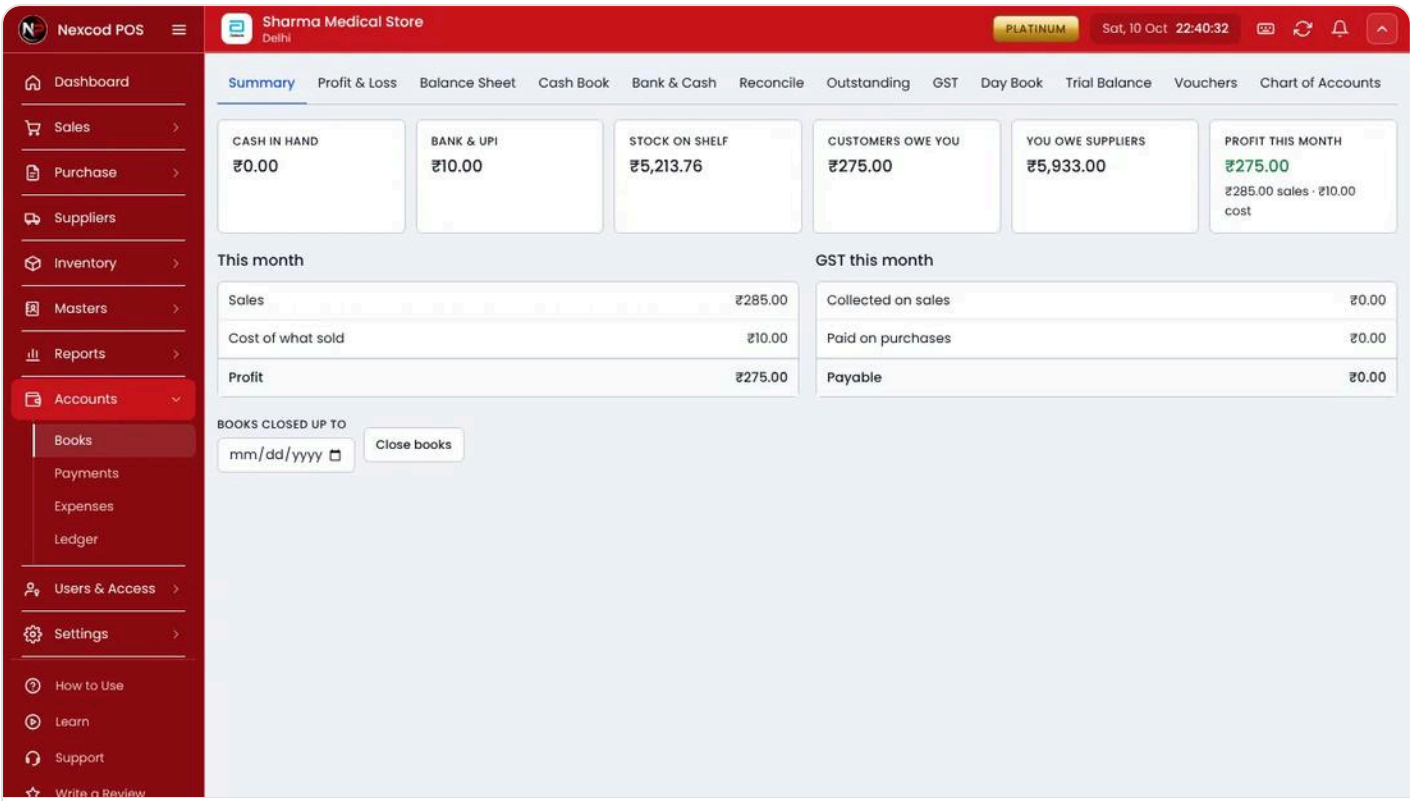

Drug registers.

MENU: ACCOUNTS › BOOKS · DASHBOARD: BOOKS

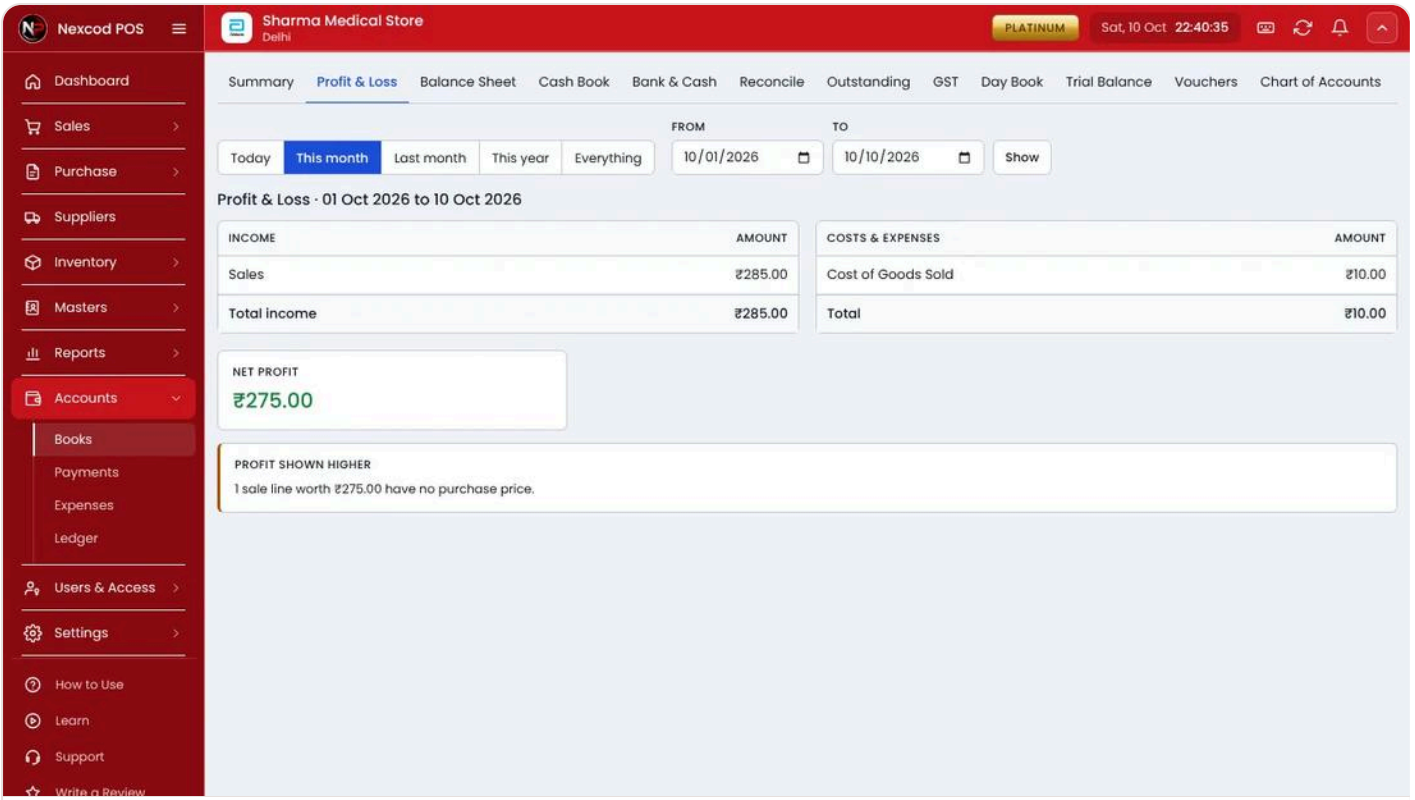

Books

Double-entry books built from the bills, purchases and payments already recorded. No separate accounting entry is needed.

Books, Summary tab.

TAB	WHAT IT HOLDS
Summary	Cash in hand, Bank & UPI, Stock on shelf, Customers owe you, You owe suppliers, Profit this month; this month's sales, cost and profit; GST collected, paid and payable. **Books closed up to** + **Close books** locks a period.
Profit & Loss	Income vs costs and expenses, net profit. Periods: Today, This month, Last month, This year, Everything, or From–To.
Balance Sheet	What the business owns vs what it owes and the owner's stake, as at a date.
Cash Book	Every cash movement with running balance.
Bank & Cash	Cash in hand, bank and UPI accounts with balances, Statement, Edit details, Reconcile. **Add a bank account**: name, bank, account number, IFSC.
Reconcile	Match book entries to the bank statement with bank dates; shows balance as per books vs bank.
Outstanding	Customers who owe and suppliers owed, by age: 0–30, 31–60, 61–90, over 90 days.
GST	Output tax, input credit and payable, with links to the filing check and GSTR tables.
Day Book	All vouchers by kind (sales, purchases, receipts, payments, contra, journal, returns, expenses, opening). **Export to Tally**.
Trial Balance	Debit and credit of every ledger, as at a date.
Vouchers	Manual Receipt, Payment, Contra and Journal vouchers (for drawings, loans and similar).
Chart of Accounts	All ledgers (Cash in Hand, Bank, UPI/Wallet, Receivable, Stock, GST Input Credit, Payable, GST Payable, Sales, Round Off, Cost of Goods Sold, Stock Written Off…) with opening balances.

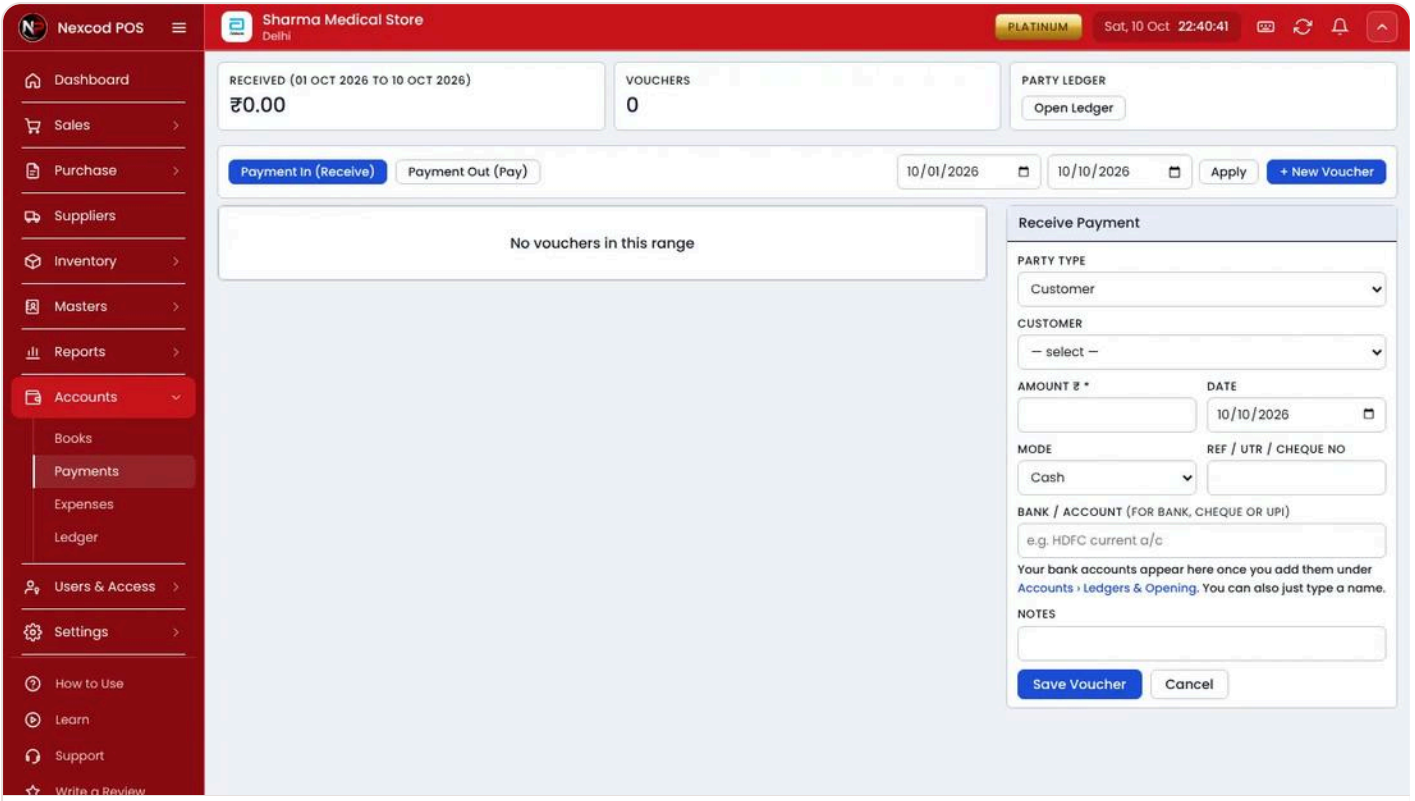

Profit & Loss, with the warning that profit is shown higher when a sale has no purchase price.

MENU: ACCOUNTS › PAYMENTS · DASHBOARD: ADD PAYMENT

Payments

Payment In (Receive) records money from customers; **Payment Out (Pay)** records money to suppliers. A payment is numbered as a voucher, allocated to the oldest outstanding bills, updates the ledger and can be reversed.

+ New Voucher fields: Party type (Customer, Supplier, Other), the party (dues are shown beside the name), Amount, Date, Mode (Cash, UPI, Card, Bank transfer, Cheque, or Split), Ref / UTR / cheque no, Bank / account, Notes. **Open Ledger** jumps to the party ledger.

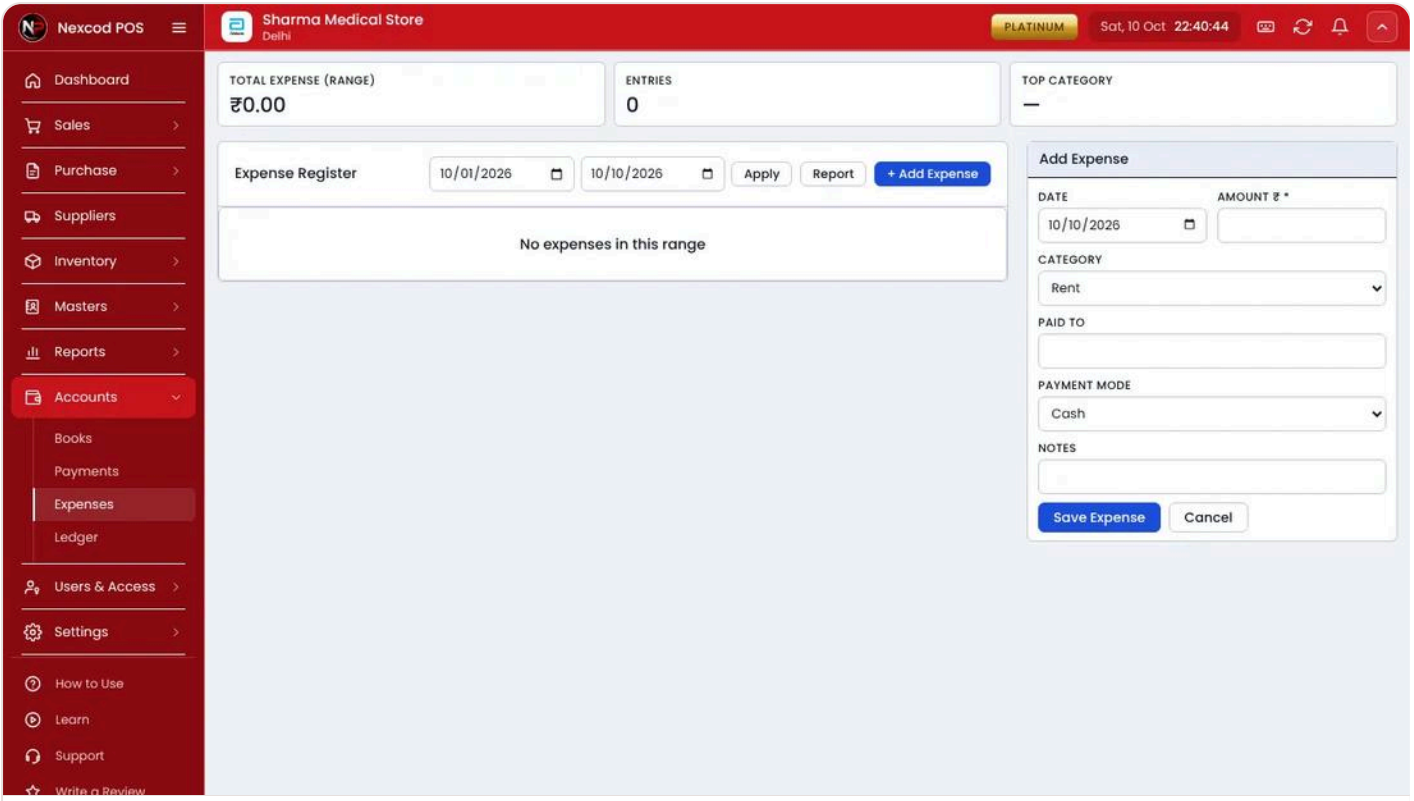

Receiving a payment.

MENU: ACCOUNTS › EXPENSES

Expenses

Rent, electricity, salaries and the rest, so profit is what is left after them. The page shows total expense for the range, entries and the top category, with a **Report** button.

+ Add Expense: Date, Amount, Category (Rent, Electricity, Salary, Transport, Internet/Phone, Stationery, Maintenance, Tea/Refreshment, Bank Charges, Licence/Renewal, Misc), Paid to, Payment mode (Cash, UPI, Card, Bank Transfer), Notes.

Adding an expense.

MENU: ACCOUNTS › LEDGER · DASHBOARD: PARTY LEDGER

Party Ledger

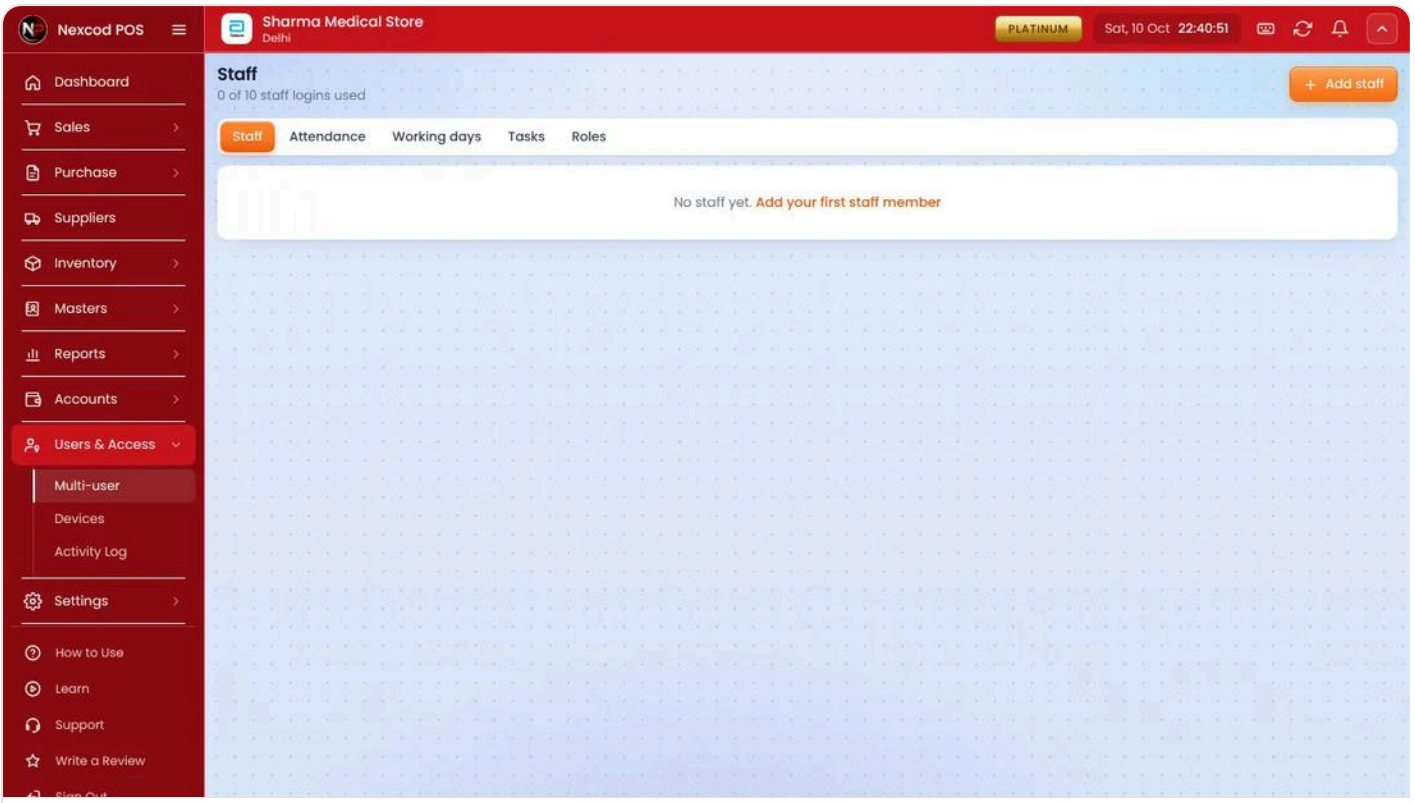

A full statement for any customer or supplier, or any account ledger. Choose Party type (Customer or Supplier) and the party, *or* a ledger (Cash in Hand, Bank, Sales…), set From and To and press **View Ledger**. Every bill, return and payment appears with a running balance.

PART 7 · SHOP ADMINISTRATION

MENU: USERS & ACCESS › MULTI-USER · DASHBOARD: STAFF LOGINS

Staff, roles and attendance

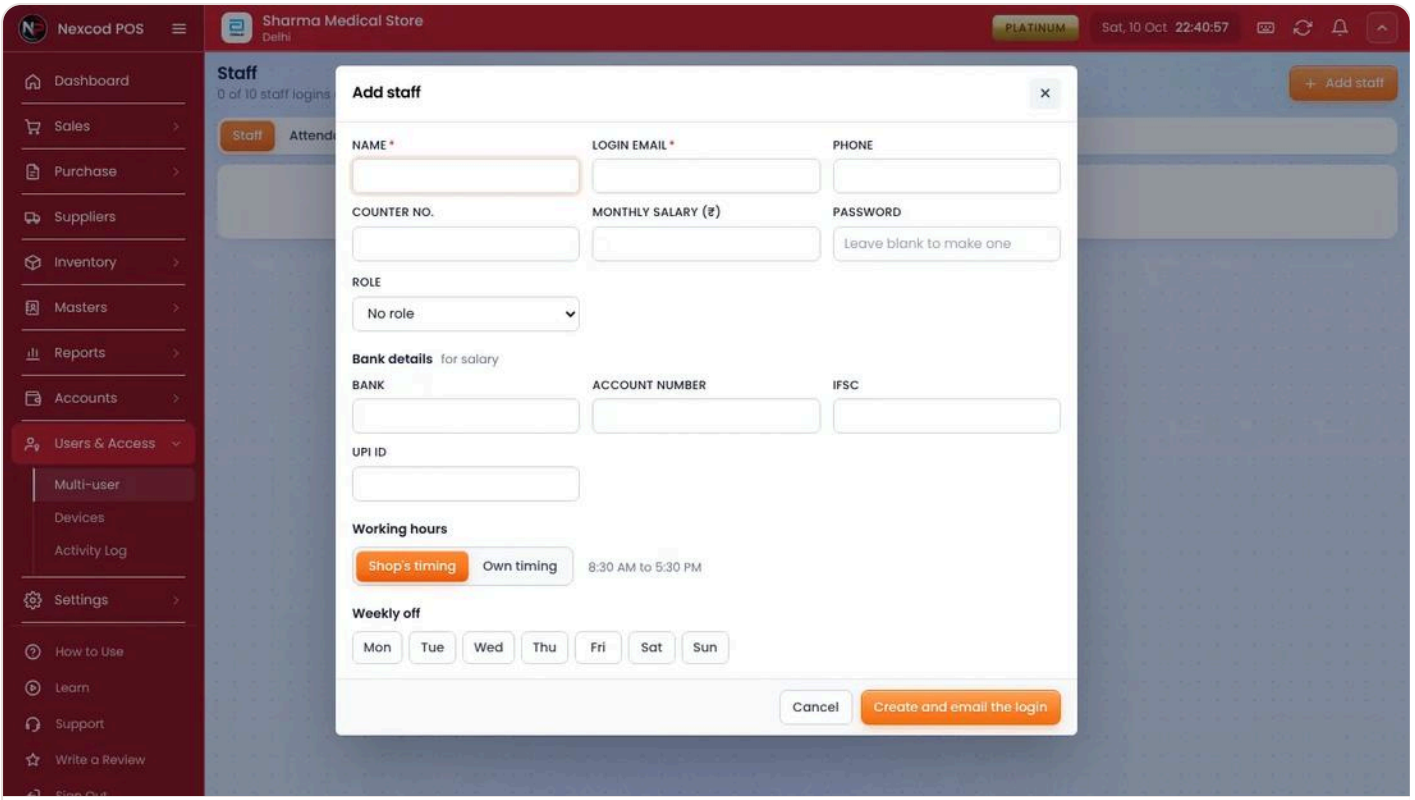

Each counter person signs in as themselves and every bill records who made it. The page shows how many staff logins are used (10 in the demo plan).

Staff with its five tabs.

Add staff

Name, Login e-mail, Phone, Counter no., Monthly salary, Password, Role (Cashier, Manager, Supervisor or a custom role), Bank details for salary (bank, account number, IFSC, UPI ID), Working hours (shop's timing or own timing) and Weekly off. Press **Create and email the login**. A 6-digit code goes to the staff member's e-mail; the login works only after the code is entered, so a mistyped e-mail cannot reach the shop.

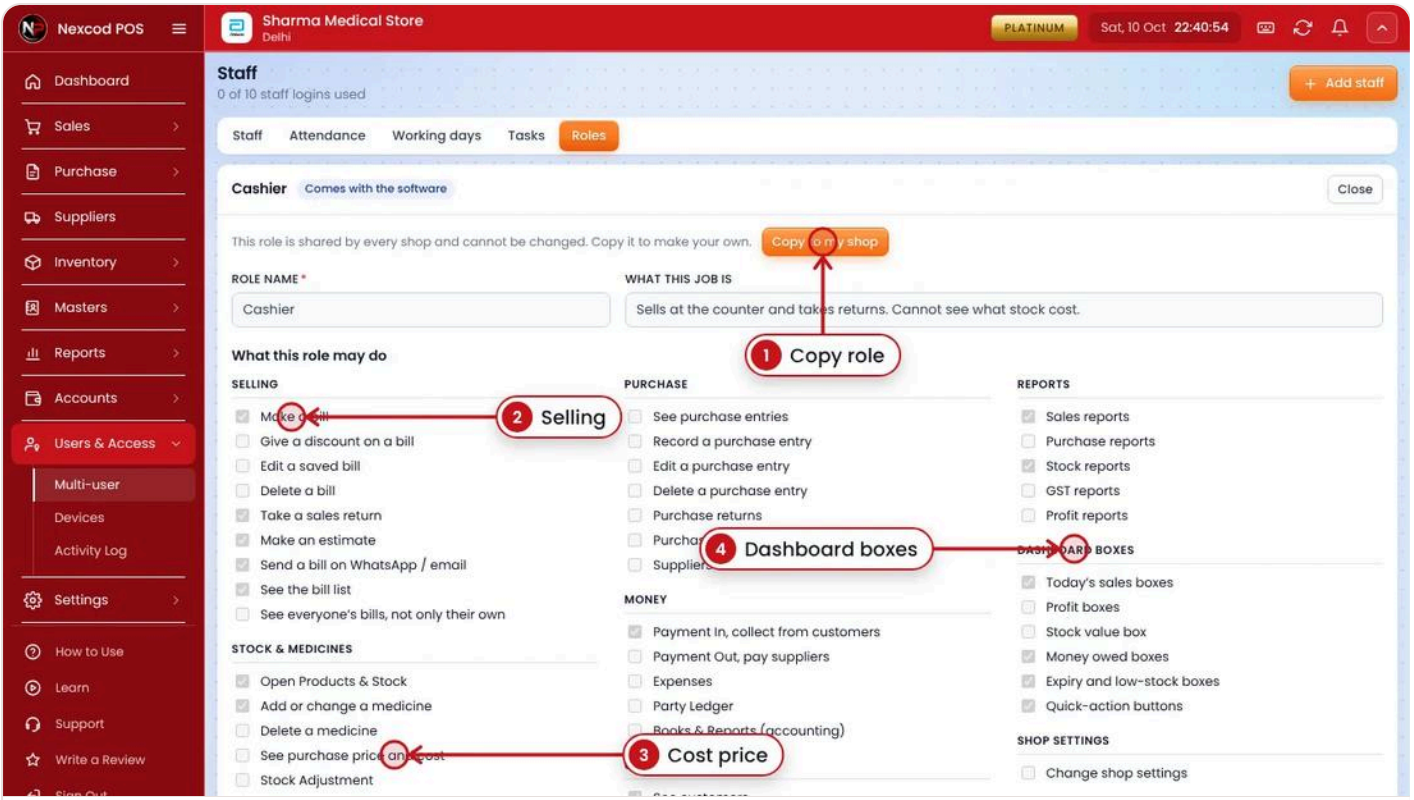

Adding a staff member.

Roles and permissions

Three ready-made roles come with the software: **Cashier** (sells and takes returns, cannot see cost; 26 of 55 switches), **Supervisor** (a cashier who may also discount, correct a bill and count stock; 32 of 55) and **Manager** (runs the shop day to day; 53 of 55). Ready-made roles cannot be changed; **Copy** one to make your own, or press **New role**.

GROUP	SWITCHES
Selling	Make a bill · Give a discount · Edit a saved bill · Delete a bill · Take a sales return · Make an estimate · Send a bill on WhatsApp/e-mail · See the bill list · See everyone's bills, not only their own
Stock & medicines	Open Products & Stock · Add or change a medicine · Delete a medicine · See purchase price and cost · Stock Adjustment · Stock Check · Stock Registers · Print barcode labels
Purchase	See purchase entries · Record · Edit · Delete a purchase entry · Purchase returns · Purchase orders · Suppliers
Money	Payment In · Payment Out · Expenses · Party Ledger · Books & Reports (accounting)
Customers & doctors	See customers · Add or change a customer · See what customers owe · Doctors · Patients
Clinic	The day's queue · Record a consultation, vitals, complaint · Write or change the prescription · Bill a visit · Change services and rates
Reports	Sales · Purchase · Stock · GST · Profit reports
Dashboard boxes	Today's sales · Profit · Stock value · Money owed · Expiry and low-stock boxes · Quick-action buttons
Shop settings	Change shop settings
Everything else	Demand Register · Store Documents · Activity Log · Use the Android app

Permissions apply on the website and on the phone at once. Switching off "Use the Android app" signs the person out of the app.

The Cashier role and its switches.

1. Built-in roles cannot be changed: Copy to my shop to edit.
2. Each switch allows one action, e.g. Make a bill.
3. Hide purchase prices from counter staff.
4. Choose which dashboard boxes the person sees.

Attendance, working days, tasks

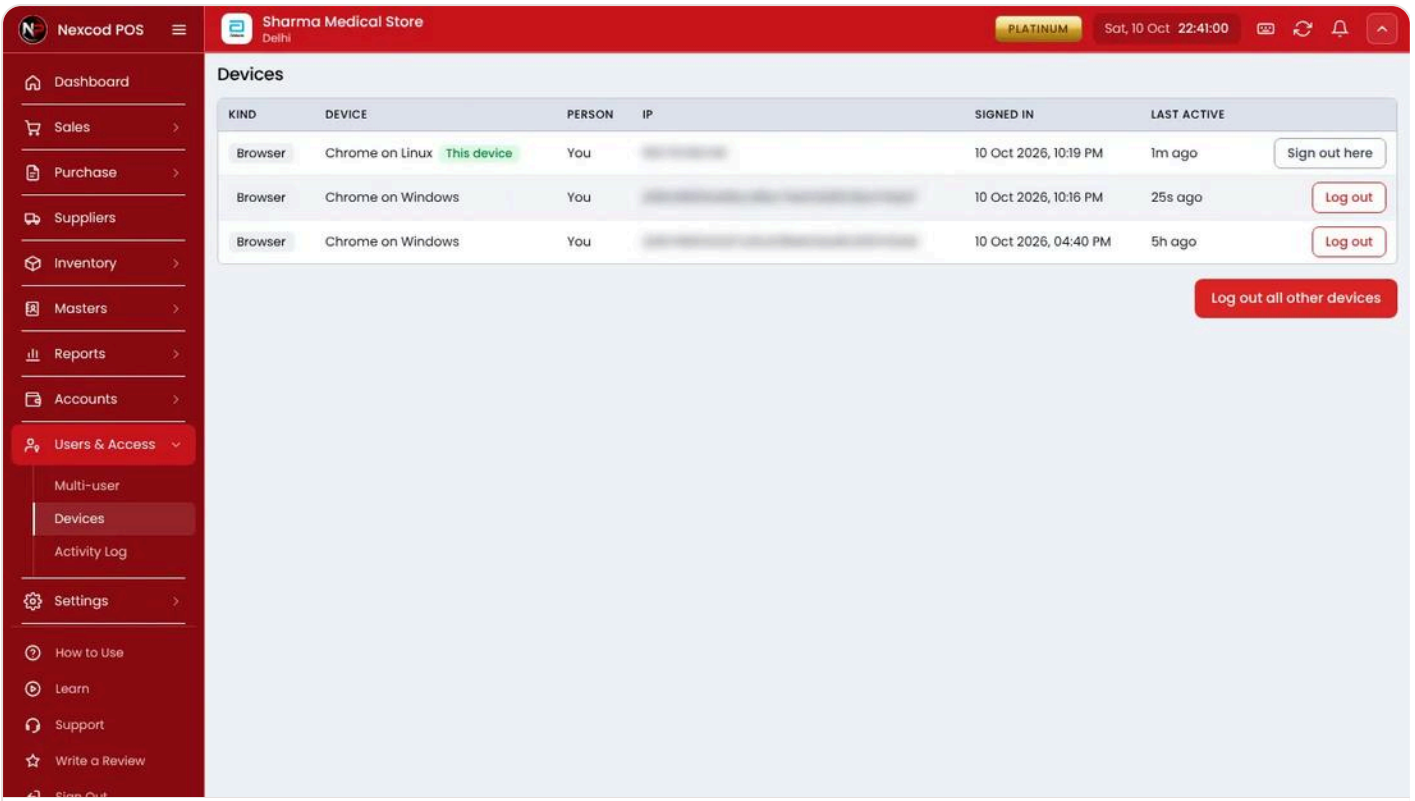

- **Attendance:** attendance waiting for approval and who is on shift today. Staff punch in from the Android app with a photo (Full or Half day); the day counts toward salary after the owner approves it. Shops can approve automatically.
- **Working days:** working days in the month (e.g. October 2026: 31 days less 4 Sundays = 27) and each person's monthly salary, per-day and half-day rate.
- **Tasks:** work assigned to staff.
- Salary is earned per present day; bonus and deduction can be added against a month; payslips show attendance, earnings and payments.

Shop timing, grace minutes, auto-approval, reminders, the shop's location and allowed distance, and a registered shop computer for staff without phones are set in `Settings › Store Settings › Staff and attendance`.

MENU: USERS & ACCESS › DEVICES · ACTIVITY LOG

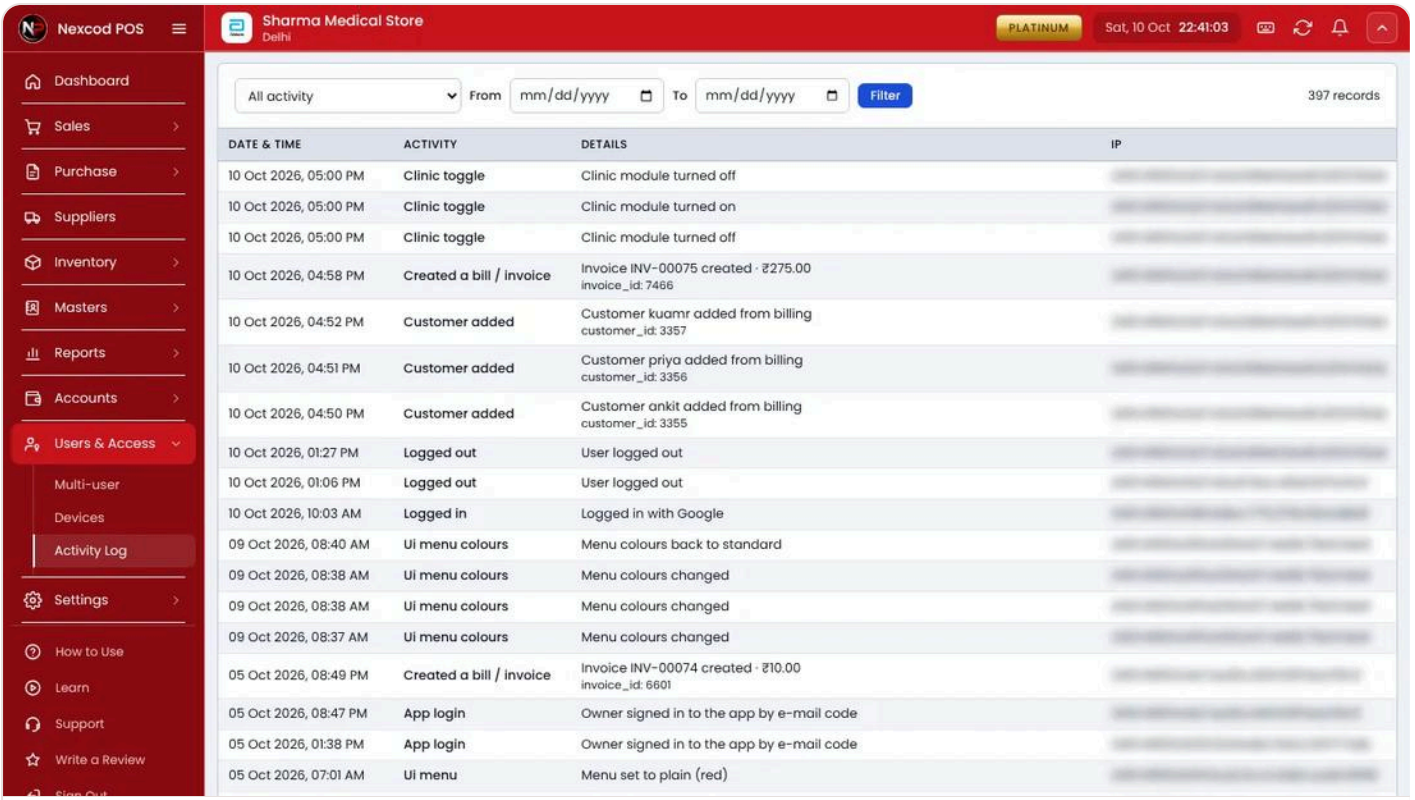

Devices and Activity Log

Devices lists every signed-in browser or phone: kind, device (e.g. Chrome on Windows), person, IP, signed in, last active. **Log out** a single device, or **Log out all other devices**.

Devices (IP addresses blurred).

Activity Log records what was done, by whom and when: logins, bills created, edited or deleted, prices changed, stock adjusted, customers added, WhatsApp sent, data exports and more. Filter by activity type and dates. Owners see the whole store; a staff member sees only their own work.

Activity log.

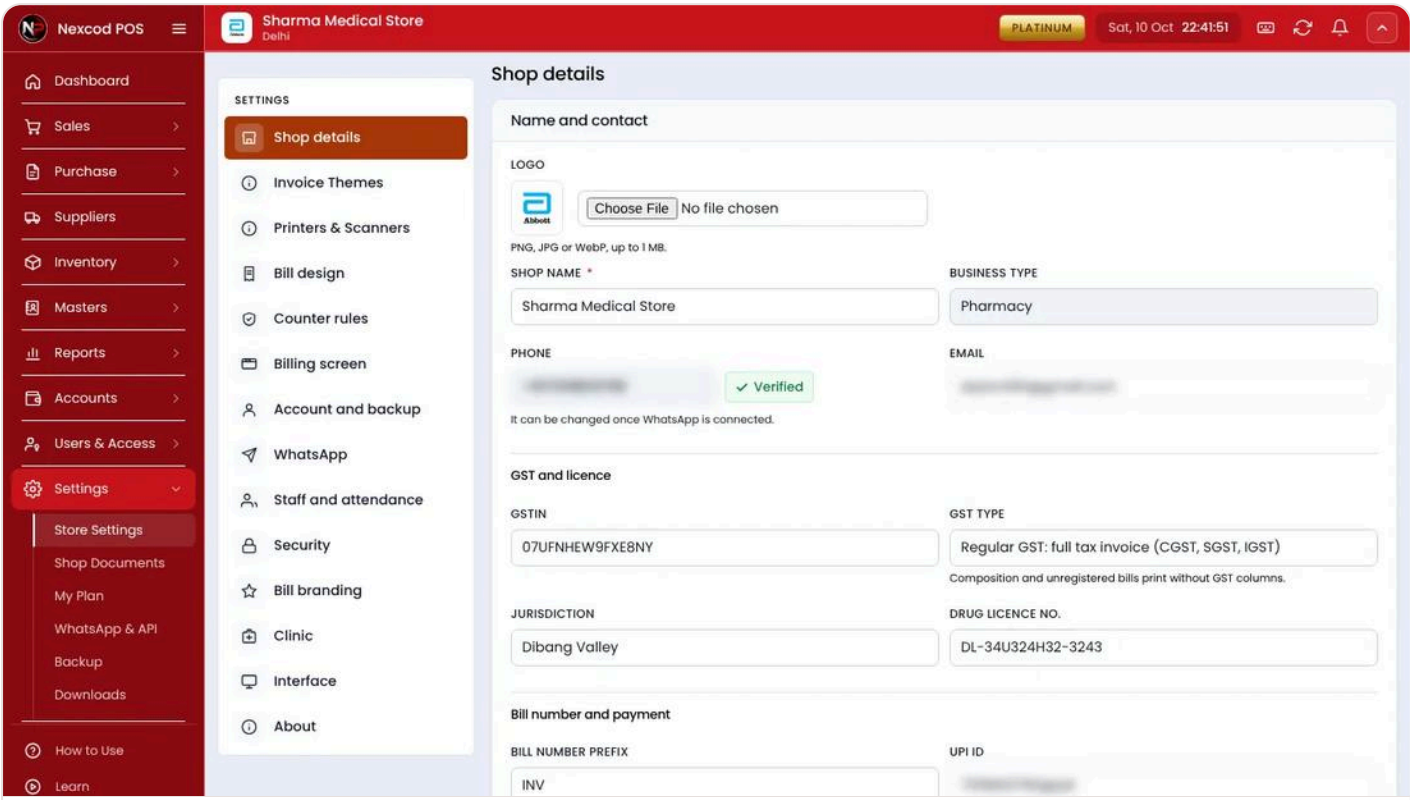

MENU: SETTINGS › STORE SETTINGS · DASHBOARD: SETTINGS

Store Settings

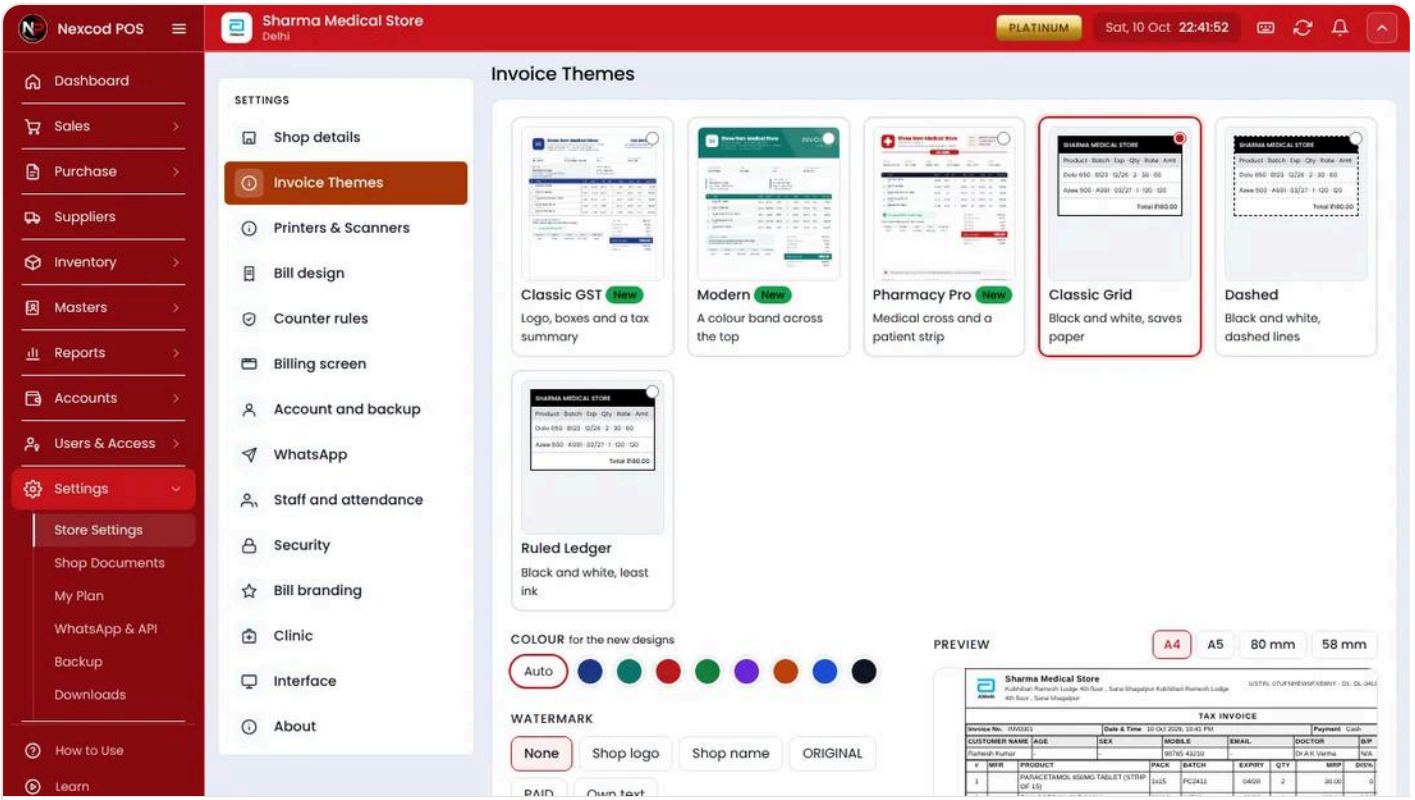

Fourteen sections, listed down the left of the page. Each has its own **Save**.

SECTION	WHAT IS SET THERE
Shop details	Logo (PNG/JPG/WebP up to 1 MB), shop name, business type, phone (verified; changeable once WhatsApp is connected), e-mail, GSTIN, GST type (Regular, Composition, Unregistered; the last two print without GST columns), jurisdiction, drug licence no., bill number prefix, UPI ID (prints a Scan-and-Pay QR with the amount), your own QR with a label, signature image, address.
Invoice Themes	Classic GST, Modern, Pharmacy Pro (new colour designs) and Classic Grid, Dashed, Ruled Ledger (black and white). Colour, watermark (None, Shop logo, Shop name, ORIGINAL, PAID, own text), festival greeting (Diwali, Eid, Holi, Christmas and 15 more). Preview at A4, A5, 80 mm, 58 mm.
Printers & Scanners	Bill printer through the print window, USB, Bluetooth or COM port; roll 80/58 mm; cut after bill; open cash drawer on cash bills; test print. Barcode scanner: USB, wireless, Bluetooth, COM, phone camera. Cash drawer and label printer. Saved per computer.
Bill design	Drag the bill's blocks into order (shop header, invoice details, customer strip, medicines table, totals, GST summary, Schedule H note, amount in words, terms and signature, QR codes, closing line) and save named layouts. Choose bill columns, paper size (58, 72, 76, 80 mm, A4, A5, Letter, Legal), margin and billing screen colour (white or yellow).
Counter rules	Block expired medicines · Block billing at no price · Stop a bill past a customer's credit limit · Block billing more than stock · Open the customer window on every new bill · Always show Edited marks on purchases · New purchase starts on Credit · Always show Challans in Invoices · Selling prices include GST (MRP billing).
Billing screen	Bill tabs (up to five bills, `F8` / `Shift` + `F8`), margin in medicine search (staff see it only with cost permission), customer's old due on the payment and the bill.
Account and backup	Your login (name, e-mail, phone). **Download my data**: products, bills, customers, stock and payments in one ZIP of Excel files. **Google Drive backup**: weekly copies to your own Drive, Back up now, Disconnect.
WhatsApp	Send bills from my WhatsApp (linked number) or from Nexcod WhatsApp. Bills go automatically; edit the message using {shop} {bill_no} {amount}

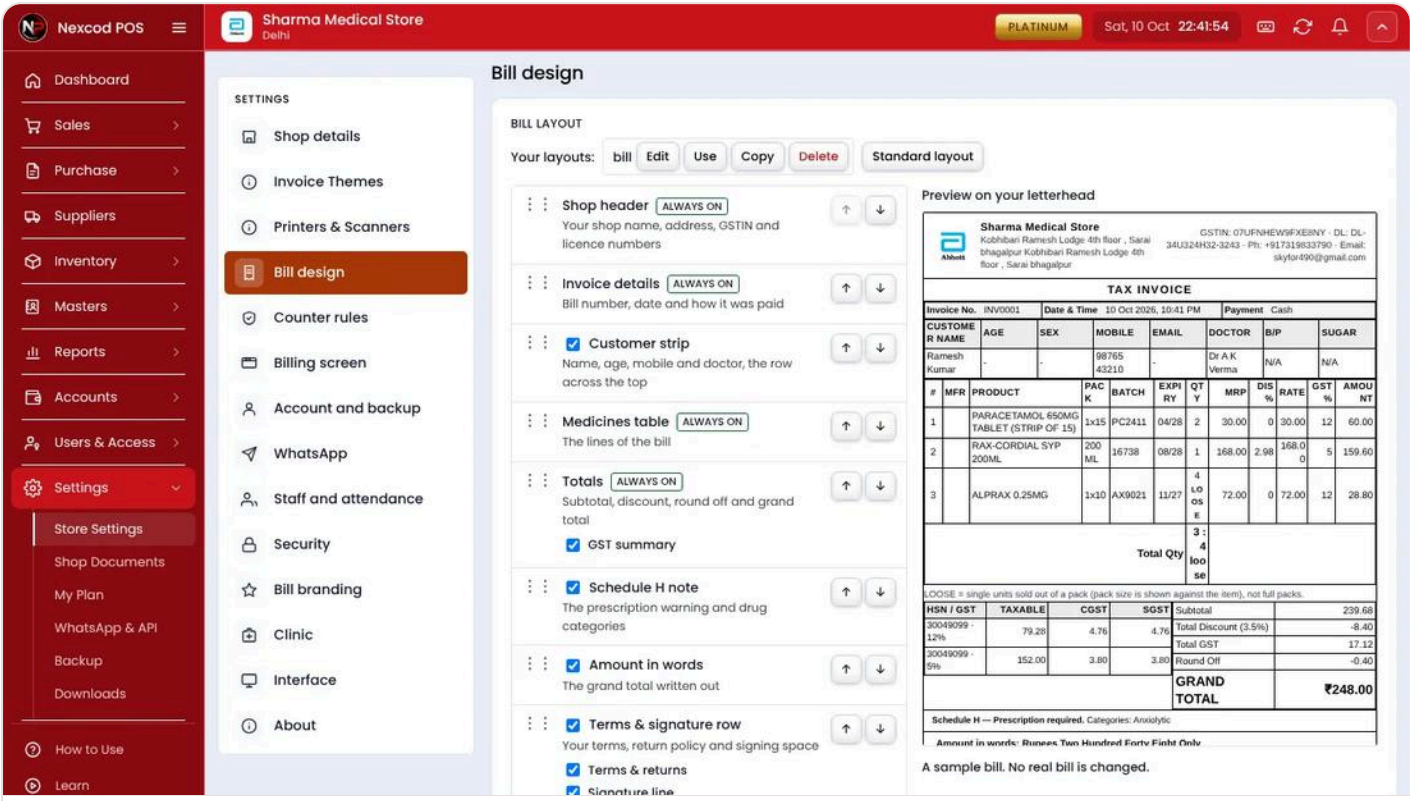

SECTION	WHAT IS SET THERE
	{date} {customer} {link}.
Staff and attendance	Opening and closing time, grace minutes, auto-approve, reminders, shop location and allowed distance, register the shop computer for attendance.
Security	Change password. Two-step login (e-mail code at every login). **Start again**: clears all bills, purchases, medicines and parties after an e-mailed code, keeping login, settings and plan (a safety copy is taken first).
Bill branding	The small "Generated by Nexcod POS" line; removed on paid plans.
Clinic	Run a clinic from this shop: appointments, vitals and prescriptions that print with the doctor's name and registration number. Turning it off hides the screens and keeps the records.
Interface	Screen brightness (Normal, Bright, Brightest), icon or plain menu, menu colours.
About	Version (Nexcod POS v3.0.0) and copyright.

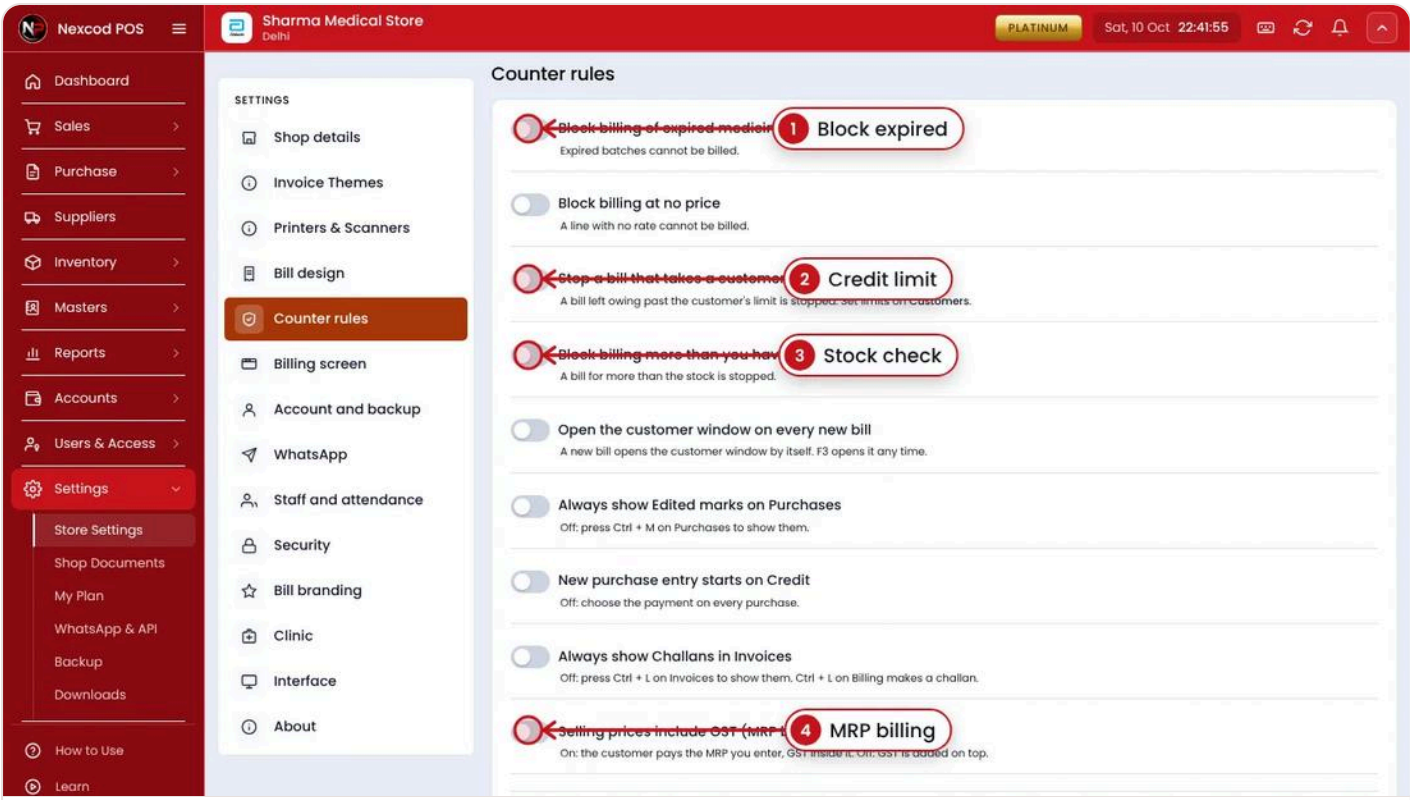

Shop details.

Invoice themes with watermark and festival options.

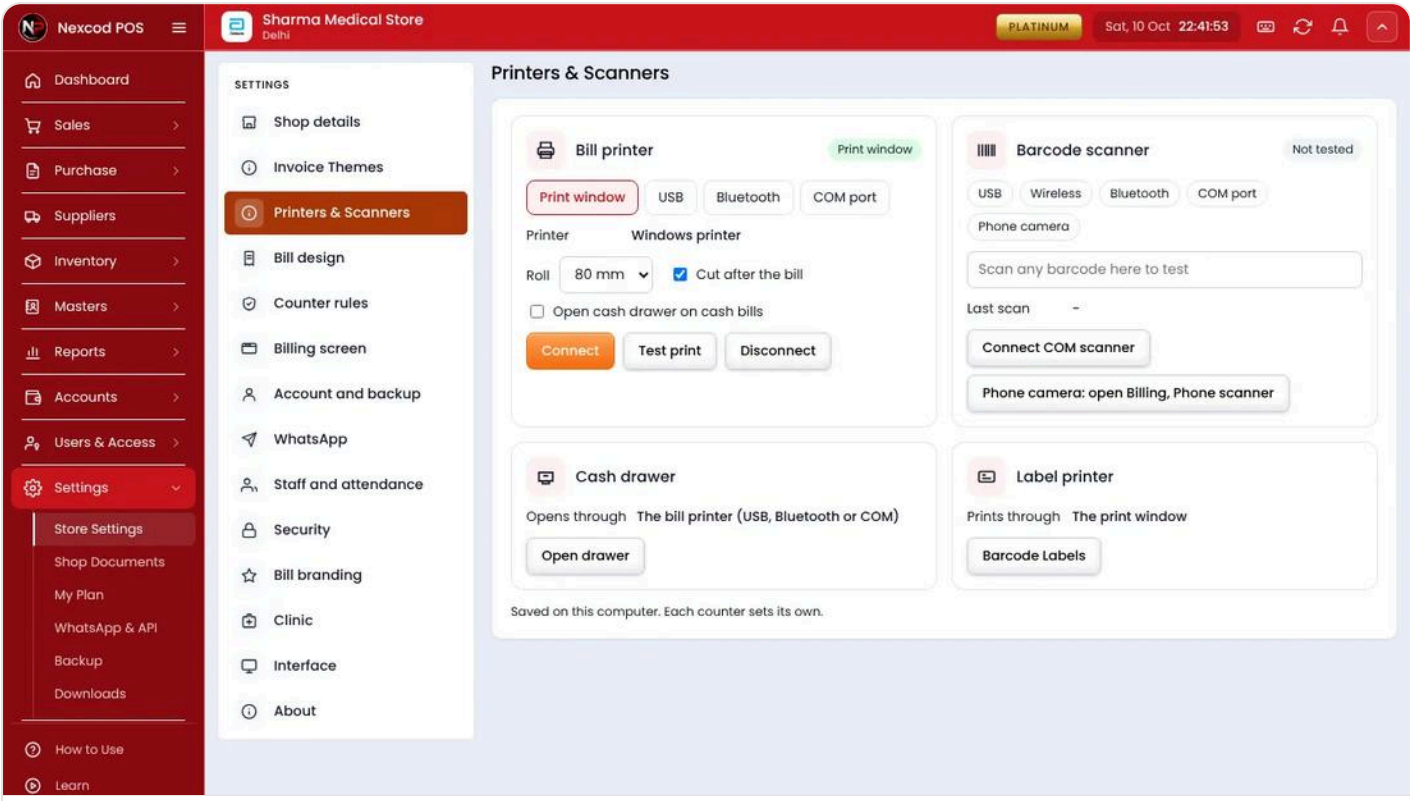

Bill design: drag blocks to arrange the printed bill.

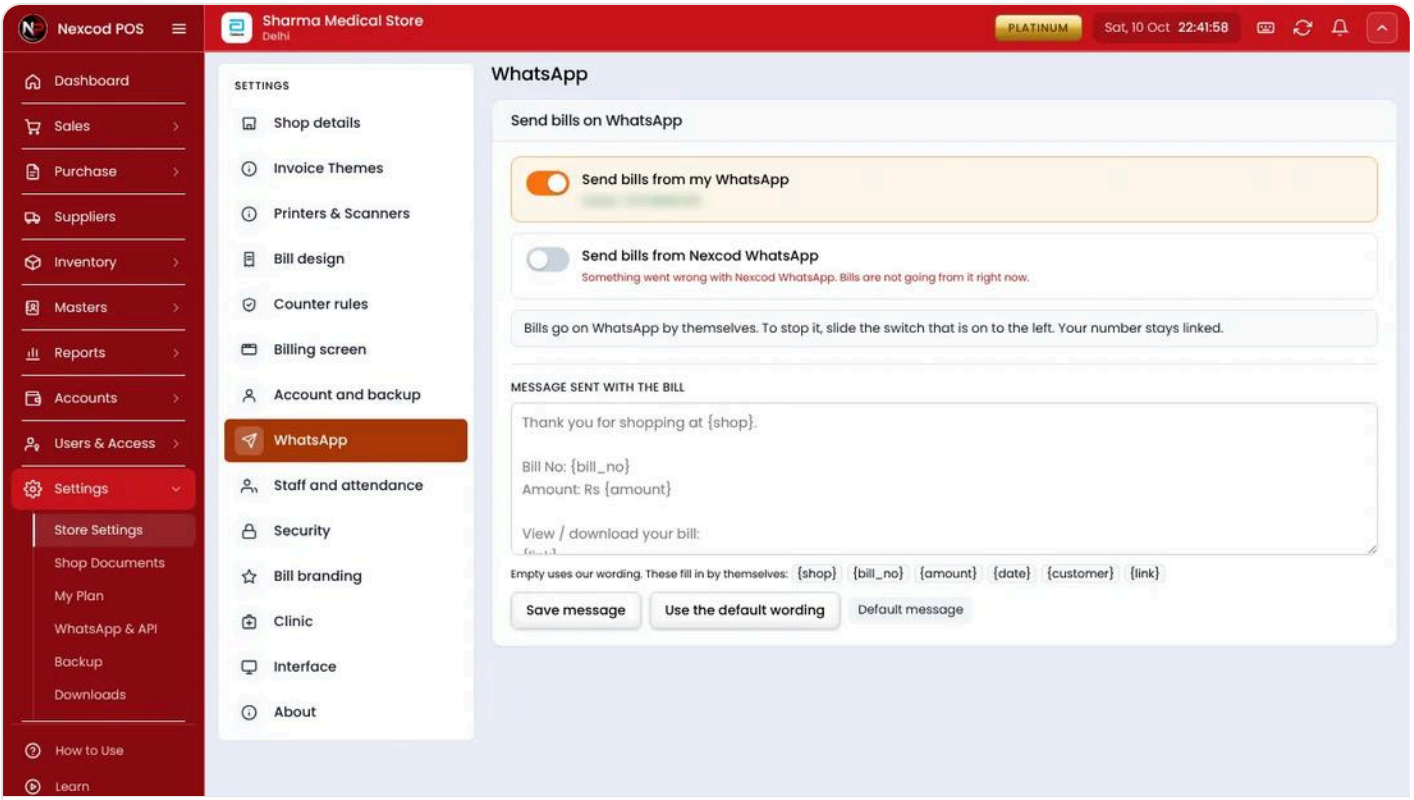

Counter rules.

1. Block billing of expired medicines.
2. Stop a bill past a customer's credit limit.
3. Block billing more than you have in stock.
4. Selling prices include GST (MRP billing).

Printers & scanners.

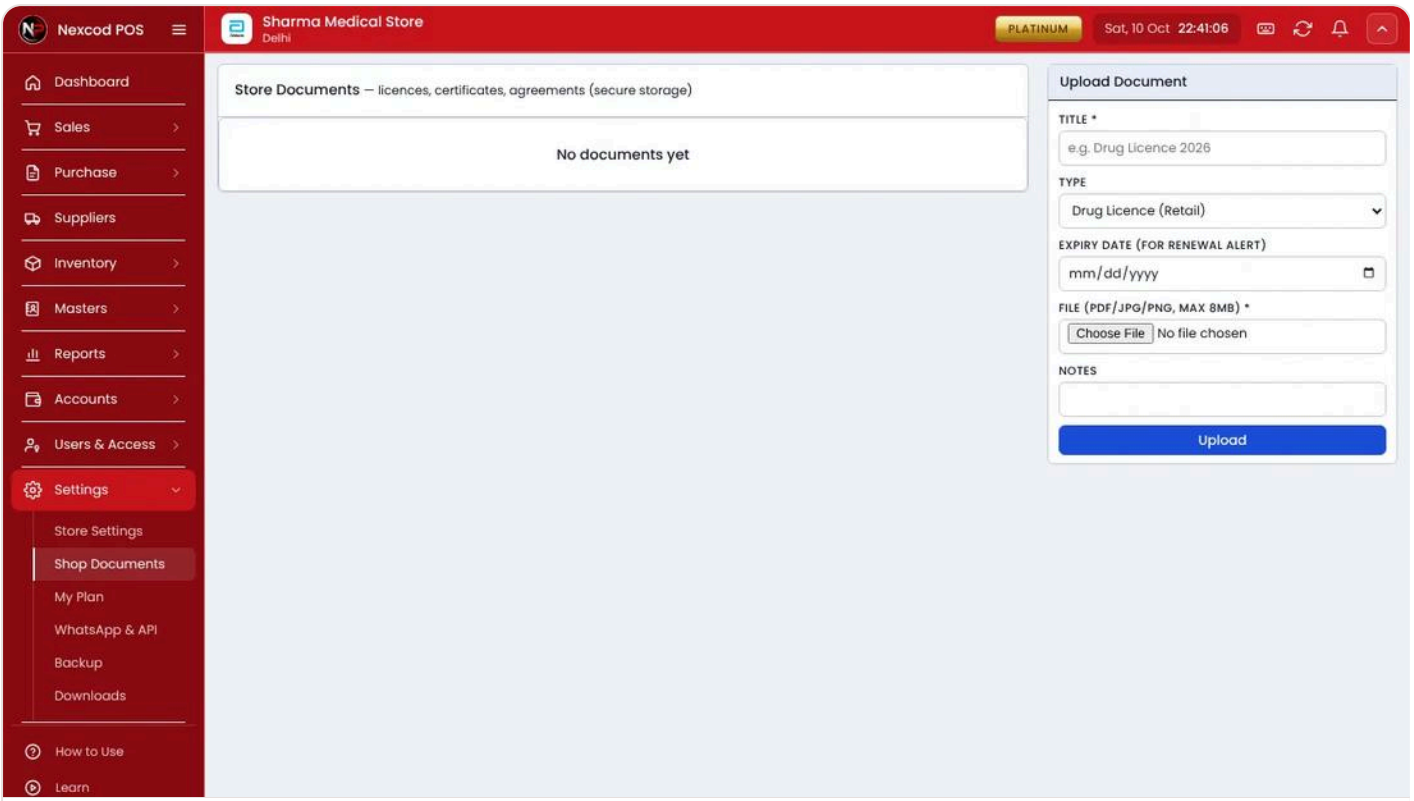

WhatsApp sending.

MENU: SETTINGS › SHOP DOCUMENTS

Shop Documents

Licences and certificates kept safely, with a warning before they expire. **Upload Document**: Title, Type (Drug Licence retail or wholesale, GST Certificate, Shop & Establishment, FSSAI Licence, Pharmacist Registration, Rent Agreement, Fire NOC, Trade Licence, Other), Expiry date (for the renewal alert), File (PDF/JPG/PNG up to 8 MB), Notes. A drug licence that lapses closes a shop; this page stops that from happening quietly.

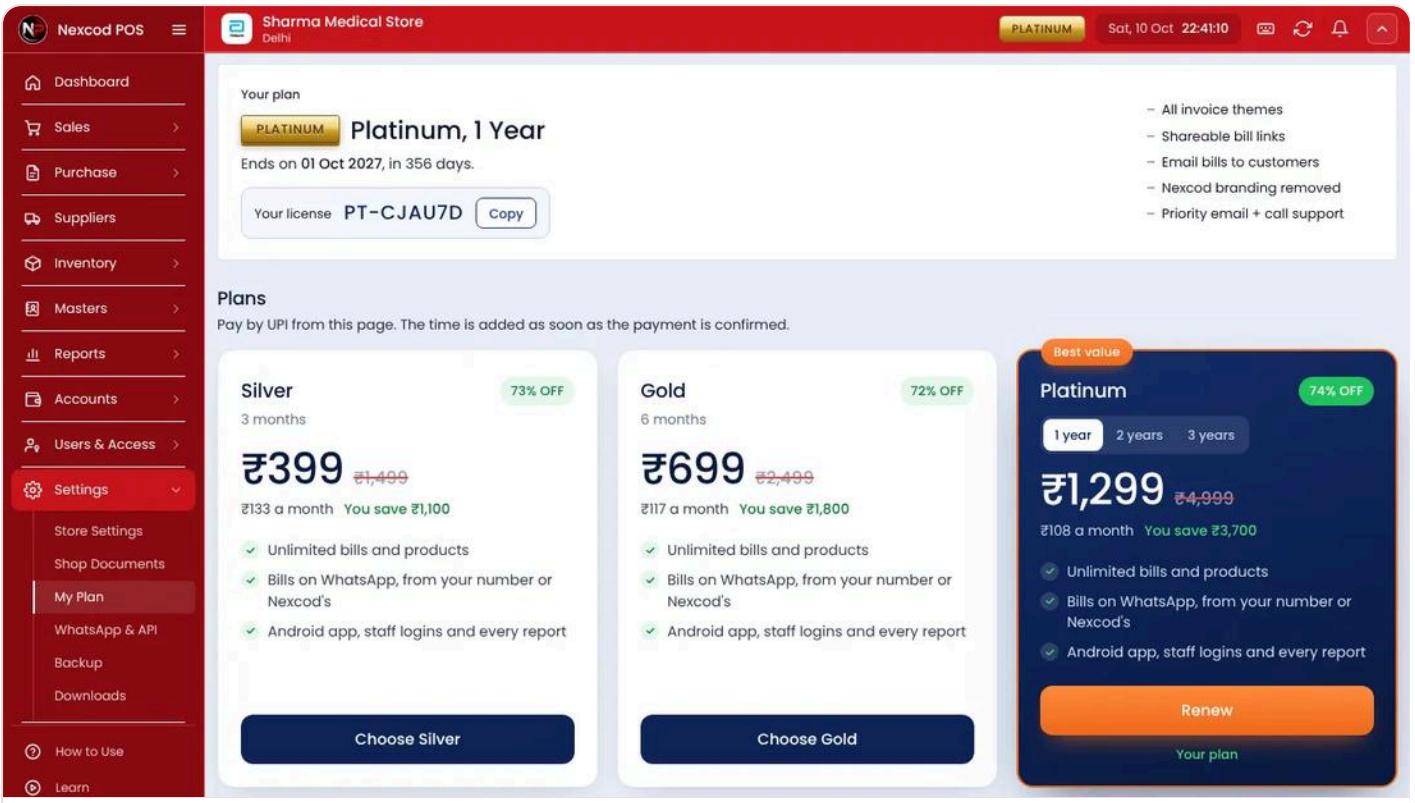

Store documents.

MENU: SETTINGS › MY PLAN · BACKUP · DOWNLOADS

My Plan, Backup and Downloads

My Plan shows the current plan and end date (for example "Platinum, 1 Year. Ends on 01 Oct 2027, in 356 days"), the licence key with Copy, what the plan includes, the plan cards to buy or renew by UPI, and the payment history (date, plan, amount, method, status, reference).

My Plan.

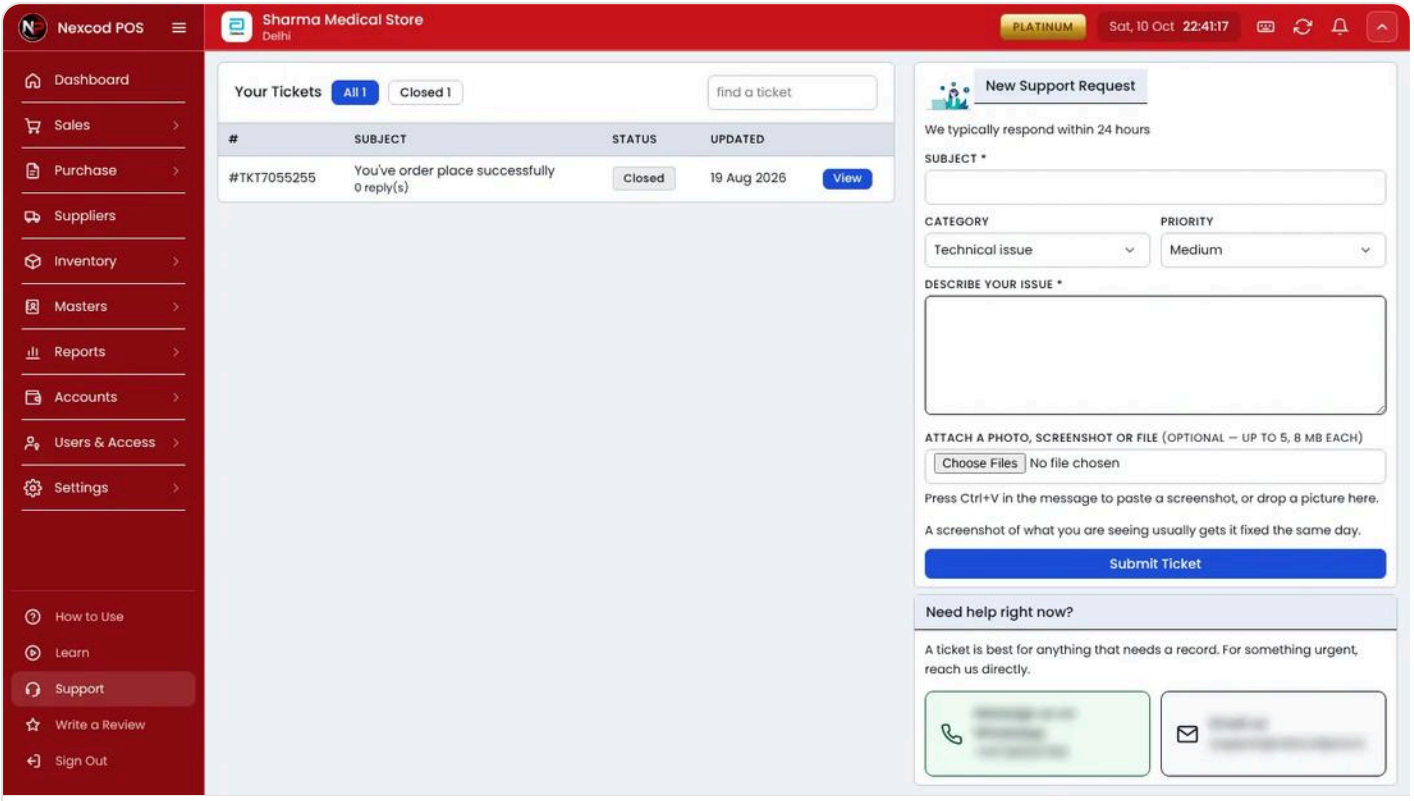

Backup downloads all the shop's data. Weekly Google Drive backup is set under Account and backup. **WhatsApp & API** opens the WhatsApp section of settings.

Downloads shows the apps: Android (Get it on Google Play) and Windows (shown as "Coming soon" at the time of writing).

MENU: SUPPORT · HOW TO USE · LEARN · WRITE A REVIEW

Help, Support and Reviews

- **How to Use** opens the written guide for every screen; **Learn** has the short video tutorials and guides.
- **Support**: your tickets (All, Closed, with View). **New Support Request**: Subject, Category (Technical issue, Billing/payment, Subscription, Feature request, Other), Priority (Low, Medium, High, Urgent), description, and up to 5 attachments of 8 MB (paste a screenshot with `Ctrl` + `V`). Replies usually come within 24 hours.
- **Need help right now?** WhatsApp +91 72819 21783 or e-mail support@nexcodpos.in.
- **Request a call back**: choose the registered or another number, what it is about and the best time to call.
- **Write a Review**: a rating out of five and a few lines; it is printed beside the shop's name and city only.

Support tickets and the call-back form.

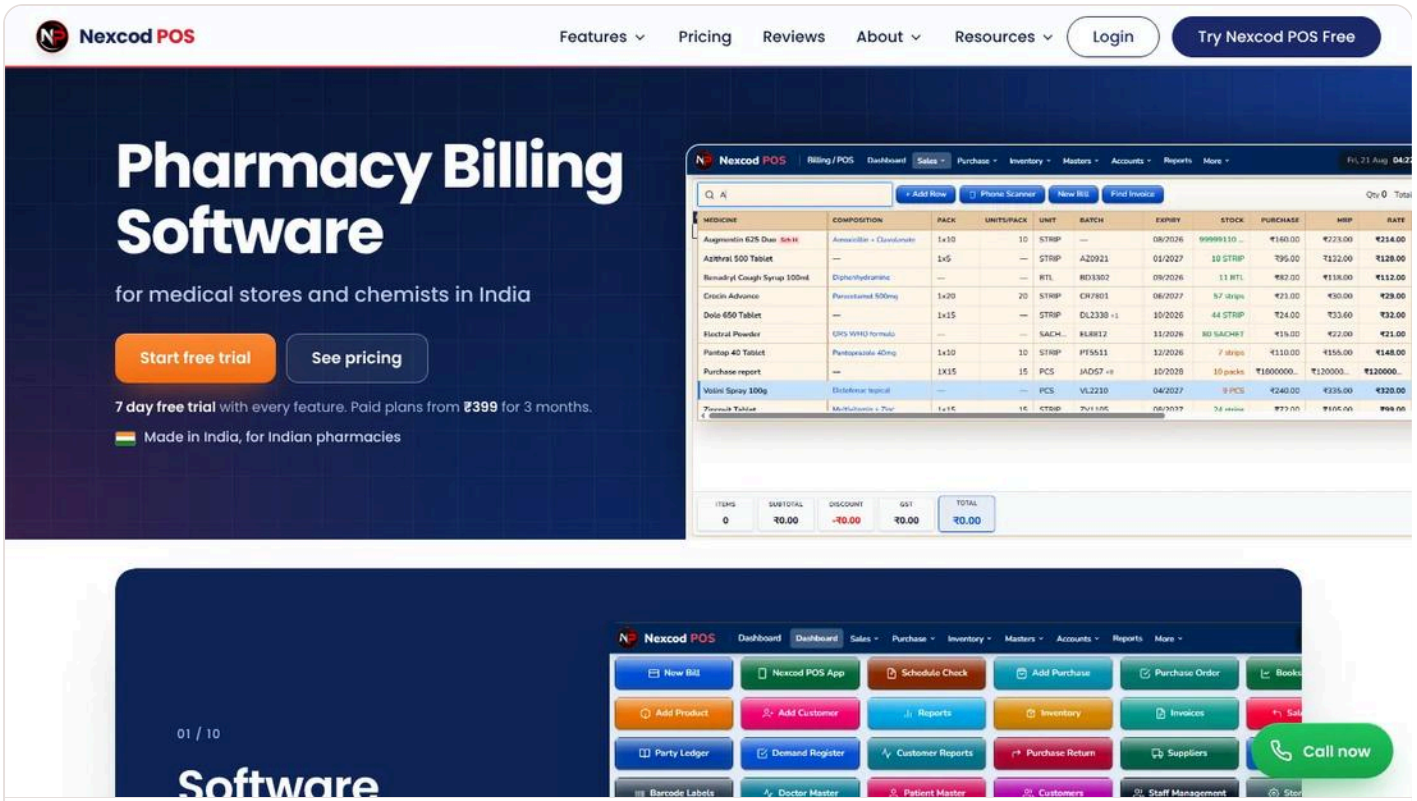

PART 8 · BEYOND THE COUNTER

Android app

The Nexcod POS app (Google Play: in.nexcodpos.app) works on the same account and data. Described from the company's guide:

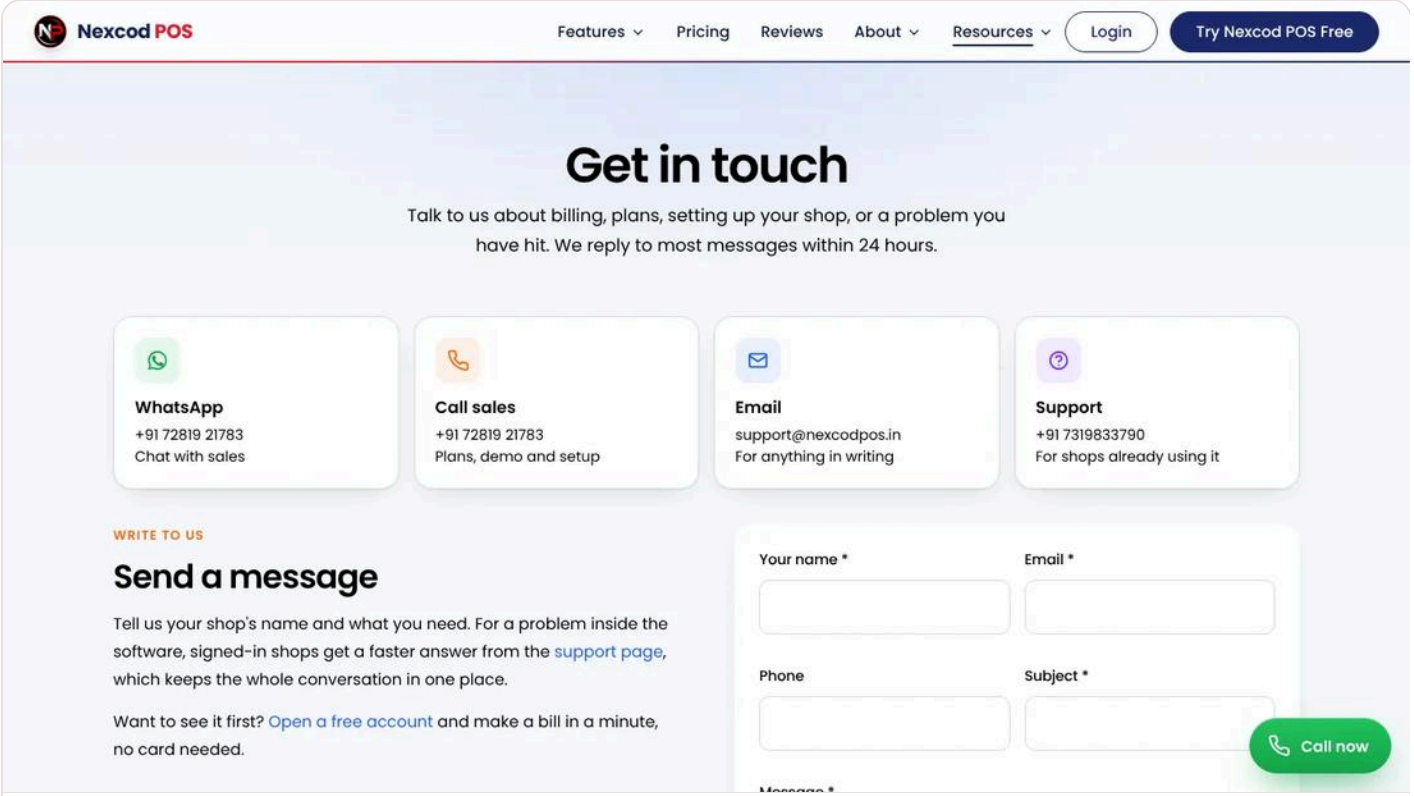

- **Sign in with a code** sent on WhatsApp or e-mail; no password to remember. **Use Scanner Only** turns the phone into the counter's barcode scanner without logging in.
- **Bill from the phone**: make a bill, pick a batch, take a payment against dues, add a product.
- **Home**: takings, bills, profit, what you are owed and owe, and a week of sales.
- **Stock**: Low, Out, Expiring and Expired filters with counts, showing the batch that expires first.
- **Customers**: who owes and since when, with a full ledger.
- **Books**: profit for today, this month or the year, cash and bank, P&L, Balance Sheet and Day Book.
- **Staff attendance** with a photo, owner approval, and owner controls for staff.
- **WhatsApp** any bill; notifications for stock alerts, attendance and salary.

Public website (nexcodpos.in)

The home page.

PAGE	PURPOSE
Home	Headline, start free trial, screen carousel, pricing, common questions.
Features	Every feature grouped by the work of a medical store.
Screenshots	The real screens.
Pricing	Plans and payment questions.
Reviews	Video and written reviews from pharmacies.
About, Founder, Team, Careers	Company story (founder Krishav Kumar Barman), team and open roles.
How to Use, Video Guides	Step-by-step written guide and tutorials.
Find My Bills	For a pharmacy's customers to see their own bills.
Contact	WhatsApp/Call sales +91 72819 21783, Support +91 73198 33790, support@nexcodpos.in, message form.
Privacy, Terms, Refund	Legal policies (DPDP Act 2023, 7-day refund on the first paid plan).

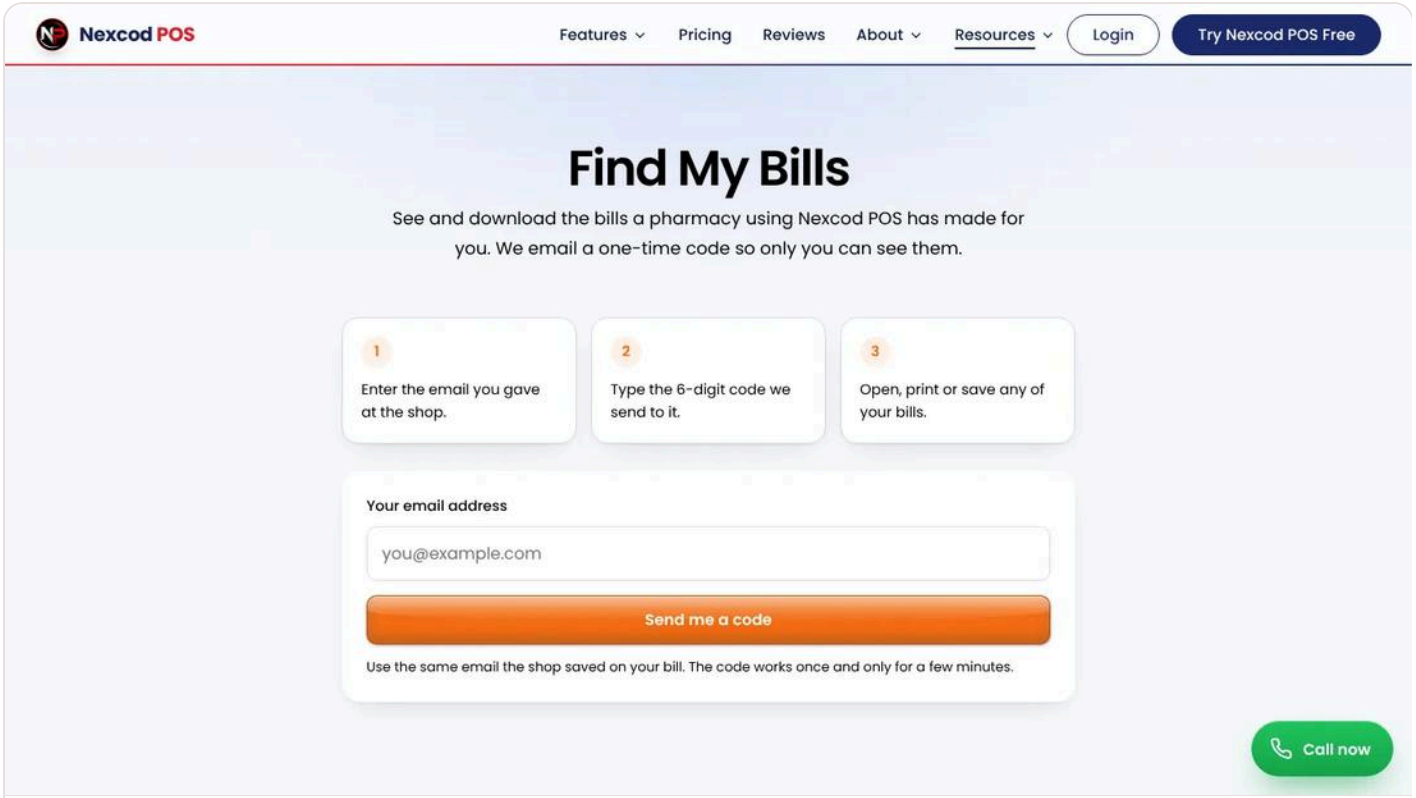

The contact page.

Find My Bills (for a shop's customers)

Customers of any pharmacy using Nexcod POS can see and download their own bills at `nexcodpos.in/find-my-bills`.

1. Enter the e-mail address given at the shop and press **Send me a code**.
2. Type the 6-digit code e-mailed (it works once, for a few minutes).
3. Open, print or save any of the bills.

Find My Bills.

PART 9 · REFERENCE

Keyboard shortcuts

Billing screen

KEYS	ACTION
`F2`	Search medicine (inside search: add a new medicine)
`F3`	Customer → patient → doctor window

`/`	Jump to the search box
`Alt` + `N` / `S` / `P`	New/Add · Save · Print
`?` · `Esc`	Show the shortcut list · close it
`Ctrl` + `M`	Purchases: show edited entries

Glossary

TERM	MEANING
Batch	One lot of a medicine from the maker, with its own number, expiry and printed MRP.
MRP	Maximum retail price printed on the pack. The selling rate cannot go above it.
Pack / units per pack	How the medicine is sold (1x10 strip) and how many tablets one pack holds; used for loose sales.
Loose sale	Selling part of a strip; priced from the pack's MRP.
Scheme / free goods	Extra quantity from a distributor, e.g. 10+1. Its cost is spread over all units.
Flat rate	The real cost per unit after scheme and discount.
HSN	The GST product code (most medicines 3004).
GSTIN	15-character GST registration number.
Composition scheme	A GST scheme where the shop charges no GST and issues a Bill of Supply.
B2B / B2CS	Sales to registered businesses / to consumers (small), as GSTR-1 groups them.
Schedule H / H1 / X	Prescription-only drug schedules. H1 and X need a register with patient, doctor and quantity.
Credit note / debit note	Document for a sales return / a purchase return.
Challan	A delivery note without a tax invoice.
Z-Report	The day-end summary used to close the counter.
Estimate	A price quote that moves no stock until converted to a bill.

Common questions

Does it work without installing anything?

Yes. It runs in a browser on a phone, tablet or computer. There is also an Android app.

Can more than one person bill at once?

Yes. Each person has their own login and every bill records who made it. New bill numbers are taken under a lock, so two counters cannot get the same number.

Does it file my GST return?

It produces the figures: GSTR-1 tables, GSTR-3B summary and a pre-filing check. The return is filed on the GST portal.

Can I sell loose tablets?

Yes. Enter the pieces in the loose box on the bill line. The price comes from the pack price and the stock reduces by the fraction sold.

What happens when the trial ends?

New bills need a paid plan; everything already entered stays in the account.

How do I keep a copy of my data?

Settings › Store Settings › Account and backup: Download my data (ZIP of Excel files) any time, and connect Google Drive for weekly backups.

A customer lost a bill. What can they do?

Send it again from Invoices on WhatsApp, or ask them to use nexcodpos.in/find-my-bills with the e-mail saved on their bill.

Notes for the product team

Points noticed while writing this manual from the live software. They are listed so the website, guide and software can be kept in step.

- **Windows app:** the website and FAQ describe a Windows app that bills offline; the in-app Downloads page shows Windows as "Coming soon".
- **Mobile sign-in:** the Mobile tab on the sign-in page says it is not available right now.
- **Nexcod WhatsApp:** in the demo store the WhatsApp settings show "Something went wrong with Nexcod WhatsApp. Bills are not going from it right now."
- **Keyboard guide:** the How to Use page lists Alt+number shortcuts; the in-app Keys window on Billing lists only the billing keys.
- **Menu names:** the How to Use guide refers to "More ›" menus (More › Settings, More › Activity Log, More › Plan) from the earlier top-menu layout; the new layout uses a left menu with Settings and Users & Access groups.
- **Demo data:** the demo GSTIN is flagged by the Before You File check as not a real GSTIN, and some demo product names are test text. A cleaner demo store would make better screenshots for marketing.
